n8n Automation Mastery

📚 COMPLETE NOTES

25 din · 50 ghante · 8 modules

n8n Automation Mastery

"Zero se AI Automation Expert — 25 Live Classes mein"

🧭 Automation Foundations
🧩 Core Nodes & Data Mastery
🔌 APIs, Webhooks & Integrations
💼 Business Automation Playbooks
🤖 AI Automation & Agents
🛡️ Production-Grade Engineering
🏗️ Real-World Project Sprints
🚀 Career, Freelancing & Capstone

Naam: _____ Batch: _____

📚 Course index — 25 din, ek jagah

Har din ka title aur module. Kisi bhi din par seedha jaane ke liye click karo.

🧭 Module 1 · Automation Foundations

Day 01 Automation Mindset & Welcome to n8n
Day 02 Triggers, Nodes & Executions Deep-Dive
Day 03 n8n Data Model: Items, JSON & Binary

🧩 Module 2 · Core Nodes & Data Mastery

Day 04 Expressions & Data Transformation
Day 05 Logic & Flow Control: IF, Switch, Merge, Loop
Day 06 Code Node: JavaScript for Automators

🔌 Module 3 · APIs, Webhooks & Integrations

Day 07 HTTP Request & REST APIs Mastery
Day 08 Authentication, Credentials & Webhooks
Day 09 Google Workspace & Messaging Automation
Day 10 Databases: Postgres, Supabase, Airtable & Notion

💼 Module 4 · Business Automation Playbooks

Day 11 Lead Generation & CRM Automation
Day 12 Marketing & Social Media Automation
Day 13 E-commerce, Finance & Reporting Automation

🤖 Module 5 · AI Automation & Agents

Day 14 AI in n8n: LLMs & Prompt Engineering
Day 15 AI Agents: Tools, Memory & Reasoning
Day 16 RAG: Chat With Your Own Data
Day 17 Document AI, Vision & Voice Automation

🛡️ Module 6 · Production-Grade Engineering

Day 18 Error Handling, Sub-Workflows & Reliability
Day 19 Self-Hosting n8n: Docker, VPS & Domains
Day 20 Scaling, Security & Workflow DevOps

🏗️ Module 7 · Real-World Project Sprints

Day 21 Project Sprint 1: AI Customer Support Desk
Day 22 Project Sprint 2: AI Content & Marketing Engine
Day 23 Project Sprint 3: Finance & Operations Autopilot

🚀 Module 8 · Career, Freelancing & Capstone

Day 24	Freelancing, Agency & Client Delivery
Day 25	Capstone Demo Day & Graduation

DAY 01

Automation Mindset & Welcome to n8n

"Aaj aap apna pehla workflow live chalaoge — sirf 2 ghante mein."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Automation ka asli matlab hai: jo kaam aap roz same tareeke se karte ho, woh computer khud kare. Aaj student ko "aha moment" milna chahiye — ek workflow jo khud chalta hai.

🎯 Aaj ke baad aap yeh kar paoge

01 Automation kya hai & businesses kyun pay karte hain

🌍 Ek coaching owner roz 2 ghante students ko fee reminder WhatsApp karta hai — yahi kaam automation 0 minute mein karta hai, isliye businesses pay karte hain.
⚙️ Schedule Trigger + Google Sheets + WhatsApp: har mahine 5 tareekh ko pending fees walon ko reminder.

02 n8n vs Zapier vs Make — kab kya use karein

🌍 Zapier = ready-made tiffin (easy, mehenga), Make = restaurant thali (visual), n8n = apni kitchen (thodi mehnat, poora control, sasta).
⚙️ Simple 2-step zap → Zapier theek; AI agent + 20 steps + self-host → n8n.

03 n8n Cloud account setup + local install (npx)

🌍 Cloud = rent ka ghar (turant shift), self-host = apna ghar (setup lagta hai, par kiraya nahi).
⚙️ n8n.io par trial account ya terminal mein: npx n8n → localhost:5678

04 Editor tour: canvas, nodes, connections, executions

🌍 Canvas ek whiteboard hai, nodes us par chipke sticky notes, connections unke beech ki lines.
⚙️ Canvas par "+" dabao → node add, drag karke connect, "Executions" tab mein history.

05 Trigger vs action nodes

🌍 Doorbell (trigger) bajti hai → aap darwaza kholte ho (action).
⚙️ Schedule Trigger (trigger) → Gmail "Send" (action).

06 Pehla workflow: Schedule → HTTP → Email

🌍 Subah ka akhbaar: hawker roz 6 baje (schedule) laata hai (HTTP), darwaze par daal deta hai (email).
⚙️ Schedule Trigger → HTTP Request (quote API) → Gmail.

⏱ Class ka plan (2 ghante)

15m	30m	45m	20m	10m

`0:00-0:15` **Kickoff & Orientation**

Course roadmap, community join, tools checklist

🪄 Jaise school ke pehle din pata chalta hai saal bhar kya padhenge aur bag mein kya laana hai. Bag = tools, syllabus = roadmap.

`0:15-0:45` **Concept: Automation Thinking**

Process mapping — trigger, steps, output

🪄 Beta, subah alarm bajta hai to tum uthte ho, brush karte ho, nahate ho, school jaate ho. Alarm = trigger, baaki sab = steps. Agar ek robot yeh sab tumhare liye kar de — wahi automation hai.

0:45-1:30 **Live Build**
Daily motivational quote email workflow
🪄 Aaj ki kahani yaad hai — 'Gaadi aur automation — same soch'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Your Turn**
Workflow ko apne naam/email ke saath customize karo
🪄 Board par drawing ban gayi, ab apni copy mein apne rang bharo.

1:50-2:00 **Q&A + Homework**
Doubts, homework brief
🪄 Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Workflow
Nodes ki ek chain jo ek kaam poora karti hai. Jaise recipe — steps ek ke baad ek.

🪄 **Analogy:** Chai banana: paani → patti → doodh → cheeni = workflow

CONCEPT 02
Trigger vs Action
Trigger batata hai KAB chalna hai, actions batate hain KYA karna hai.

🪄 **Analogy:** Alarm (trigger) bajta hai → aap uthte ho (action)

CONCEPT 03
Execution
Workflow ka ek run. Har execution ka log n8n save karta hai.

🪄 **Analogy:** Bank statement ki ek entry

CONCEPT 04
Cloud vs Self-hosted
n8n Cloud = ready-made, monthly fee. Self-hosted = apna server, unlimited, thoda setup.

🪄 **Analogy:** Rent ka ghar vs apna ghar

🔑 Aaj ka main idea

Automation thinking ka matlab hai har kaam ko 3 hisson mein todna: KAB shuru hota hai (trigger), KYA-KYA steps hote hain (actions), aur END mein kya milta hai (output). Jo kaam roz same tareeke se hota hai, woh automate ho sakta hai.

- Washing machine: button dabaya (trigger) → paani, wash, rinse, spin (actions) → saaf kapde (output)
- School bell: 8 baje (trigger) → ghanti bajti hai (action) → class shuru (output)
- Dukaan: customer ne UPI kiya (trigger) → "₹500 received" bolne wala speaker (action)

📖 Ek kahani se samjho: Gaadi aur automation — same soch

1 🔑 **Chaabi ghumayi** = Trigger (kab shuru ho)

2 ⚙️ **Engine chalu hua** = Action node

3 🛣️ **Gaadi road par chali** = Data flow (connections)

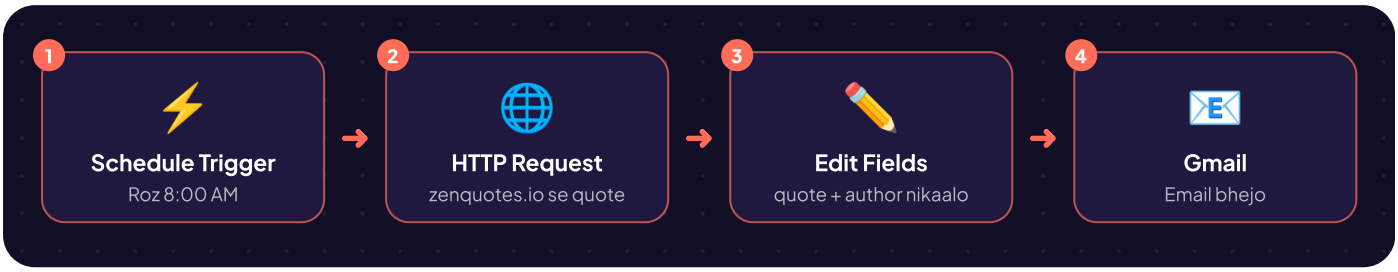

4 🚦 **Signal laal hai? Ruk jao** = IF node (decision)

5 🏁 **Manzil par pahunche** = Output (email/message)

🪄 Ek line mein: “Beta, subah alarm bajta hai to tum uthte ho, brush karte ho, nahate ho, school jaate ho. Alarm = trigger, baaki sab = steps. Agar ek robot yeh sab tumhare liye kar de — wahi automation hai.”

🗺️ Aaj ka workflow: Daily Quote Mailer

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Coaches, schools, gyms (daily motivation / tips email) — aam taur par **₹2,000 – ₹5,000 setup**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Schedule Trigger**
Trigger Interval: Days, Hour: 8 — roz subah 8 baje

2 🌐 **HTTP Request**
GET https://zenquotes.io/api/random — free quote API

3 ✏️ **Edit Fields (Set)**
quote = {{ $json[0].q }}, author = {{ $json[0].a }}

4 📧 **Gmail**
To: apna email, Subject: "Aaj ka quote ☀️", Message: quote + author

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- ☐ Connect: **Gmail (Google OAuth)**
- ☐ Gmail node mein "your-email@gmail.com" ki jagah apna email likho

✅ Test kaise karein

1. Workflow open karke "Test workflow" dabao
2. Inbox check karo — quote aaya?
3. Sab theek ho to upar "Active" toggle on karo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Roz quote website kholna	5 min
Quote copy karna	2 min
Gmail kholke email likhna	5 min
Bhejna aur yaad rakhna kal bhi karna hai	3 min
	15 min

➜

⚡ Ab (n8n)

n8n khud 8 baje chalta hai	
Quote fetch + email automatic	
Aap sirf inbox mein padhte ho	1 min
	1 min

⏱ Roz 15 minute → 1 minute. Saal mein ~85 ghante bache.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
{{ $json[0].q }} — {{ $json[0].a }}
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
[
  {
    "q": "The best way to get started is to quit
talking and begin doing.",
    "a": "Walt Disney"
  }
]
```

📤 Output — 📋 Select karke copy karo

```
{
  "quote": "The best way to get started is to quit
talking and begin doing.",
  "author": "Walt Disney",
  "sent": true
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude — 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Har subah 8 baje internet se ek motivational quote laata hai aur aapko email kar deta hai. Pehla
real automation — trigger, API, data set karna aur email.

Flow: Schedule Trigger (Roz 8:00 AM) → HTTP Request (zenquotes.io se quote) → Edit Fields (quote + author
nikaalo) → Gmail (Email bhejo)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to
test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "Daily Quote Mailer" (nodes: Every Day 8 AM, Get Random Quote, Pick Quote + Author, Send Quote Email).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ **Workflow JSON**
4 nodes · ready to import
adifyskills.com/workflows/day-01-daily-quote-mailer.json

🌐 **Lesson page**
Copy buttons, quiz aur video links
adifyskills.com/day/1

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.

⚠️ Yeh galtiyan sabse common hain

- ! Workflow ko "Active" karna bhool jaana — tab Schedule chalega hi nahi
- ! Test URL aur production run mein confusion
- ! Gmail credential mein galat Google account select karna

⭐ Pro tips — time bachane wali tricks

- ★ Har node ke baad "Execute step" dabake output check karo
- ★ Workflow ka naam clear rakho: "Daily – Quote Mailer"
- ★ Sticky note se workflow ka purpose likho

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Daily Quote Mailer — har subah 8 baje ek quote API se fetch karke email bhejna.

📝 Homework

Apne kaam/business ke 5 repetitive tasks list karo aur unka trigger-action map banao.

- [ ] Homework ho gaya

BEGINNER
Quote ki jagah daily joke API use karo

- [ ]

INTERMEDIATE
Email ke saath Telegram par bhi bhejo

- [ ]

ADVANCED
Sirf weekdays (Mon–Fri) par chalao using cron expression

- [ ]

🧩 Aaj ka challenge — pehle khud try karo

🎯 Quote email sirf Monday se Friday subah 8 baje aaye, weekend par nahi.

💡 Hint 1
Schedule Trigger mein "Days" ki jagah "Custom (Cron)" mode dekho.

💡 Hint 2
Cron mein 5 hisse hote hain: minute hour day month weekday. Weekday 1-5 = Mon-Fri.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Workflow kab start hoga, yeh kaun decide karta hai?

- (A) Trigger node
- (B) Credential
- (C) Sticky note
- (D) Action node

Q2. Schedule Trigger ke liye workflow ko kya karna zaroori hai?

- (A) Delete
- (B) Duplicate
- (C) Activate (publish)
- (D) Export

Q3. n8n ka self-hosted version kaisa hai?

(A) Sirf Windows
(B) Sirf paid
(C) Free Community Edition available
(D) Sirf mobile

Q4. Ek workflow run ko kya kehte hain?

(A) Node
(B) Pin
(C) Execution
(D) Credential

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

API
Do apps ke baat karne ka tareeka. Ek app sawaal bhejta hai, doosra jawab (data) deta hai.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

Execution
Workflow ka ek baar chalna. Har run ka record Executions tab mein dikhta hai.

HTTP Request
Node jo kisi bhi API ko call kar sakta hai — n8n ka universal connector.

Schedule
Fixed time par workflow chalana — roz, har ghante, har Monday.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 2

Triggers, Nodes & Executions Deep-Dive

"Workflow kab start ho — yeh control aapke haath mein."

☐ **Day 1 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → A
Trigger node
Trigger node hi workflow ko start karta hai.

Q2 → C
Activate (publish)
Inactive workflow automatic nahi chalta.

Q3 → C
Free Community Edition available
Community Edition self-host karne ke liye free hai.

Q4 → C
Execution
Har run = ek execution.

✅ Challenge ka solution

Schedule Trigger → Trigger interval: Custom (Cron) → Expression: 0 8 * * 1-5

Quiz, copy buttons, videos

`adifyskills.com/day/1`

DAY 02

Triggers, Nodes & Executions Deep-Dive

"Workflow kab start ho — yeh control aapke haath mein."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Triggers samajh liye to automation ka 50% ho gaya. Galat trigger = workflow ya to chalega nahi ya bar-bar chalega.

🎯 Aaj ke baad aap yeh kar paoge

01 Trigger types: Manual, Schedule (cron), Webhook, App triggers

🌍 Alarm (schedule), doorbell (webhook), light switch (manual), WhatsApp notification (app trigger).
⚙️ "0 9 * * 1-5" cron = weekdays 9 AM; Webhook URL = form ka pata.

02 Node parameters, credentials & settings

🌍 TV ke settings: volume, channel (parameters), parental lock password (credential).
⚙️ Gmail node: To/Subject (parameters), Google account (credential), Retry on fail (settings).

03 Execution modes: manual vs production (active)

🌍 Rehearsal vs real show — rehearsal mein galti chalti hai, show mein nahi.
⚙️ "Test workflow" = manual run; Active/Publish = production mein khud chalega.

04 Execution history, pinning data & debugging

🌍 CCTV recording — kya hua, kab hua, wapas dekh sakte ho.
⚙️ Executions tab → failed run kholo → kaunsa node laal hai dekho → Retry.

05 Sticky notes & workflow documentation

🌍 Fridge par chipki note: "Doodh khatam, laana hai".
⚙️ Canvas par Sticky Note: "Yeh workflow leads ko Sheet mein daalta hai".

06 Workflow naming + folder conventions

🌍 Almirah mein labelled folders — "Bills 2026", "School".
⚙️ Naam: "Leads – Form to Sheet", folder: "Client – ABC Gym".

⏱ Class ka plan (2 ghante)

10m	35m	45m	20m	10m

`0:00-0:10` **Recap Day 1**

Homework review — 2 student maps

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:45` **Concept: Triggers**

Cron expressions, polling vs push

🪄 Mummy ka alarm subah 6 baje bajta hai (schedule), doorbell kisi ke aane par (event), aur TV remote tum dabate ho (manual).

0:45-1:30 **Live Build**
Form submission → Google Sheet + Telegram alert
🪄 Aaj ki kahani yaad hai — 'Doorbell vs baar-baar darwaza kholna'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Debug Lab**
Broken workflow fix challenge
🪄 Practice match — jitna yahan girenge, utna asli match mein kam girenge.

1:50-2:00 **Q&A + Homework**
🪄 Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Polling vs Push
Polling: n8n har X minute check karta hai. Push (webhook): app khud turant batata hai.
🪄 **Analogy:** Baar-baar darwaza kholna vs doorbell

CONCEPT 02
Cron expression
5 fields: minute hour day month weekday. "0 9 * * 1-5" = weekdays 9 AM.
🪄 **Analogy:** Alarm clock ki advanced setting

CONCEPT 03
Credentials
Apps ka secure login — ek baar save, har workflow mein reuse.
🪄 **Analogy:** Password manager

CONCEPT 04
Pinned data
Node ka output freeze karna taaki testing mein baar-baar API call na ho.
🪄 **Analogy:** Exam ki rough copy

🔑 Aaj ka main idea
Trigger 3 tarah ke hote hain: Manual (aap button dabao), Schedule (time par — roz 9 baje), Event/Webhook (kuch hua tab — form bhara, payment aaya). Sahi trigger chunna = workflow sahi time par chalna.

- Manual: microwave ka start button
- Schedule: roz raat 10 baje street lights on
- Event: koi aaya to motion-sensor light on

📖 Ek kahani se samjho: Doorbell vs baar-baar darwaza kholna

1 🚪 **Har 5 min darwaza kholke dekhna** = Polling trigger (Schedule)

2 🔔 **Doorbell lagwa li** = Webhook (push)

3 📦 **Courier aaya, ghanti baji** = Event aaya → workflow chalu

4 📝 **Register mein entry** = Google Sheets append

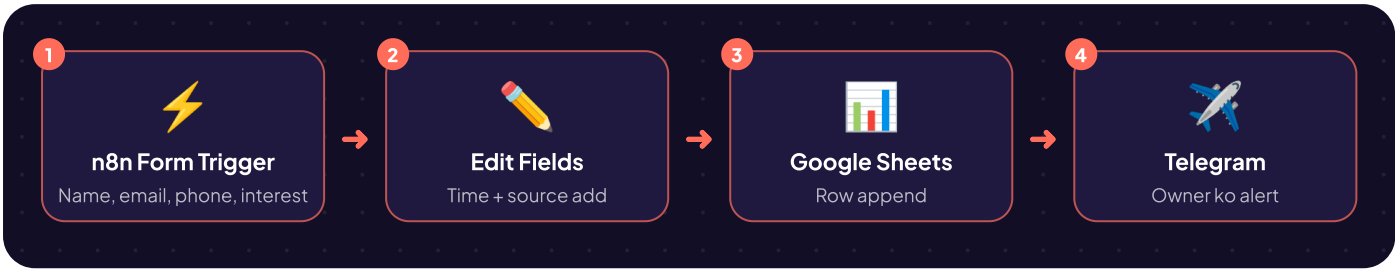

5 📱 **Papa ko message** = Telegram notification

🪄 Ek line mein: “Mummy ka alarm subah 6 baje bajta hai (schedule), doorbell kisi ke aane par (event), aur TV remote

tum dabate ho (manual)."

🗺️ Aaj ka workflow: Lead Form → Google Sheet + Telegram Alert

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Coaching institutes, clinics, real estate agents (lead form + alert) — aam taur par **₹3,000 – ₹8,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **n8n Form Trigger**
Fields: Name, Phone, Email, Course interest (dropdown)

2 ✏️ **Edit Fields (Set)**
submittedAt = {{ $now.toISO() }}, source = "website-form"

3 📊 **Google Sheets**
Operation: Append row → "Leads" sheet, map columns

4 ✈️ **Telegram**
Owner ko: "🔥 Nayi lead: {{ $json.Name }} – {{ $json.Phone }}"

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- ☐ Connect: **Google Sheets (Google OAuth)**
- ☐ Connect: **Telegram bot token (BotFather se)**
- ☐ Google Sheet banao jisme "Leads" tab ho aur headers: Name, Email, Phone, Interest, submitted_at, source
- ☐ Sheet ID (URL ke /d/ ke baad wala hissa) "Save to Sheet" mein paste karo
- ☐ Telegram chat ID ke liye @userinfobot ko message karo

✅ Test kaise karein

1. Form Trigger node kholo → "Test URL" copy karke browser mein kholo
2. Form bharo → Sheet mein row aur Telegram par message check karo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Form responses check karna	10 min
Sheet mein copy-paste	10 min
Owner ko call/WhatsApp	5 min
	25 min

⚡ Ab (n8n)

Form submit → Sheet auto	
Owner ko Telegram auto	
	0 min

⏱ Har lead par 25 min bache, aur koi lead miss nahi.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
0 9 * * 1-5   // cron: Mon-Fri subah 9 baje
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "Name": "Aman Verma",
  "Phone": "9876543210",
  "Email": "aman@gmail.com",
  "Course interest": "n8n"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "row_number": 42,
  "telegram": "message sent ✓"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude — 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Ek n8n Form banata hai. Koi form bhare to uski details Google Sheet mein save hoti hain aur owner ko turant Telegram par alert jaata hai.

Flow: n8n Form Trigger (Name, email, phone, interest) → Edit Fields (Time + source add) → Google Sheets (Row append) → Telegram (Owner ko alert)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "Lead Form → Google Sheet + Telegram Alert" (nodes: Lead Form, Add Time + Source, Save to Sheet, Alert Owner).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

adifyskills.com/day/2

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Telegram bot token (BotFather se)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Form Trigger ka test URL production mein share kar dena
- ! Sheet ke column names aur mapping mismatch
- ! Telegram bot ko /start kiye bina chat ID dhoondhna

⭐ Pro tips — time bachane wali tricks

- ★ Executions tab mein "Retry" se failed run dobara chalao
- ★ Pin data karke Sheets/Telegram ko bina form bhare test karo
- ★ Folders/tags se workflows organize karo

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

n8n Form Trigger → Google Sheets row + Telegram notification to owner.

📝 Homework

3 alag triggers wale mini workflows banao aur execution screenshots share karo.

- ☐ Homework ho gaya

BEGINNER
Form mein "City" field add karo ☐

INTERMEDIATE
Duplicate phone par Telegram mat bhejo ☐

ADVANCED
Form submit ke baad custom thank-you page dikhao ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Form mein "City" field add karo aur Telegram alert mein city bhi dikhao.

💡 Hint 1
Form Trigger ke "Form Elements" mein naya field add hota hai.

💡 Hint 2
Telegram text mein naya field {{ $json.City }} se aayega — naam bilkul same likhna (capital C).

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Webhook kis type ka trigger hai?

- (A) Manual
- (B) Scheduled
- (C) Polling
- (D) Push

Q2. "0 9 * * 1-5" kab chalega?

- (A) Weekdays 9 AM
- (B) Har ghante
- (C) Sirf Sunday
- (D) Roz 9 PM

Q3. Pinned data ka fayda?

(A) Speed badhaana
(B) Testing mein baar-baar trigger na karna
(C) Data delete
(D) Security

Q4. Credentials kahan store hote hain?

(A) Browser
(B) Har node mein alag
(C) n8n credential manager (encrypted)
(D) Sheet mein

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Node
Workflow ka ek dabba/step. Har node ek kaam karta hai (email bhejna, data laana…).

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

API
Do apps ke baat karne ka tareeka. Ek app sawaal bhejta hai, doosra jawab (data) deta hai.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

Expression
{{ }} ke andar likha chhota code jo data ko jagah par bhar deta hai, jaise {{ $json.name }}.

Execution
Workflow ka ek baar chalna. Har run ka record Executions tab mein dikhta hai.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 3

n8n Data Model: Items, JSON & Binary

"Jo data samajh gaya, woh n8n samajh gaya."

☐ **Day 2 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → D
Push
App khud data push karta hai.

Q2 → A
Weekdays 9 AM
Minute 0, hour 9, Mon–Fri.

Q3 → B
Testing mein baar-baar trigger na karna

Q4 → C
n8n credential manager (encrypted)

✅ Challenge ka solution

Form Trigger → Add Form Element → Label "City". Telegram text mein: 🏙 {{ $json.City }}. Sheet mein bhi "City" column banao.

DAY 03

n8n Data Model: Items, JSON & Binary

"Jo data samajh gaya, woh n8n samajh gaya."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

n8n mein sab kuch "items" hai. Jo student items ko samajh gaya, usse koi bhi workflow mushkil nahi lagega.

🎯 Aaj ke baad aap yeh kar paoge

01 JSON basics: objects, arrays, nesting

🌍 Visiting card: Naam, Phone, Email — har field ka ek label aur value.
⚙️ {"name": "Aman", "phones": ["98...", "99..."], "address": {"city": "Pune"}}

02 n8n items — har node items ki list process karta hai

🌍 Conveyor belt par 10 boxes — machine har box par same kaam karti hai.
⚙️ HTTP se 10 users aaye → Edit Fields har user par chala → 10 output items.

03 Item linking & paired items

🌍 Order slip aur uska bill — dono ek doosre se jude hain.
⚙️ Paired items se pata rehta hai ki output item kis input item se bana.

04 Binary data: files, images, PDFs

🌍 Courier mein letter (JSON) + parcel attached (binary).
⚙️ Gmail attachment → binary.data → Extract from File → text.

05 Split Out, Aggregate & Summarize nodes

🌍 Mithai ka dabba kholna (split), wapas bharna (aggregate), ginti karna (summarize).
⚙️ Order ke line items Split Out → Summarize by product → Aggregate into one email.

06 Data pinning & mock data for testing

🌍 Rough copy par practice — final copy kharab nahi hoti.
⚙️ API ka output pin karo → aage ke nodes bina API call ke test karo.

⏱ Class ka plan (2 ghante)

10m	40m	40m	20m	10m

`0:00-0:10` **Recap**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:50` **Concept: Data Structure**

Visual walkthrough of items flow

🪄 Teacher ke paas 30 copies hain. Woh har copy par same kaam karti hai — check karna, marks dena. n8n bhi har item par wahi karta hai.

`0:50-1:30` **Live Build**

CSV upload → clean → split → aggregate report

🪄 Aaj ki kahani yaad hai — 'Tiffin factory ki assembly line'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Quiz + Challenge**
Module 1 quiz (15 questions)
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

JSON

Data likhne ka format: { "key": "value" }. Objects {} aur arrays [].

🪄 **Analogy:** Form ke fields aur unke jawab

CONCEPT 02

Items

Har node items ki LIST leta hai aur har item par kaam karta hai.

🪄 **Analogy:** Assembly line par boxes

CONCEPT 03

Split Out vs Aggregate

Split Out: 1 item ki list → kai items. Aggregate: kai items → 1 list.

🪄 **Analogy:** Packet kholna vs packet bharna

CONCEPT 04

Binary data

Files (PDF, image) JSON ke saath "binary" property mein chalti hain.

🪄 **Analogy:** Courier ke saath attached parcel

🔑 Aaj ka main idea

n8n mein data "items" ki list ke roop mein chalta hai. Har item ek JSON object hai — jaise ek form ka ek jawab. Agar 10 items aaye, to agla node 10 baar chalega. Yeh samajh aa gaya to n8n 50% aa gaya.

- Attendance register: har line = ek student = ek item
- Shopping list: har cheez = ek item
- WhatsApp group ke 20 messages = 20 items

📖 Ek kahani se samjho: Tiffin factory ki assembly line

1 📦 **Ek bada dabba aaya (CSV)**
= Extract from File

2 📤 **Dabba khola, 50 tiffin nikle**
= Split Out → 50 items

3 🧹 **Toote tiffin hataye**
= Filter

4 🏙️ **City-wise ginti**
= Summarize

5 🚚 **Report bhej di**
= Gmail

🪄 Ek line mein: “Teacher ke paas 30 copies hain. Woh har copy par same kaam karti hai — check karna, marks dena. n8n bhi har item par wahi karta hai.”

🗺️ Aaj ka workflow: CSV Sales → City-wise Report Email

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Distributors, D2C brands (daily/weekly sales report) — aam taur par **₹5,000 – ₹12,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Manual Trigger**
Testing ke liye

2 🌐 **HTTP Request**
CSV file URL se download (Response: File)

3 📄 **Extract from File**
Operation: Extract from CSV → har row ek item

4 🔀 **Filter**
amount > 0 (khaali/galat rows hatao)

5 📈 **Summarize**
Group by: city, Sum: amount, Count: orders

6 📧 **Gmail**
City-wise summary table email

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- ☐ Connect: **Gmail (Google OAuth)**
- ☐ Sample CSV download karo (neeche link) — columns: order_id, city, amount

✅ Test kaise karein

1. Form ka Test URL kholo → sample-sales.csv upload karo
2. Har node ka output dekho: items kaise group hue
3. Email mein table check karo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Excel kholna	2 min
City-wise filter + total	20 min
Summary type karna	10 min
Email bhejna	3 min
	35 min

➜

⚡ Ab (n8n)

CSV aate hi summary email

0 min

⏱ Har report par 35 min bache, calculation galti zero.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
{{ $input.all().length }}  // kitne items aaye
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
[
  {
    "city": "Delhi",
    "amount": 1200
  },
  {
    "city": "Pune",
    "amount": 800
  },
  {
    "city": "Delhi",
    "amount": 500
  }
]
```

📤 Output — 📋 Select karke copy karo

```
[
  {
    "city": "Delhi",
    "sum_amount": 1700,
    "count": 2
  },
  {
    "city": "Pune",
    "sum_amount": 800,
    "count": 1
  }
]
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Form par sales ki CSV file upload karo. Workflow file padhta hai, city-wise total nikaalta hai aur ek saaf HTML table email karta hai.

Flow: Form (file upload) (sales.csv) → Extract from File (CSV → items) → Code (City-wise sum) → Code (HTML table) → Gmail (Report email)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "CSV Sales → City-wise Report Email" (nodes: Upload Sales CSV, Read CSV, City-wise Total, Build HTML Table, Email Report).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
5 nodes · ready to import
adifyskills.com/workflows/day-03-csv-city-sales-report.json

🌐 Lesson page
Copy buttons, quiz aur video links
adifyskills.com/day/3

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.

⚠ Yeh galtiyan sabse common hain

- ! Ek item expect karna jab 50 items aa rahe hon (har email 50 baar jayega!)
- ! Nested array ko bina Split Out ke process karna
- ! Binary property ka naam galat dena (data vs file)

⭐ Pro tips — time bachane wali tricks

- ★ Output panel mein Table / JSON / Schema views badal ke dekho
- ★ Item count node ke upar dikhta hai — hamesha check karo
- ★ Aggregate se pehle Sort karo agar order matter karta hai

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

CSV sales file ko process karke city-wise summary nikaalna aur email karna.

📝 Homework

Public API (e.g. JSONPlaceholder) se data laake usse Split Out + Aggregate se transform karo.

☐ Homework ho gaya

BEGINNER
Sirf Delhi ke orders filter karo ☐

INTERMEDIATE
Top 3 cities sort + limit ☐

ADVANCED
Summary ko Excel file bana ke attach karo ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Report mein sirf woh cities dikhao jinki sales ₹5,000 se zyada hai.

💡 Hint 1
Code node ke baad ek naya node lagao jo items ko chhaant de.

💡 Hint 2
Filter node mein condition: sales (number) "is greater than" 5000.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. 10 items ek Gmail node mein jaayein to kitne emails?

- (A) Error
- (B) 1
- (C) 10
- (D) 0

Q2. Kai items ko ek list banane ka node?

- (A) Filter
- (B) IF
- (C) Split Out
- (D) Aggregate

Q3. PDF file n8n mein kahan hoti hai?

- (A) binary
- (B) headers
- (C) credentials
- (D) json

Q4. JSON mein list kis bracket mein?

- (A) {}
- (B) []
- (C) ()
- (D) <>

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Node
Workflow ka ek dabba/step. Har node ek kaam karta hai (email bhejna, data laana…).

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

Item
Data ki ek row/record. n8n mein data items ki list ki tarah flow karta hai.

Binary
File wala data — PDF, image, CSV. Text se alag hota hai.

HTTP Request
Node jo kisi bhi API ko call kar sakta hai — n8n ka universal connector.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 4

Expressions & Data Transformation

"{{ }} — n8n ki asli superpower."

☐ **Day 3 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → C
10
Har item ke liye node ek baar chalta hai.

Q2 → D
Aggregate

Q3 → A
binary

Q4 → B
[]

✅ Challenge ka solution

City-wise Total ke baad Filter node: {{ $json.sales }} → Number → is greater than → 5000. Phir Build HTML Table.

📚 Official docs

💬 Doubt poochho

WhatsApp par seedha message

`wa.me/919000000000?text=Day%203%20(n8n%20Data%20Model%3A%20Items%2C%20JSON%20%26%20Binary)%20mein%20doubt%20hai%3A%20`

🌐 Day 3 lesson page

Quiz, copy buttons, videos

`adifyskills.com/day/3`

DAY 04

Expressions & Data Transformation

"{{}} — n8n ki asli superpower."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Expressions se workflow "smart" banta hai — har item ke data ke hisaab se alag message, alag date, alag value.

🎯 Aaj ke baad aap yeh kar paoge

01 Expression editor & $json, $input, $node

🌍 Form ka "Naam" box — har form mein alag value.
⚙️ {{ $json.email }} → current item ka email.

02 Referencing previous nodes: $("Node").item

🌍 Pichhle page par wapas jaake dekhna kisne bheja tha.
⚙️ {{ $("Webhook").item.json.body.phone }}

03 String, number, array & date functions

🌍 Calculator: plus, minus, uppercase, ginti.
⚙️ {{ $json.price * 1.18 }}, {{ $json.tags.join(", ") }}, {{ $json.name.toUpperCase() }}

04 Luxon for dates ($now, $today, formats, timezones)

🌍 Calendar mein "aaj se 7 din baad" dekhna.
⚙️ {{ $now.plus({days: 7}).toFormat("dd LLL yyyy") }} → "08 Dec 2026"

05 Edit Fields (Set) node — mapping & renaming

🌍 Form ke columns ka naam badalna: "Mob No" → "phone".
⚙️ Edit Fields: phone = {{ $json["Mob No"] }}, source = "website"

06 Drag-and-drop mapping best practices

🌍 Puzzle piece ko sahi jagah drag karna.
⚙️ Input panel se field ko parameter box mein drag → expression khud ban jaata hai.

⏱ Class ka plan (2 ghante)

10m	35m	45m	20m	10m

`0:00-0:10` **Recap + Quiz results**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:45` **Concept: Expressions**

20 must-know expressions

🪄 Mad-libs game jaisa — sentence mein khaali jagah hai, har baar alag word bharo, alag sentence ban jaata hai.

`0:45-1:30` **Live Build**

Lead data cleaner — name/phone/email normalize

🪄 Aaj ki kahani yaad hai — 'Shaadi ke card par naam bharna'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Expression Gym**
10 rapid challenges
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
{{ }} Expression
Double curly braces ke andar JavaScript chalti hai.
🪄 **Analogy:** Mail-merge ke placeholders

CONCEPT 02
$json
Current item ka data. $json.email = is item ka email.
🪄 **Analogy:** "Yeh wala form"

CONCEPT 03
$("Node Name")
Kisi bhi pichhle node ka data access.
🪄 **Analogy:** Pichhle page par wapas dekhna

CONCEPT 04
Luxon ($now, $today)
Dates ke liye: $now.plus({days:3}).toFormat("dd LLL")
🪄 **Analogy:** Calendar calculator

🔑 Aaj ka main idea

Expression {{ }} ek "khaali jagah" hai jo har item ke data se bhar jaati hai. $json = current item, $("Node") = kisi pichhle node ka data, $now = abhi ka time. Isse ek hi workflow har customer ke liye alag message bana deta hai.

- Bank SMS: "Dear {{name}}, ₹{{amount}} debited"
- School report card: "{{student}} ne {{marks}} laaye"
- Birthday wish: "Happy birthday {{name}}, aaj aap {{age}} saal ke ho gaye!"

📖 Ek kahani se samjho: Shaadi ke card par naam bharna

1 💌 **Ek hi card design** = Template (message)

2 ✍️ **Har card par alag naam** = {{ $json.name }}

3 📅 **Date likhna** = {{ $now.toFormat() }}

4 🔠 **Naam ka spelling theek** = .toTitleCase()

5 📮 **100 card ready** = 100 personalised items

🪄 Ek line mein: “Mad-libs game jaisa — sentence mein khaali jagah hai, har baar alag word bharo, alag sentence ban jaata hai.”

🗺️ Aaj ka workflow: Messy Lead List Cleaner

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Agencies, telecallers (lead list cleaning) — aam taur par **₹3,000 – ₹10,000 per project**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Manual Trigger**
Test

2 👨‍💻 **Code**
Sample messy leads (5 items) generate

3 ✏️ **Edit Fields (Set)**
name → toTitleCase, phone → +91 format, email → lowercase trim

4 🔀 **IF**
Email valid hai? {{ $json.email.isEmail() }}

5 📊 **Google Sheets**
Valid → "Clean Leads", invalid → "Review" sheet

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] Sheet mein 2 tabs banao: "Clean Leads" aur "Review" (headers: name, phone, email, email_valid)

✅ Test kaise karein

1. "Test workflow" dabao
2. "Clean Fields" ka output dekho — before/after compare karo
3. IF ke true/false dono branches mein kitne items gaye?

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)		⚡ Ab (n8n)	
Har lead ka naam/phone manually theek karna	30 min	Expressions se sab auto-clean	
Invalid emails dhoondhna	15 min	Invalid alag sheet mein	
	45 min		0 min

⏱ 100 leads par 45 min → 0, aur data hamesha clean.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
{{ "+91" + $json.phone.replace(/\D/g, "").slice(-10) }}
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "name": "  rAHUL sharma ",
  "phone": "98765-43210",
  "email": " Rahul@GMAIL.com "
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "name": "Rahul Sharma",
  "phone": "+919876543210",
  "email": "rahul@gmail.com",
  "valid": true
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude — 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Gande data ko saaf karta hai: naam proper case mein, phone +91 format mein, aur galat emails alag. Saaf leads ek tab mein, galat wale "Review" tab mein.

Flow: Manual Trigger (Test run) → Code (Sample messy leads) → Edit Fields (Expressions se clean) → IF (Email valid?) → Google Sheets (Clean / Review)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "Messy Lead List Cleaner" (nodes: Run Manually, Sample Messy Leads, Clean Fields, Email Valid?, Save Clean Leads, Save for Review).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
6 nodes · ready to import
`adifyskills.com/workflows/day-04-messy-lead-cleaner.json`

🌐 Lesson page
Copy buttons, quiz aur video links
`adifyskills.com/day/4`

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Expression mode (fx) on karna bhool jaana — text literally chala jaata hai
- ! Node ka naam badalne par $("Old Name") toot jaana
- ! Null field par .toLowerCase() → error (use ?. ya default)

⭐ Pro tips — time bachane wali tricks

- ★ Drag-and-drop mapping se expressions automatic bante hain
- ★ Expression editor mein live preview hamesha dekho
- ★ $json.field ?? "default" se null-safe raho

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Messy lead list ko clean karna: proper case names, +91 phone format, invalid emails flag.

📝 Homework

Expressions cheat sheet se 15 expressions practise karke apni notebook workflow banao.

☐ Homework ho gaya

BEGINNER
Greeting: "Good morning, {{name}}" ☐

INTERMEDIATE
Age calculate from DOB ☐

ADVANCED
Indian festival ke hisaab se dynamic subject line ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Email ka domain (gmail.com, yahoo.com) alag column mein nikaalo.

💡 Hint 1
n8n mein strings ke liye ready-made functions hain — email ke liye bhi.

💡 Hint 2
Expression: {{ $json.email.extractDomain() }} try karo.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Current item ka data kaise access karte hain?

(A) $item
(B) $json
(C) $data
(D) $this

Q2. 3 din baad ki date?

(A) date+3
(B) $now + 3
(C) $now.plus({days: 3})
(D) $today(3)

Q3. Expression kis syntax mein likhte hain?

(A) <% %>
(B) (( ))
(C) [[ ]]
(D) {{ }}

Q4. Kisi pichhle node "Webhook" ka data?

(A) $("Webhook").item.json
(B) $prev
(C) $webhook
(D) $node.Webhook

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Node
Workflow ka ek dabba/step. Har node ek kaam karta hai (email bhejna, data laana…).

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

Expression
{{ }} ke andar likha chhota code jo data ko jagah par bhar deta hai, jaise {{ $json.name }}.

Item
Data ki ek row/record. n8n mein data items ki list ki tarah flow karta hai.

Merge
Do raaston ka data wapas ek jagah jodna.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 5

Logic & Flow Control: IF, Switch, Merge, Loop

"Workflows jo khud decision lete hain."

☐ **Day 4 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → B
$json

Q2 → C
$now.plus({days: 3})
Luxon syntax.

Q3 → D
{{ }}

Q4 → A
$("Webhook").item.json

✅ Challenge ka solution

Clean Fields mein naya field: domain = {{ $json.email.trim().toLowerCase().extractDomain() }}

`adifyskills.com/day/4`

DAY 05

Logic & Flow Control: IF, Switch, Merge, Loop

"Workflows jo khud decision lete hain."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Real business processes seedhe nahi hote — "agar yeh, to woh". Flow control se n8n decisions leta hai.

🎯 Aaj ke baad aap yeh kar paoge

01 IF node & conditions (AND/OR)

🌍 Paise hain AUR dukaan khuli hai → shopping. (AND); chai YA coffee → kuch bhi chalega (OR).
⚙️ IF: {{ $json.paid }} is true AND amount > 0 → invoice branch.

02 Switch node — multi-route routing

🌍 Post office sorting: har letter pin code ke hisaab se alag bag mein.
⚙️ Switch on city: Delhi → rep A, Mumbai → rep B, fallback → manager.

03 Merge node modes: append, combine, by key

🌍 Do registers ko roll number se milana.
⚙️ Merge (matching fields: email) → CRM data + Sheet data ek item mein.

04 Loop Over Items (batching) & rate limits

🌍 Lift mein ek baar 8 log — baaki agli baar.
⚙️ Loop Over Items batch 50 + Wait 1s → API rate limit safe.

05 Wait node — delays & resume on webhook

🌍 Doctor: "3 din baad wapas aana".
⚙️ Wait 3 days → follow-up email; ya Wait "on webhook" → approval ke baad aage.

06 Filter, Remove Duplicates, Sort & Limit

🌍 Chhalni se kankad nikaalna, duplicate photos delete, marks ke hisaab se rank, top 10.
⚙️ Filter (city = Pune) → Remove Duplicates (email) → Sort (score desc) → Limit 10.

⏱ Class ka plan (2 ghante)

10m	35m	45m	20m	10m

`0:00-0:10` **Recap**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:45` **Concept: Flow Control**

Flowchart → n8n mapping

🪄 Traffic police: green to chalo, red to ruko (IF). Chauraha: left, right, seedha (Switch).

`0:45-1:30` **Live Build**

Smart lead router: hot/warm/cold → different actions

🪄 Aaj ki kahani yaad hai — 'Railway junction — kaun si train kis platform'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Challenge**
Batch 500 records with rate limit
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
IF
2 raaste: true / false.
🪄 **Analogy:** Traffic signal: green ya red

CONCEPT 02
Switch
3+ raaste, value ke hisaab se.
🪄 **Analogy:** Railway junction

CONCEPT 03
Merge
Alag branches ka data wapas jodna.
🪄 **Analogy:** Do nadiyan milkar ek

CONCEPT 04
Loop Over Items
Batch-by-batch processing — API rate limit ke liye.
🪄 **Analogy:** Ek baar mein 10 log lift mein

🔑 Aaj ka main idea

Flow control = workflow ka dimaag. IF 2 raaste banata hai (haan/naa), Switch kai raaste, Merge raaston ko wapas jodta hai, Loop bade data ko chhote batches mein chalata hai, Wait ruk ke baad mein chalata hai.

- IF: baarish ho rahi hai? → chhata lo, warna nahi
- Switch: marks 90+ A, 75+ B, baaki C
- Wait: chai ubalne tak 3 minute ruko

📖 Ek kahani se samjho: Railway junction — kaun si train kis platform

1 🚆 **Train aayi (lead)** = Webhook

2 🧮 **Ticket check (score)** = Code / Set

3 🔀 **Junction: 3 raaste** = Switch

4 🔥 **Express → Platform 1** = HOT → Slack sales

5 🐢 **Passenger → Platform 3** = COLD → archive

🪄 Ek line mein: “Traffic police: green to chalo, red to ruko (IF). Chauraha: left, right, seedha (Switch).”

🗺️ Aaj ka workflow: Lead Scoring + Smart Routing

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Sales teams, B2B companies (lead scoring + routing) — aam taur par **₹10,000 – ₹25,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Webhook**
Lead aata hai: budget, timeline, source

2 👨‍💻 **Code**
Score calculate: budget + urgency + source points

3 🔀 **Switch**
score ≥ 70 HOT, 40–69 WARM, baaki COLD

4 💼 **Slack**
HOT → #sales channel turant

5 📧 **Gmail**
WARM → nurture email sequence

6 📊 **Google Sheets**
COLD → archive sheet

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- ☐ Connect: **Slack (OAuth / bot token)**
- ☐ Connect: **Gmail (Google OAuth)**
- ☐ Connect: **Google Sheets (Google OAuth)**
- ☐ Slack mein #sales channel banao (ya Slack node ko Telegram se replace karo)

✅ Test kaise karein

1. Webhook node → "Listen for test event" dabao
2. Neeche wala curl command chalao (ya Postman / Hoppscotch se bhejo)
3. Budget badal-badal ke teeno routes test karo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Har lead padh ke decide karna	5 min
Sahi insaan ko forward	3 min
Follow-up yaad rakhna	5 min
	13 min

⚡ Ab (n8n)

Score + routing auto	
Follow-up Wait node se	
	0 min

⏱ Har lead par 13 min bache, hot lead 1 minute mein sales tak.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
const s = ($json.budget > 30000 ? 40 : 10) + ($json.timeline === "this week" ? 30 : 5);
return { ...$json, score: s };
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "name": "Neha",
  "budget": 50000,
  "timeline": "this week",
  "source": "referral"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "name": "Neha",
  "score": 85,
  "label": "HOT",
  "routedTo": "slack#sales"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude — 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Webhook par lead aata hai, Code node score banata hai (budget, urgency, source), aur Switch hot lead ko Slack, warm ko nurture email, cold ko archive sheet mein bhejta hai.

Flow: Webhook (POST /score-lead) → Code (Score 0-100) → Switch (Hot / Warm / Cold) → Slack · Gmail · Sheets (Route karo)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "Lead Scoring + Smart Routing" (nodes: Lead Webhook, Score Lead, Route by Score, Hot → Slack Sales, Warm → Nurture Email, Cold → Archive).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ **Workflow JSON**
6 nodes · ready to import

🌐 **Lesson page**
Copy buttons, quiz aur video links
`adifyskills.com/day/5`

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Slack (OAuth / bot token)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Merge node ka galat mode — data duplicate ho jaata hai
- ! IF mein string "10" vs number 10 compare karna
- ! Loop ke andar "done" output ko connect na karna

⭐ Pro tips — time bachane wali tricks

- ★ Switch mein "Fallback output" on rakho — unexpected values ke liye
- ★ Wait node se "3 din baad" follow-up — server restart par bhi resume hota hai
- ★ Remove Duplicates (past executions) se same lead dobara process na ho

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Lead scoring + routing workflow: score ke hisaab se Sales Slack, nurture email ya archive.

📝 Homework

Do data sources ko Merge (by key) karke unified customer list banao.

- ☐ Homework ho gaya

BEGINNER
Budget 0 wale leads filter karo ☐

INTERMEDIATE
Round-robin: leads 3 sales reps mein baanto ☐

ADVANCED
Wait node + approval link se manager approval flow ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Agar lead ka source "referral" hai to score ke bawajood hamesha hot maano.

💡 Hint 1
Yeh logic Code node mein ek extra line se ho sakta hai.

💡 Hint 2
return se pehle: agar source referral hai to score ko 70 ya usse upar kar do.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. 5 alag categories ke liye best node?

- (A) Switch
- (B) Merge
- (C) Wait
- (D) IF

Q2. API 1 sec mein sirf 10 requests leti hai — kya use karein?

- (A) Loop Over Items + Wait
- (B) IF
- (C) Merge
- (D) Sort

Q3. Do sources ko customer ID se jodna?

- (A) Filter
- (B) Merge (by key/matching fields)
- (C) Aggregate
- (D) Split Out

Q4. IF node ke kitne outputs?

- (A) 3
- (B) Unlimited
- (C) 1
- (D) 2

📖 Aaj ke naye shabd

Node
Workflow ka ek dabba/step. Har node ek kaam karta hai (email bhejna, data laana…).

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

API
Do apps ke baat karne ka tareeka. Ek app sawaal bhejta hai, doosra jawab (data) deta hai.

IF Node
Haan/naa wala decision — condition sahi to ek raasta, galat to doosra.

Switch
Kai raaston mein se ek chunna — jaise traffic police kisi gaadi ko alag lane mein bhejta hai.

Merge
Do raaston ka data wapas ek jagah jodna.

Rate Limit
API ki speed limit — ek minute mein kitni requests allowed hain.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 6

Code Node: JavaScript for Automators

"Jahan node khatam, wahan Code node shuru."

☐ **Day 5 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → A
Switch

Q2 → A
Loop Over Items + Wait

Q3 → B
Merge (by key/matching fields)

Q4 → D
2

✅ Challenge ka solution

Score Lead code mein: if (b.source === 'referral') score = Math.max(score, 70);

`wa.me/919000000000?text=Day%205%20(Logic%20%26%20Flow%20Control%3A%20IF%2C%20Switch%2C%20Merge%2C%20Loop)%20mein%20doubt%20hai%3A%20`

🌐 Day 5 lesson page

Quiz, copy buttons, videos

`adifyskills.com/day/5`

DAY 06

Code Node: JavaScript for Automators

"Jahan node khatam, wahan Code node shuru."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Code node se student "no-code ki limit" tod deta hai. Thodi si JavaScript = unlimited power. AI se code likhwana bhi sikhaate hain.

🎯 Aaj ke baad aap yeh kar paoge

01 JavaScript essentials for n8n (no CS degree needed)

🌍 Recipe mein ingredients (variables), "agar namak kam ho to daalo" (if), "5 baar hilao" (loop).
⚙️ const total = $json.price * $json.qty; if (total > 1000) { ... }

02 Run once for all items vs each item

🌍 Poori class ki copies ek saath check vs har bachche ko alag bulana.
⚙️ All items: $input.all() · Each item: $json

03 Return format: [{ json: {...} }]

🌍 Courier ka fixed packing format — galat packing = reject.
⚙️ return [{ json: { total: 500 } }];

04 Array methods: map, filter, reduce

🌍 map = har aam ko kaatna, filter = kharab aam hatana, reduce = sabka juice ek glass mein.
⚙️ items.map(i => i.price), items.filter(i => i.qty > 0), items.reduce((s, i) => s + i.price, 0)

05 Using AI to write & debug Code node

🌍 Tuition teacher se homework samajhna — copy nahi, samajh ke likhna.
⚙️ Code node mein "Ask AI": "GST 18% add karo aur 2 decimal mein round karo".

06 Python in Code node — basics

🌍 Hindi aur English — dono se baat ho sakti hai.
⚙️ Python mode: for item in _input.all(): item.json["x"] = 1

⏱ Class ka plan (2 ghante)

10m	40m	40m	20m	10m

`0:00-0:10` **Recap**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:50` **Concept: JS Crash Course**

Variables, objects, loops — n8n context

🪄 Recipe likhna jaisa hai: pehle ingredients lo, phir step-by-step karo, end mein plate mein serve karo — yahi return hai.

0:50-1:30 **Live Build**
Invoice line-item calculator + GST
🪄 Aaj ki kahani yaad hai — 'Dukaan ka hisaab — calculator wala munshi'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Quiz + Challenge**
Module 2 quiz
🪄 Practice match — jitna yahan girenge, utna asli match mein kam girenge.

1:50-2:00 **Q&A + Homework**
🪄 Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Run once for all items
Saare items ek saath milte hain: $input.all()
🪄 **Analogy:** Poori class ki attendance ek baar mein

CONCEPT 02
Run once for each item
Har item par alag chalta hai: $json
🪄 **Analogy:** Har student se alag baat

CONCEPT 03
Return format
Hamesha array of {json: {...}} return karo.
🪄 **Analogy:** Packing format fixed hai

CONCEPT 04
map / filter / reduce
Arrays ke 3 superpowers — transform, chhaanto, jodo.
🪄 **Analogy:** Factory machines

🔑 Aaj ka main idea

Code node mein thoda JavaScript likh ke woh kaam karo jo 5–6 nodes mein hota. Bas 3 cheezein yaad rakho: data $input/$json se lo, map/filter/reduce se badlo, aur [{json: {...}}] return karo. AI se code likhwana bhi allowed hai — samajhna zaroori hai.

- map: har item ka price double karna
- filter: sirf 18+ age wale
- reduce: saare amounts ka total

📖 Ek kahani se samjho: Dukaan ka hisaab — calculator wala munshi

1 🧾 **Order list aayi** = Webhook
2 👨‍💻 **Munshi ne hisaab lagaya** = Code node
3 ➕ **Total + GST + discount** = reduce() / math
4 🏷️ **Bill number diya** = Edit Fields
5 ↩️ **Customer ko bill** = Respond to Webhook

🪄 Ek line mein: “Recipe likhna jaisa hai: pehle ingredients lo, phir step-by-step karo, end mein plate mein serve karo — yahi return hai.”

🗺️ Aaj ka workflow: GST Invoice Calculator (Code Node)

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Shops, small manufacturers (GST invoice calculator) — aam taur par **₹5,000 – ₹15,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Webhook**
Order aata hai with line items

2 👨‍💻 **Code**
Har item ka subtotal, discount, 18% GST, grand total

3 ✏️ **Edit Fields (Set)**
invoiceNo = "INV-" + $now.toFormat("yyMMdd") + random

4 ⚡ **Respond to Webhook**
Calculated invoice JSON return

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- ☐ Koi setup nahi — seedha Test karo!

✅ Test kaise karein

1. "Test workflow" dabao
2. "Calculate Invoice" output mein har line ka GST check karo
3. Last node mein "Download" se invoice.json lo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Calculator se har item jodna	10 min
GST alag nikaalna	5 min
Galti dobara check	5 min
	20 min

➜

⚡ Ab (n8n)

Code node 1 second mein

0 min

⏱ Har bill par 20 min bache, calculation galti zero.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
const o = $input.first().json;
const subtotal = o.items.reduce((s, i) => s + i.price * i.qty, 0);
const discount = subtotal * (o.discount / 100);
const gst = (subtotal - discount) * 0.18;
return [{ json: { subtotal, discount, gst: +gst.toFixed(2), total: +(subtotal - discount +
gst).toFixed(2) } }];
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "items": [
    {
      "name": "Course",
      "price": 9999,
      "qty": 1
    },
    {
      "name": "Templates",
      "price": 1999,
      "qty": 2
    }
  ],
  "discount": 10
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "subtotal": 13997,
  "discount": 1399.7,
  "gst": 2267.51,
  "total": 14864.81
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Order ke items se subtotal, discount, GST (CGST+SGST) aur grand total JavaScript se calculate karke ek formatted invoice JSON file banata hai.

Flow: Manual Trigger (Test run) → Code (Sample order) → Code (GST + discount + total) → Convert to File (invoice.json)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "GST Invoice Calculator (Code Node)" (nodes: Run Manually, Sample Order, Calculate Invoice, Make invoice.json).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
4 nodes · ready to import

adifyskills.com/day/6

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo

⚠️ Yeh galtiyan sabse common hain

! Object return karna array ki jagah
! "each item" mode mein $input.all() use karna
! Floating point rounding bhool jaana (toFixed)

⭐ Pro tips — time bachane wali tricks

★ Code node mein "Ask AI" se code generate karwao, phir samjho
★ console.log() output browser console mein dikhta hai
★ Complex logic ke liye pehle 5–6 nodes se banao, phir Code mein compress

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Order items se GST, discount aur total calculate karke formatted invoice JSON banana.

📝 Homework

3 tasks jo pehle 4–5 nodes mein hote the, unhe ek Code node mein likho.

☐ Homework ho gaya

BEGINNER
Naam ko uppercase karo Code se ☐

INTERMEDIATE
Duplicate emails Code se hatao ☐

ADVANCED
Indian number format (1,00,000) function likho ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Agar subtotal ₹2,000 se upar ho to free shipping, warna ₹99 shipping jodo.

💡 **Hint 1**
Grand total ke calculation mein ek naya variable banao.

💡 **Hint 2**
const shipping = subtotal > 2000 ? 0 : 99; — yeh ternary operator hai.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Code node ka sahi return?

- (A) "a"
- (B) true
- (C) {a: 1}
- (D) [{json: {a: 1}}]

Q2. Saare items kaise milte hain?

- (A) $input.all()
- (B) $items
- (C) $all
- (D) $json

Q3. Sum nikaalne ke liye array method?

- (A) map
- (B) filter
- (C) reduce
- (D) sort

Q4. Code node kin languages mein?

- (A) PHP
- (B) Sirf JS
- (C) JS + Python
- (D) Sirf Python

📖 Aaj ke naye shabd

Node
Workflow ka ek dabba/step. Har node ek kaam karta hai (email bhejna, data laana…).

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

JSON
Data likhne ka format: {"naam": "Ravi", "city": "Delhi"} — key aur value ke jode.

Item
Data ki ek row/record. n8n mein data items ki list ki tarah flow karta hai.

Code Node
Jahan aap JavaScript likh ke apna custom logic chala sakte ho.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 7

HTTP Request & REST APIs Mastery

"Agar API hai, toh n8n se connect ho sakta hai."

☐ **Day 6 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → D
[{ json: { a: 1 } }]

Q2 → A
$input.all()

Q3 → C
reduce

Q4 → C
JS + Python

✅ Challenge ka solution

Calculate Invoice mein: const shipping = sum('base') > 2000 ? 0 : 99; aur grand_total mein + shipping, output mein shipping field bhi do.

💬 Doubt poochho

WhatsApp par seedha message

wa.me/919000000000?text=Day%206%20(Code%20Node%3A%20JavaScript%20for%20Automators)%20mein%20doubt%20hai%3A%20

🌐 Day 6 lesson page

Quiz, copy buttons, videos

adifyskills.com/day/6

DAY 07

HTTP Request & REST APIs Mastery

"Agar API hai, toh n8n se connect ho sakta hai."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

HTTP Request node n8n ka "master key" hai. Jis app ka ready node nahi, uski API se bhi connect ho jaate hain.

🎯 Aaj ke baad aap yeh kar paoge

01 REST basics: GET, POST, PUT, DELETE

🌍 Library: kitaab lena (GET), nayi kitaab dena (POST), update (PUT), wapas karna (DELETE).
⚙️ GET /users, POST /leads, PUT /leads/12, DELETE /leads/12

02 Headers, query params, body (JSON/form)

🌍 Courier: lifafe par pata (URL), stamp (header), andar chitthi (body).
⚙️ Header: Authorization: Bearer KEY · Query: ?city=Pune · Body: { "name": "Aman" }

03 Reading API docs like a pro

🌍 Naye phone ka manual — pehle "Getting started", phir features.
⚙️ Docs mein dhoondho: Base URL, Authentication, Endpoints, Example request.

04 cURL import in HTTP Request node

🌍 Recipe ka photo bhej do, cook khud bana dega.
⚙️ Docs se cURL copy → HTTP node → "Import cURL" → sab fields bhar gayi.

05 Pagination & rate-limit handling

🌍 Kitaab ke 10 pages — ek-ek palatna; ek din mein limit.
⚙️ Pagination: page=1,2,3… · 429 aaye to Wait + retry.

06 Response parsing & error codes

🌍 Doctor ki report: normal (200), "mila nahi" (404), "pass nahi hai" (401).
⚙️ 200 OK · 400 bad input · 401 auth · 404 not found · 429 rate limit · 500 server

⏱ Class ka plan (2 ghante)

10m	35m	45m	20m	10m

`0:00-0:10` **Recap**

🪄 *Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.*

`0:10-0:45` **Concept: APIs**

Restaurant waiter analogy + live Postman demo

🪄 *Restaurant mein tum kitchen mein nahi jaate — waiter jaata hai. API waiter hai, n8n customer hai.*

`0:45-1:30` **Live Build**

Weather + news morning briefing bot

🪄 *Aaj ki kahani yaad hai — 'Restaurant ka waiter = API'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.*

1:30-1:50 **API Hunt**
Students pick a public API & integrate
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
API
Do software ke beech baat karne ka tareeka.
🪄 **Analogy:** Restaurant ka waiter — aap order dete ho, kitchen se khana laata hai

CONCEPT 02
HTTP methods
GET (lao), POST (banao), PUT/PATCH (update), DELETE (hatao).
🪄 **Analogy:** CRUD = Create Read Update Delete

CONCEPT 03
Headers & Auth
Request ke saath extra info — API key, content type.
🪄 **Analogy:** Building entry pass

CONCEPT 04
Pagination
API data pages mein deti hai — sab pages laane padte hain.
🪄 **Analogy:** Kitaab ke page palatna

🔑 Aaj ka main idea
API do software ke beech baat karne ka tareeka hai. Aap request bhejte ho (method + URL + headers + body), server response deta hai (JSON + status code). HTTP Request node se n8n kisi bhi API se baat kar sakta hai.

- Zomato app restaurant ki API se menu laata hai
- Weather app mausam ki API se temperature
- UPI app bank ki API se payment

📖 Ek kahani se samjho: Restaurant ka waiter = API

1 🧑 **Aap order dete ho** = HTTP Request (GET/POST)

2 👨‍🍳 **Waiter kitchen jaata hai** = API server

3 📜 **Menu card padha** = API docs

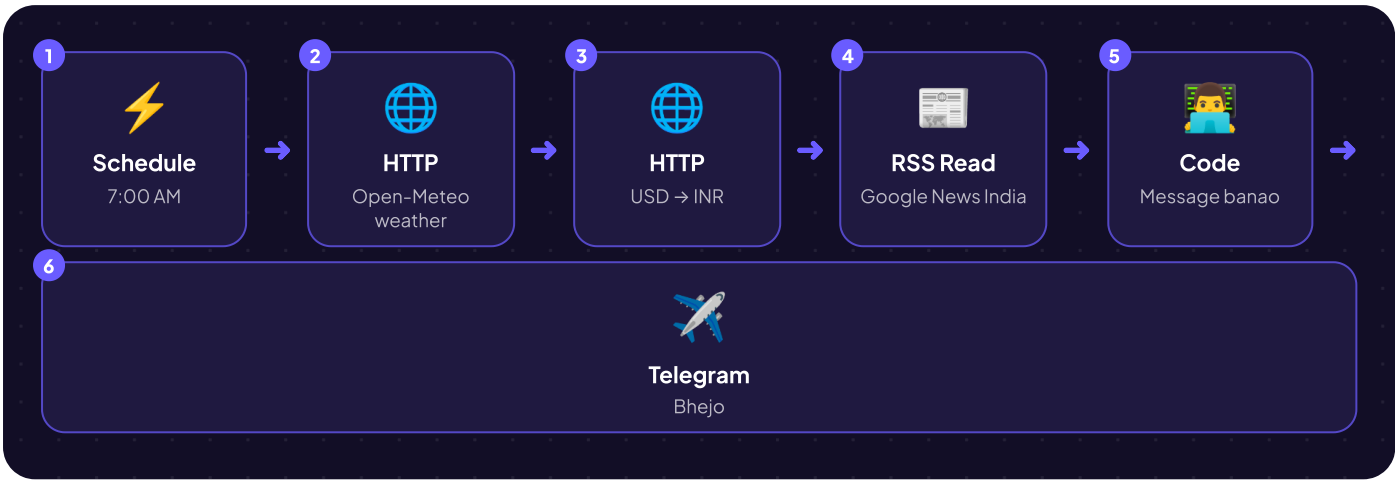

4 🍛 **Khana aaya** = JSON response

5 🤦 **"Aaj khatam" bola** = Error code (404/429)

🪄 Ek line mein: "Restaurant mein tum kitchen mein nahi jaate — waiter jaata hai. API waiter hai, n8n customer hai."

🗺️ Aaj ka workflow: Morning Briefing Bot (Weather + News + Currency)

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Founders, traders (morning briefing bot) — aam taur par **₹3,000 – ₹8,000 + ₹500/mahina**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Schedule Trigger**
Roz 7 AM

2 🌐 **HTTP Request**
Weather API (Open-Meteo, bina key) — city ke coordinates

3 🌐 **HTTP Request**
News API — top headlines

4 🔗 **Merge**
Weather + news combine

5 👨‍💻 **Code**
Sundar formatted message banao

6 ✈️ **Telegram**
Morning briefing bhejo

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Telegram bot token (BotFather se)**
- [ ] Apne shehar ke liye Weather URL mein latitude/longitude badlo

✅ Test kaise karein

1. "Test workflow" → Telegram check karo
2. Har HTTP node ka raw JSON dekho — data kahan se aa raha hai

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Weather app kholna	2 min
News app kholna	5 min
Family group par likhna	5 min
	12 min

⚡ Ab (n8n)

7 AM briefing Telegram par auto

0 min

⏱ Roz 12 min bache, family ko daily update.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
curl "https://api.open-meteo.com/v1/forecast?latitude=28.61&longitude=77.21&current=temperature_2m"
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "current": {
    "temperature_2m": 24.3,
    "wind_speed_10m": 8
  }
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "message": "☀️ Good morning! Delhi: 24°C\n📰 Top 3 news…"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Har subah 7 baje teen free APIs se data laata hai — Delhi ka mausam, top 3 news, USD→INR rate — aur ek saaf Telegram message bhejta hai. Koi API key nahi chahiye.

Flow: Schedule (7:00 AM) → HTTP (Open-Meteo weather) → HTTP (USD → INR) → RSS Read (Google News India) → Code (Message banao) → Telegram (Bhejo)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Morning Briefing Bot (Weather + News + Currency)" (nodes: Every Day 7 AM, Weather, Currency, Top News, Top 3, Build Message, Send Briefing).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
7 nodes · ready to import
adifyskills.com/workflows/day-07-morning-briefing-telegram.json

🌐 Lesson page
Copy buttons, quiz aur video links
adifyskills.com/day/7

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠ triangle?	Account connect nahi hua. Node kholo → Credential → "Telegram bot token (BotFather se)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.

⚠ Yeh galtiyan sabse common hain

- ! API key ko URL mein hardcode karna (credential use karo)
- ! 429 Too Many Requests ko ignore karna
- ! Response "file" hai aur JSON expect karna

⭐ Pro tips — time bachane wali tricks

- ★ API docs se cURL copy karo → HTTP node mein "Import cURL"
- ★ Settings → Retry on fail + wait 5s
- ★ Pagination option se automatic next pages

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Morning briefing: weather + top news + currency rate → ek formatted Telegram message.

📝 Homework

Koi bhi 2 public APIs integrate karo with pagination.

- ☐ Homework ho gaya

BEGINNER
Random joke API se joke laao ☐

INTERMEDIATE
Paginated API ke saare pages laao ☐

ADVANCED
Retry + exponential backoff Code se ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Briefing mein Delhi ki jagah apne shehar ka mausam dikhao aur ek "☔ Chhata le jao" line jodo agar baarish ho.

💡 Hint 1
Open-Meteo URL mein latitude/longitude badalte hain; Google par "<city> latitude longitude" search karo.

💡 Hint 2
URL mein &current= ke saath precipitation bhi maango, phir Code mein check karo > 0.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Data sirf padhne ke liye method?

- (A) PUT
- (B) POST
- (C) GET
- (D) DELETE

Q2. 429 error ka matlab?

- (A) Server down
- (B) Unauthorized
- (C) Not found
- (D) Rate limit exceeded

Q3. API docs se fastest setup?

- (A) Import cURL
- (B) Screenshot
- (C) Code node
- (D) Manually type

Q4. 401 error?

- (A) Auth problem
- (B) Success
- (C) Redirect
- (D) Timeout

📖 Aaj ke naye shabd

Node
Workflow ka ek dabba/step. Har node ek kaam karta hai (email bhejna, data laana…).

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

API
Do apps ke baat karne ka tareeka. Ek app sawaal bhejta hai, doosra jawab (data) deta hai.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

Merge
Do raaston ka data wapas ek jagah jodna.

HTTP Request
Node jo kisi bhi API ko call kar sakta hai — n8n ka universal connector.

Schedule
Fixed time par workflow chalana — roz, har ghante, har Monday.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 8

Authentication, Credentials & Webhooks

"Real-time apps banane ka secret: webhooks."

☐ **Day 7 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → C
GET

Q2 → D
Rate limit exceeded

Q3 → A
Import cURL

Q4 → A
Auth problem

✅ Challenge ka solution

URL: ...&current=temperature_2m,precipitation... Code: const rain = w.precipitation > 0 ? "\n☔ Chhata le jao!" : ""; text mein jod do.

📚 Official docs

- n8n api pagination ↗

💬 Doubt poochho

WhatsApp par seedha message

`wa.me/919000000000?text=Day%207%20(HTTP%20Request%20%26%20REST%20APIs%20Mastery)%20mein%20doubt%20hai%3A%20`

🌐 Day 7 lesson page

Quiz, copy buttons, videos

`adifyskills.com/day/7`

DAY 08

Authentication, Credentials & Webhooks

"Real-time apps banane ka secret: webhooks."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Webhooks se n8n ek "backend" ban jaata hai — website, app, payment gateway sab real-time mein n8n ko data bhej sakte hain.

🎯 Aaj ke baad aap yeh kar paoge

01 API keys, Bearer tokens, Basic auth

🌍 Gym card (API key), movie ticket (bearer token), ghar ki chaabi (basic auth: user+password).
⚙️ HTTP Request → Authentication: Header Auth → x-api-key: ••••

02 OAuth2 flow — Google, Microsoft, social apps

🌍 Valet parking key — gaadi chala sakta hai, dikki nahi khol sakta.
⚙️ Google OAuth2 credential → sirf Sheets scope.

03 n8n credential manager & sharing

🌍 Ghar ki chaabiyon ka ek locked box — family ko share.
⚙️ Credentials → New → ek baar banao, har workflow mein select.

04 Webhook node: test vs production URLs

🌍 Rehearsal ka stage vs asli show ka stage.
⚙️ /webhook-test/lead (sirf Listen mode) vs /webhook/lead (active).

05 Respond to Webhook — build your own API

🌍 Courier ko receipt dena.
⚙️ Respond to Webhook: 200 { "ok": true, "id": "lead_12" }

06 Webhook security: auth headers, HMAC verify

🌍 Note par watermark — asli hai ya nakli.
⚙️ Crypto node: HMAC-SHA256(body, secret) === header signature?

⏱ Class ka plan (2 ghante)

10m	35m	45m	20m	10m

`0:00-0:10` **Recap**

🪄 *Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.*

`0:10-0:45` **Concept: Auth & Webhooks**

Push vs pull

🪄 *Tumhare ghar ka pata (webhook) sabko pata hai, par andar sirf woh aa sakta hai jiske paas pass (auth) hai.*

`0:45-1:30` **Live Build**

Apna mini REST API: /lead endpoint with validation

🪄 *Aaj ki kahani yaad hai — 'Society gate aur security guard'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.*

1:30-1:50 **Challenge**
Secure the webhook with header auth
🪄 Practice match — jitna yahan girenge, utna asli match mein kam girenge.

1:50-2:00 **Q&A + Homework**
🪄 Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Webhook URL
Ek unique address jahan data POST hota hai.
🪄 **Analogy:** Aapka ghar ka pata — courier wahin aata hai

CONCEPT 02
Test vs Production URL
Test URL sirf "Listen" mode mein; production URL active workflow par.
🪄 **Analogy:** Rehearsal vs real show

CONCEPT 03
Respond to Webhook
Caller ko apna custom jawab bhejo — n8n ek API ban gaya.
🪄 **Analogy:** Courier ko signature dena

CONCEPT 04
OAuth2
Bina password diye app ko permission dena (Google, Microsoft).
🪄 **Analogy:** Valet parking key — sirf gaadi chalane ki permission

🔑 Aaj ka main idea

Authentication = "aap kaun ho" proof (API key, token, OAuth). Webhook = n8n ka public pata jahan apps data bhejte hain. Respond to Webhook se n8n wapas jawab deta hai — yaani n8n khud ek API ban jaata hai.

- API key = gym membership card
- OAuth = "Google se login karo" button
- Webhook = Swiggy restaurant ko order notification

📖 Ek kahani se samjho: Society gate aur security guard

1 🏠 **Ghar ka pata diya** = Webhook URL

2 💂 **Guard ID check karta hai** = Header Auth / HMAC

3 🗝️ **Valet ko sirf gaadi ki chaabi** = OAuth2 (limited permission)

4 📋 **Visitor register** = Google Sheets

5 ✅ **Guard bola "andar aao"** = Respond to Webhook

🪄 Ek line mein: “Tumhare ghar ka pata (webhook) sabko pata hai, par andar sirf woh aa sakta hai jiske paas pass (auth) hai.”

Aaj ka workflow: Website Form → Webhook Lead API

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Website owners, agencies (form → API → CRM) — aam taur par **₹8,000 – ₹20,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ Webhook
POST /lead, Authentication: Header Auth (x-api-key)

2 🔀 IF
name, phone, email present hain?

3 📊 Google Sheets
Valid lead append

4 📧 Gmail
Lead ko auto-reply

5 ⚡ Respond to Webhook
200 { ok: true, id } ya 400 { error }

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- ☐ Connect: **Google Sheets (Google OAuth)**
- ☐ Connect: **Gmail (Google OAuth)**
- ☐ Sheet mein "Website Leads" tab banao
- ☐ Production mein Webhook par Header Auth lagao (Authentication → Header Auth)

✅ Test kaise karein

1. Webhook → "Listen for test event"
2. Neeche curl chalao — valid aur invalid dono body se
3. Response code 200/400 check karo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Website form email mein aata	5 min
Manually Sheet mein	5 min
Customer ko reply	5 min
	15 min

➜

⚡ Ab (n8n)

Webhook → validate → Sheet → auto-reply → response

0 min

⏱ Har submission par 15 min bache, apna mini API ready.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
curl -X POST https://your-n8n.com/webhook/lead \
  -H "x-api-key: SECRET" -H "Content-Type: application/json" \
  -d '{"name":"Priya","phone":"9123456780"}'
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "name": "Priya",
  "phone": "9123456780",
  "email": "priya@mail.com"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "ok": true,
  "id": "lead_1043"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude — 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Apna mini API: website form POST karta hai, n8n validate karta hai, Sheet mein save karta hai,
customer ko auto-reply bhejta hai aur website ko JSON response deta hai (200 ya 400).

Flow: Webhook (POST /lead) → IF (Name + valid email?) → Google Sheets (Save) → Gmail (Auto-reply) →
Respond to Webhook (200 / 400 JSON)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to
test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "Website Form → Webhook Lead API" (nodes: POST /lead, Valid?, Save Lead,
Auto Reply, Respond 200, Respond 400).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.

adifyskills.com/day/8

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Test URL website par laga dena (workflow band hote hi fail)
- ! Respond to Webhook add kiya par Webhook ka "Respond" setting change nahi kiya
- ! Webhook ko bina auth public chhod dena

⭐ Pro tips — time bachane wali tricks

- ★ Postman / Hoppscotch se webhook test karo
- ★ HMAC signature verify ke liye Crypto node
- ★ Webhook path readable rakho: /lead, /payment-success

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋 Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Website form → n8n Webhook → validation → Sheet + auto-reply → JSON response.

📝 Homework

Google OAuth2 credential setup karo aur ek private Google Sheet read karo.

- ☐ Homework ho gaya

BEGINNER
Webhook se data Sheet mein ☐

INTERMEDIATE
Validation errors ki list return karo ☐

ADVANCED
Razorpay-style HMAC signature verify ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Webhook ko secure karo: bina sahi header ke request aaye to reject ho.

💡 Hint 1
Webhook node ki settings mein "Authentication" option hai.

💡 Hint 2
Header Auth chuno, credential mein Name: x-api-key, Value: koi secret.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Website par kaunsa URL lagana chahiye?

- (A) Test URL
- (B) Production URL
- (C) Koi bhi
- (D) Editor URL

Q2. Caller ko custom JSON dene ka node?

- (A) Code
- (B) HTTP Request
- (C) Respond to Webhook
- (D) Set

Q3. Google login ke liye auth type?

(A) None
(B) Header
(C) Basic
(D) OAuth2

Q4. Webhook secure karne ka simple tareeka?

(A) Long path
(B) Kuch nahi
(C) Capital letters
(D) Header Auth

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Node
Workflow ka ek dabba/step. Har node ek kaam karta hai (email bhejna, data laana…).

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

API
Do apps ke baat karne ka tareeka. Ek app sawaal bhejta hai, doosra jawab (data) deta hai.

Credential
Kisi app ka login/API key jo n8n safe tareeke se yaad rakhta hai.

OAuth
Login ka safe tareeka — "Sign in with Google" jaisa, password share kiye bina.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 9

Google Workspace & Messaging Automation

"Gmail, Sheets, Drive, Calendar + WhatsApp, Telegram, Slack."

☐ **Day 8 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → B
Production URL

Q2 → C
Respond to Webhook

Q3 → D
OAuth2

Q4 → D
Header Auth

✅ Challenge ka solution

Webhook → Authentication: Header Auth → credential (x-api-key = mySecret123). curl mein -H "x-api-key: mySecret123" bhejo.

DAY 09

Google Workspace & Messaging Automation

"Gmail, Sheets, Drive, Calendar + WhatsApp, Telegram, Slack."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Indian businesses Google Workspace + WhatsApp/Telegram par chalte hain. Yeh class sabse zyada "turant paisa" wali skills deti hai.

🎯 Aaj ke baad aap yeh kar paoge

01 Google Sheets as a database: lookup, upsert

🌍 Attendance register: naam dhoondho (lookup), hai to tick, nahi to naya naam (upsert).
⚙️ Sheets → "Append or Update Row", match column = phone.

02 Gmail: read, label, auto-reply, attachments

🌍 Personal assistant jo inbox padhe, label lagaye, jawab de.
⚙️ Gmail Trigger (has:attachment) → label "Invoices" → reply.

03 Google Drive & Docs: file automation

🌍 Office almirah mein month-wise files.
⚙️ Drive: folder "Invoices/2026-12" create → file upload.

04 Google Calendar: booking automation

🌍 Doctor ki appointment diary.
⚙️ Calendar: Get availability → Create event (start, end, attendee).

05 Telegram bot from scratch

🌍 Apna chhota employee jo chat par jawab de.
⚙️ @BotFather → token → Telegram Trigger + Telegram Send.

06 Slack & WhatsApp Business (Cloud API) messaging

🌍 Office group (Slack) aur customer ka official WhatsApp.
⚙️ Slack #sales message · WhatsApp template "order_confirmed".

⏱ Class ka plan (2 ghante)

10m	30m	50m	20m	10m

`0:00-0:10` **Recap**

🪄 *Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.*

`0:10-0:40` **Concept: Workspace APIs**

Scopes & quotas

🪄 *Socho tumhare paas ek robot hai jo tumhari diary (Calendar), register (Sheet), aur phone (Telegram) sab sambhaal leta hai.*

`0:40-1:30` **Live Build**
Appointment booking bot: Telegram → Calendar → Sheet → reminder
🪄 Aaj ki kahani yaad hai — 'Clinic ka smart receptionist bot'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

`1:30-1:50` **Challenge**
Gmail attachment → Drive auto-sorter
🪄 Practice match — jitna yahan girenge, utna asli match mein kam girenge.

`1:50-2:00` **Q&A + Homework**
🪄 Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Sheets as database
Lookup, append, update, upsert (row match karke update ya naya).
🪄 **Analogy:** Register book

CONCEPT 02
Gmail automation
Read, label, reply, attachments download.
🪄 **Analogy:** Personal assistant jo inbox sambhaale

CONCEPT 03
Telegram Bot
@BotFather se token, phir n8n se messages/buttons.
🪄 **Analogy:** Apna khud ka chatbot employee

CONCEPT 04
WhatsApp Cloud API
Meta Business se — template messages, 24-hr window rule.
🪄 **Analogy:** Official business WhatsApp

🔑 Aaj ka main idea
Google Workspace (Sheets, Gmail, Drive, Calendar) aur messaging apps (Telegram, WhatsApp, Slack) — yahi Indian businesses ke daily tools hain. In sab ke n8n nodes ready hain; bas credential connect karo aur operation chuno.

- Sheets = digital register
- Gmail labels = almirah ke folders
- Telegram bot = 24×7 receptionist

📖 Ek kahani se samjho: Clinic ka smart receptionist bot

1 📱 **Patient ne Telegram kiya "/book"**
= Telegram Trigger

2 📅 **Free slots check**
= Google Calendar

3 🔘 **Buttons mein slots bheje**
= Telegram (inline keyboard)

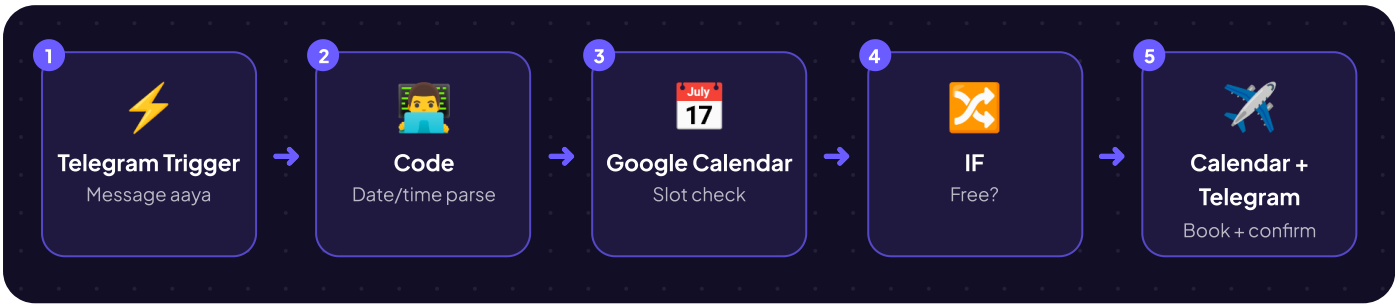

4 ✅ **Slot book**
= Calendar create event

5 ⏰ **1 ghanta pehle reminder**
= Wait + Telegram

🪄 Ek line mein: “Socho tumhare paas ek robot hai jo tumhari diary (Calendar), register (Sheet), aur phone (Telegram) sab sambhaal leta hai.”

🗺️ Aaj ka workflow: Telegram Appointment Booking Bot

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Doctors, salons, consultants (appointment bot) — aam taur par **₹10,000 – ₹30,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1. ⚡ **Telegram Trigger**
   User likhta hai "/book"
2. 📅 **Google Calendar**
   Agle 3 din ke free slots check
3. ✈️ **Telegram**
   Slots ko inline buttons mein bhejo
4. 📅 **Google Calendar**
   Selected slot par event create
5. 📊 **Google Sheets**
   Booking log
6. ⏳ **Wait**
   1 ghanta pehle tak ruko → reminder bhejo

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Telegram bot token (BotFather se)**
- [ ] Connect: **Google Calendar (Google OAuth)**
- [ ] @BotFather se naya bot banao aur token Telegram credential mein daalo
- [ ] Workflow Active karo (Telegram trigger ko public URL chahiye)

✅ Test kaise karein

1. Bot ko "hi" bhejo → help message aana chahiye
2. "book <kal ki date> 16:00" bhejo → Calendar check karo
3. Same slot dobara book karo → busy reply

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😫 Pehle (manual)

Phone uthana, slots dekhna	5 min
Diary mein likhna	2 min
Reminder call	3 min
	10 min

⚡ Ab (n8n)

Bot 24×7 booking + reminder

0 min

⏱ Har appointment par 10 min, aur no-shows kam.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
{{ $json.message.chat.id }}  // Telegram reply ke liye chat ID
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "message": {
    "chat": {
      "id": 55501
    },
    "text": "/book"
  }
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "booked": "2026-12-03T17:00:00+05:30",
  "reminder": "scheduled"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Customer Telegram par likhta hai "book 2026-12-05 16:00". Bot Google Calendar mein slot check karta hai — khaali ho to 30 min ki meeting book karke confirm karta hai, warna busy bata deta hai.

Flow: Telegram Trigger (Message aaya) → Code (Date/time parse) → Google Calendar (Slot check) → IF (Free?) → Calendar + Telegram (Book + confirm)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Telegram Appointment Booking Bot" (nodes: Telegram Message, Parse Request, Format OK?, Check Slot, Slot Free?, Book Meeting, Confirm, Busy Reply, Help Reply).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
9 nodes · ready to import
adifyskills.com/workflows/day-09-telegram-appointment-bot.json

🌐 Lesson page
Copy buttons, quiz aur video links
adifyskills.com/day/9

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Telegram bot token (BotFather se)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Calendar (Google OAuth)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.

⚠️ Yeh galtiyan sabse common hain

- ! Google Sheet ka "Range" galat — header row ignore ho jaata hai
- ! WhatsApp par 24 ghante ke baad free-text bhejna (template chahiye)
- ! Calendar timezone set na karna

⭐ Pro tips — time bachane wali tricks

- ★ Sheets mein "Append or Update" se duplicates se bacho
- ★ Gmail filters (from:, has:attachment) trigger mein lagao
- ★ Telegram mein Markdown/HTML parse mode se formatting

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Telegram appointment bot jo slots check kare, Calendar mein book kare aur reminder bheje.

📝 Homework

Gmail inbox ke invoices ko automatically Drive folder (month-wise) mein save karo.

- ☐ Homework ho gaya

BEGINNER
Gmail attachment → Drive ☐

INTERMEDIATE
Telegram se Sheet mein expense log ☐

ADVANCED
WhatsApp template + button reply flow ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Booking confirm hone ke baad meeting se 1 ghanta pehle reminder bhejo.

💡 Hint 1
Ek node hai jo kisi specific time tak ruk sakta hai.

💡 Hint 2
Wait node → Resume: "At Specified Time" → meeting start se 1 ghanta pehle ka time.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Telegram bot token kahan se?

(A) @BotFather
(B) n8n
(C) Meta
(D) Google

Q2. Row exist kare to update, warna add?

(A) Append
(B) Append or Update (upsert)
(C) Delete
(D) Clear

Q3. WhatsApp par 24 hr baad message?

(A) Email
(B) Free text
(C) Approved template
(D) Nahi ho sakta

Q4. Gmail attachments ka data?

(A) headers
(B) labels
(C) json
(D) binary

📖 Aaj ke naye shabd

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

API
Do apps ke baat karne ka tareeka. Ek app sawaal bhejta hai, doosra jawab (data) deta hai.

Token
AI ke liye text ka chhota tukda. AI ka bill tokens se banta hai.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 10

Databases: Postgres, Supabase, Airtable & Notion

"Sheets se aage — real databases ke saath scale karo."

☐ **Day 9 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → A
@BotFather

Q2 → B
Append or Update (upsert)

Q3 → C
Approved template

Q4 → D
binary

✅ Challenge ka solution

Confirm ke baad Wait (At Specified Time): {{ DateTime.fromISO($('Parse Request').item.json.start).minus({ hours: 1 }).toISO() }} → Telegram reminder.

DAY 10

Databases: Postgres, Supabase, Airtable & Notion

"Sheets se aage — real databases ke saath scale karo."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Sheets 10,000 rows ke baad slow ho jaati hain. Real clients ko real database chahiye — Postgres/Supabase.

🎯 Aaj ke baad aap yeh kar paoge

01 SQL basics: SELECT, INSERT, UPDATE, JOIN

🌍 Librarian se: "Delhi wale saare students do" (SELECT), "naya student jodo" (INSERT).
⚙️ SELECT name, phone FROM leads WHERE city = 'Delhi';

02 Postgres/MySQL nodes & Supabase

🌍 Bank ka main computer system.
⚙️ Postgres node → Execute Query / Insert / Upsert; Supabase node → rows CRUD.

03 Airtable & Notion as no-code databases

🌍 Sundar register (Airtable), digital diary (Notion).
⚙️ Airtable → Create record; Notion → Database page create.

04 Upsert patterns & deduplication

🌍 Contact list mein same number do baar save na ho.
⚙️ ON CONFLICT (email) DO UPDATE … / Remove Duplicates node.

05 n8n Data Tables (built-in storage)

🌍 Ghar mein chhota locker — bahar jaane ki zarurat nahi.
⚙️ n8n Data Tables: chhote projects ka built-in storage.

06 Choosing the right DB for a client

🌍 Chhote kaam ke liye cycle, bade ke liye truck.
⚙️ < 5k rows + non-tech → Airtable; app backend / scale → Postgres/Supabase.

⏱ Class ka plan (2 ghante)

10m	35m	45m	20m	10m

`0:00-0:10` **Recap**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:45` **Concept: Databases**

Sheets vs Airtable vs Postgres

🪄 Notebook mein 10 naam dhoondhna easy, 10,000 mein mushkil. Database ek super-fast librarian hai.

`0:45-1:30` **Live Build**

Mini CRM on Supabase with n8n API layer

🪄 Aaj ki kahani yaad hai — 'Library aur smart librarian'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Quiz + Challenge**
Module 3 quiz
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Table, row, column
Database = Excel jaisa par fast aur reliable.
🪄 **Analogy:** Library ki almirah aur shelves

CONCEPT 02
SQL basics
SELECT * FROM leads WHERE city = 'Delhi'
🪄 **Analogy:** Librarian se sawaal poochna

CONCEPT 03
Upsert
Unique key (email) match → update, warna insert.
🪄 **Analogy:** Attendance: naam hai to tick, nahi to naya naam

CONCEPT 04
No-code DBs
Airtable/Notion — non-tech clients ke liye easy UI.
🪄 **Analogy:** Ready-made furniture

🔑 Aaj ka main idea
Jab data bada ho jaata hai (hazaaron rows), Sheets slow aur risky ho jaati hain. Database (Postgres/Supabase) fast, safe aur multi-user hai. Airtable/Notion beech ka raasta hain — non-tech client ke liye easy UI.

- Sheets = notebook, Database = bank ka ledger system
- Airtable = sundar register jismein filters
- Upsert = attendance: naam hai to tick, nahi to add

📖 Ek kahani se samjho: Library aur smart librarian

1 📚 **Library = database**
= Postgres / Supabase

2 🗂️ **Almirah = table**
= leads table

3 📖 **Kitaab = row**
= Ek lead record

4 🙋 **Librarian se sawaal**
= SQL SELECT

5 🔁 **Kitaab hai to update, nahi to nayi**
= Upsert

🪄 Ek line mein: “Notebook mein 10 naam dhoondhna easy, 10,000 mein mushkil. Database ek super-fast librarian hai.”

🗺️ Aaj ka workflow: Supabase Leads API (Create / Update / Search)

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Startups (mini backend / leads API) — aam taur par **₹15,000 – ₹40,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Webhook**
POST /crm/lead

2 🗄️ **Supabase**
Upsert into leads (email unique)

3 ⚡ **Webhook**
GET /crm/search?city=

4 🗄️ **Postgres**
SELECT name, phone FROM leads WHERE city = $1

5 ⚡ **Respond to Webhook**
Results JSON

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- ☐ Connect: **Supabase (project URL + service key)**
- ☐ Supabase SQL editor mein yeh chalao: create table leads (id bigint generated always as identity primary key, name text, email text unique, status text default 'new', created_at timestamptz default now());

✅ Test kaise karein

1. curl se action=create bhejo, phir search, phir update
2. Supabase Table Editor mein data dekho

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

10,000 rows ki slow Sheet	10 min
Duplicate dhoondhna	20 min
	30 min

➜

⚡ Ab (n8n)

DB mein fast search + auto dedupe

0 min

⏱ Search seconds mein, duplicates automatic band.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
INSERT INTO leads (email, name, city) VALUES ($1, $2, $3)
ON CONFLICT (email) DO UPDATE SET name = EXCLUDED.name, city = EXCLUDED.city;
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "email": "raj@mail.com",
  "name": "Raj",
  "city": "Jaipur"
}
```

📤 Output — 📋 Select karke copy karo

```
[
  {
    "name": "Raj",
    "phone": "9000011111",
    "city": "Jaipur"
  }
]
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude — 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Ek hi webhook se teen kaam: action = create, update ya search. Data Supabase (Postgres) table mein jaata hai aur API JSON lautati hai — apna chhota backend bina server ke.

Flow: Webhook (POST /leads-api) → Switch (action?) → Supabase (create / update / search) → Respond (JSON result)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "Supabase Leads API (Create / Update / Search)" (nodes: POST /leads-api,
Which Action?, Create Lead, Update Status, Search Leads, Respond).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
6 nodes · ready to import
`adifyskills.com/workflows/day-10-supabase-leads-api.json`

🌐 Lesson page
Copy buttons, quiz aur video links
`adifyskills.com/day/10`

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Supabase (project URL + service key)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.

⚠️ Yeh galtiyan sabse common hain

- ! SQL mein user input seedha jodna (SQL injection) — query parameters use karo
- ! Unique constraint ke bina upsert
- ! Supabase service key ko frontend mein expose karna

⭐ Pro tips — time bachane wali tricks

- ★ n8n Data Tables chhote projects ke liye built-in storage
- ★ Index lagao frequently searched columns par
- ★ Client ke liye Airtable interface bana do — woh khud data dekh sake

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Supabase mein leads table + n8n se create/update/search endpoints.

📝 Homework

Notion content calendar ko Airtable ke saath 2-way sync karo.

- [ ] Homework ho gaya

BEGINNER
Airtable mein record add

INTERMEDIATE
Notion ↔ Airtable sync

ADVANCED
Paginated search API with LIMIT/OFFSET

🧩 Aaj ka challenge — pehle khud try karo

🎯 Same email se dobara "create" aaye to error ki jagah "already exists" message lautao.

💡 Hint 1
Pehle search karo, phir decide karo create karna hai ya nahi.

💡 Hint 2
Create se pehle Supabase getAll (filter email=eq.X) + IF "item mila?"

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Data padhne ka SQL command?

(A) DROP
(B) UPDATE
(C) INSERT
(D) SELECT

Q2. SQL injection se bachne ke liye?

(A) Capital letters
(B) Long query
(C) Comments
(D) Query parameters

Q3. Non-tech client ke liye easy DB?

- (A) Postgres CLI
- (B) Airtable
- (C) Redis
- (D) MongoDB shell

Q4. Upsert ka matlab?

- (A) Backup
- (B) Delete+insert
- (C) Update ya insert
- (D) Sirf insert

📖 Aaj ke naye shabd

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

CRM
Customers aur leads ka record rakhne ka system.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 11

Lead Generation & CRM Automation

"Har lead, har baar, 60 seconds ke andar follow-up."

☐ **Day 10 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → D
SELECT

Q2 → D
Query parameters

Q3 → B
Airtable

Q4 → C
Update ya insert

✅ Challenge ka solution

Which Action? (create) → Supabase getAll (email=eq.{{ $json.body.email }}, Always Output Data on) → IF {{ $json.id }} exists → Respond "already exists", warna Create Lead.

📚 Official docs

🌐 Day 10 lesson page

Quiz, copy buttons, videos

`adifyskills.com/day/10`

DAY 11

Lead Generation & CRM Automation

"Har lead, har baar, 60 seconds ke andar follow-up."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Research kehti hai: 5 minute ke andar contact = kai guna zyada conversion. Lead engine sabse zyada bikne wali automation hai.

🎯 Aaj ke baad aap yeh kar paoge

01 Lead sources: forms, Meta lead ads, website, WhatsApp

🌍 Dukaan mein customer 4 darwazon se aate hain — ad, website, WhatsApp, referral.
⚙️ Facebook Lead Ads Trigger, Webhook, n8n Form, WhatsApp Trigger.

02 Enrichment: company, LinkedIn, email verification

🌍 Visiting card ke peeche notes: company, designation.
⚙️ HTTP → enrichment/verify API → company_size, email_valid.

03 CRM sync: HubSpot, Zoho, Pipedrive

🌍 Customer ki file ek almirah (CRM) mein.
⚙️ HubSpot: Create or update contact (email) + deal stage "New".

04 Lead scoring & assignment (round-robin)

🌍 Exam marks se rank; kaam 3 salesmen mein barabar.
⚙️ Score = budget + urgency; round-robin: index % 3.

05 Automated follow-up sequences

🌍 Dheere-dheere paani dena (drip irrigation).
⚙️ Day 0 WhatsApp → Wait 1d → email → Wait 2d → WhatsApp.

06 Speed-to-lead dashboards

🌍 Dukaan ka scoreboard: aaj kitne customer, kitne jaldi attend.
⚙️ Sheet mein lead_time aur reply_time → daily average report.

⏱ Class ka plan (2 ghante)

10m	30m	50m	20m	10m

`0:00-0:10` **Recap**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:40` **Concept: Sales Funnel Automation**

🪄 Do dukaan: ek turant chai deti hai, doosri 1 ghanta baad. Customer kahan jaayega? Automation tumhe pehli dukaan banata hai.

`0:40-1:30` **Live Build**

Meta Lead Ad → enrich → CRM → WhatsApp + email follow-up

🪄 Aaj ki kahani yaad hai — 'Garam samose ki dukaan — speed sab kuch'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Client Simulation**
Requirement call role-play
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Speed-to-lead
Lead aate hi seconds mein response.
🪄 **Analogy:** Garam roti turant serve karna

CONCEPT 02
Enrichment
Email/company se extra info (company size, LinkedIn).
🪄 **Analogy:** Visiting card ke peeche notes

CONCEPT 03
Lead scoring
Points system se priority.
🪄 **Analogy:** Exam marks

CONCEPT 04
Drip sequence
Day 0, 1, 3, 7 par automatic follow-ups.
🪄 **Analogy:** Dheere-dheere paani dena (drip irrigation)

🔑 Aaj ka main idea

Sales funnel = Lead aaya → saaf kiya → jaankari badhayi → score diya → CRM mein → turant contact → follow-ups. Jo business pehle reply karta hai, wahi jeet-ta hai. Automation yeh speed deta hai.

- Gym enquiry par 1 min mein WhatsApp vs agle din call
- Real estate lead ko site-visit link turant
- Coaching enquiry → demo class booking link

📖 Ek kahani se samjho: Garam samose ki dukaan — speed sab kuch

1 📣 **Ad dekh ke customer aaya**
= Facebook Lead Ads Trigger

2 🧽 **Naam-number saaf kiya**
= Edit Fields

3 🔍 **Customer ki jaankari**
= Enrichment (HTTP)

4 🖨️ **Register mein entry**
= HubSpot CRM

5 💬 **Turant "Namaste!" WhatsApp**
= WhatsApp Cloud

6 📅 **1 aur 3 din baad yaad dilaya**
= Wait + follow-ups

🪄 Ek line mein: “Do dukaan: ek turant chai deti hai, doosri 1 ghanta baad. Customer kahan jaayega? Automation tumhe pehli dukaan banata hai.”

🗺️ Aaj ka workflow: Complete Lead Engine + 3-Day Drip

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Real estate, education, insurance (lead engine + drip) — aam taur par **₹20,000 – ₹60,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Facebook Lead Ads Trigger**
Naya lead form submission

2 ✏️ **Edit Fields (Set)**
Clean name/phone, source = meta-ads

3 🌐 **HTTP Request**
Email verification / enrichment API

4 📇 **HubSpot**
Contact create/update + deal stage

5 💬 **WhatsApp Business Cloud**
Instant template message

6 ⏳ **Wait**
1 din → follow-up email, 3 din → second follow-up

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] Connect: **WhatsApp Business Cloud (Meta token)**
- [ ] Connect: **Gmail (Google OAuth)**
- [ ] "CRM" tab headers: name, email, phone, company, budget, score, stage, created
- [ ] WhatsApp Cloud API ka Phone Number ID Meta developer dashboard se lo (ya WhatsApp node hata ke Telegram lagao)
- [ ] Testing ke liye Wait ko 1 minute kar lo

✅ Test kaise karein

1. Form bharo → CRM row + WhatsApp + Day 0 email check karo
2. Executions mein "Waiting" status dekho

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😫 Pehle (manual)

Leads Excel download	10 min
Har lead ko call/WhatsApp	60 min
Follow-up bhool jaana	
	70 min

➜

⚡ Ab (n8n)

60 second mein WhatsApp + CRM

Drip auto

0 min

⏱ Roz 70 min bache, conversion badha kyunki reply turant.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
{{ $json.phone_number.replace(/\D/g, "").slice(-10) }}
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "full_name": "Karan Mehta",
  "phone_number": "+919812345678",
  "email": "karan@startup.in",
  "city": "Indore"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "hubspotId": 88123,
  "whatsapp": "sent",
  "drip": "day1 scheduled"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Form se lead aata hai → score banta hai → Google Sheet CRM mein add/update → turant WhatsApp → Day 0, Day 1, Day 3 par follow-up emails. Speed-to-lead + nurture ek saath.

Flow: Form (Lead capture) → Code (Score) → Sheets CRM (Add / update) → WhatsApp (Instant hello) → Gmail + Wait (Day 0 → 1 → 3 drip)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Complete Lead Engine + 3-Day Drip" (nodes: Lead Form, Score, CRM Sheet, WhatsApp Hello, Day 0 Email, Wait 1 Day, Day 1 Email, Wait 2 Days, Day 3 Email).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
9 nodes · ready to import
`adifyskills.com/workflows/day-11-lead-engine-drip.json`

🌐 Lesson page
Copy buttons, quiz aur video links
`adifyskills.com/day/11`

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "WhatsApp Business Cloud (Meta token)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Lead ka consent/opt-out ignore karna
- ! Duplicate contacts CRM mein
- ! Follow-up tab bhi chalna jab lead already reply kar chuka ho

⭐ Pro tips — time bachane wali tricks

- ★ Drip ke har step se pehle CRM status check karo
- ★ Sales rep ko Slack/Telegram par lead card bhejo
- ★ Har lead par source + campaign UTM save karo

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Complete lead engine: capture → enrich → score → CRM → instant WhatsApp → 3-day email drip.

📝 Homework

Apne local business (gym/clinic/coaching) ke liye lead workflow design + build karo.

- ☐ Homework ho gaya

BEGINNER
Form → Sheet → WhatsApp

INTERMEDIATE
Round-robin sales assignment

ADVANCED
Reply aane par drip stop (webhook from WhatsApp)

🧩 Aaj ka challenge — pehle khud try karo

🎯 Agar lead ka stage "hot" hai to drip emails mat bhejo, seedha sales team ko Slack/Telegram karo.

💡 **Hint 1**
CRM Sheet ke baad ek decision node chahiye.

💡 **Hint 2**
IF {{ $json.stage }} equals hot → true branch Telegram, false branch Day 0 Email.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Lead ko extra info se bharna kya kehlaata hai?

- (A) Parsing
- (B) Scoring
- (C) Enrichment
- (D) Routing

Q2. Follow-up delay ke liye node?

- (A) Merge
- (B) Sort
- (C) Wait
- (D) IF

Q3. Duplicate contacts se bachne ke liye?

- (A) Har baar create
- (B) Delete all
- (C) Kuch nahi
- (D) Upsert by email/phone

Q4. Speed-to-lead kyun zaroori?

- (A) Fun ke liye
- (B) Conversion badhta hai
- (C) Cost badhta hai
- (D) Rule hai

📖 Aaj ke naye shabd

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

API
Do apps ke baat karne ka tareeka. Ek app sawaal bhejta hai, doosra jawab (data) deta hai.

CRM
Customers aur leads ka record rakhne ka system.

HTTP Request
Node jo kisi bhi API ko call kar sakta hai — n8n ka universal connector.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 12

Marketing & Social Media Automation

“Ek baar likho, har platform par publish.”

☐ **Day 11 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → C
Enrichment

Q2 → C
Wait

Q3 → D
Upsert by email/phone

Q4 → B
Conversion badhta hai

✅ Challenge ka solution

CRM Sheet → IF (stage = hot) → true: Telegram 'Hot lead!' / false: Day 0 Email → Wait... (purana flow).

Quiz, copy buttons, videos

`adifyskills.com/day/11`

DAY 12

Marketing & Social Media Automation

"Ek baar likho, har platform par publish."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Har brand ko roz content chahiye. Ek content pipeline = agency ka recurring retainer.

🎯 Aaj ke baad aap yeh kar paoge

01 Content repurposing pipelines

🌍 Ek kahani — dost ko short, dadi ko detail mein.
⚙️ RSS → AI (JSON: linkedin, thread, newsletter) → har platform.

02 Auto-posting: LinkedIn, X, Instagram, Facebook

🌍 Ek letter kai logon ko post karna.
⚙️ LinkedIn node, X node, Facebook Graph API — schedule time ke saath.

03 YouTube & RSS monitoring

🌍 Favourite channel ki bell icon.
⚙️ YouTube RSS feed → naya video → caption draft.

04 Email marketing: Mailchimp, Brevo

🌍 Society ka notice board — sabko ek saath message.
⚙️ Mailchimp/Brevo: add subscriber + tag, campaign send.

05 UTM tracking & campaign reports

🌍 Customer se poochna "humare baare mein kahan se suna?"
⚙️ Link? utm_source=linkedin&utm_campaign=dec_launch → Sheet report.

06 Competitor & keyword monitoring

🌍 Padosi dukaan ke offers par nazar.
⚙️ Competitor RSS/website HTML → naya offer → Telegram alert.

⏱️ Class ka plan (2 ghante)

10m	30m	50m	20m	10m

`0:00-0:10` **Recap**

🪄 *Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.*

`0:10-0:40` **Concept: Content Ops**

🪄 *Ek kahani ko tum dost ko short mein, dadi ko detail mein, aur teacher ko formally sunaate ho — yahi repurposing hai.*

`0:40-1:30` **Live Build**

Blog RSS → AI summary → LinkedIn + X + newsletter

🪄 *Aaj ki kahani yaad hai — 'Ek dal se paanch dishes'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.*

1:30-1:50 **Challenge**

YouTube new video → Instagram caption draft

🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**

🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

Repurposing

Ek content → kai formats (post, thread, reel script).

🪄 **Analogy:** Ek dal se 5 dishes

CONCEPT 02

Brand voice prompt

AI ko brand ka tone sikhaana.

🪄 **Analogy:** Naye employee ki training

CONCEPT 03

Approval loop

Publish se pehle human approve kare.

🪄 **Analogy:** Editor ki final sign-off

CONCEPT 04

UTM tracking

Har link par source/medium/campaign tag.

🪄 **Analogy:** Kaunse darwaze se customer aaya

🔑 Aaj ka main idea

Content ops = content banana, alag formats mein badalna, approve karna, publish karna aur performance track karna — ek pipeline mein. AI drafts banata hai, insaan approve karta hai.

- YouTube video → reel script + blog + tweet
- Product launch → email + WhatsApp + Instagram
- Weekly newsletter auto from best posts

📖 Ek kahani se samjho: Ek dal se paanch dishes

1

Naya blog post aaya
= RSS Feed Trigger

2

Dal = original content
= HTTP (full article)

3

Chef ne 5 dishes banayi
= AI: LinkedIn, X, newsletter…

4

Maalik ne taste kiya
= Slack approval

5

Serve kiya
= Publish + schedule

🪄 Ek line mein: “Ek kahani ko tum dost ko short mein, dadi ko detail mein, aur teacher ko formally sunaate ho — yahi repurposing hai.”

🗺️ Aaj ka workflow: AI Content Repurposing Engine

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Creators, marketing agencies (content repurposing) — aam taur par **₹10,000 – ₹30,000 + retainer**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **RSS Feed Trigger**
Apne blog ka naya post

2 🌐 **HTTP Request**
Post ka full content fetch

3 🧠 **Basic LLM Chain**
LinkedIn post + X thread + newsletter blurb (JSON output)

4 💼 **Slack**
Approval message with Approve/Reject

5 ⏳ **Wait**
Approval webhook tak ruko

6 💼 **LinkedIn**
Approved post publish

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **OpenAI API key**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] RSS URL ko apne blog ke feed se badlo
- [ ] "Content Queue" tab headers: title, link, linkedin, x_thread, instagram, newsletter, whatsapp, status

✅ Test kaise karein

1. RSS trigger par "Fetch test event" dabao
2. AI output JSON check karo
3. Sheet mein row aayi?

Pehle vs Ab — farak dekho

⚖️ Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Blog padh ke har platform ka post likhna	90 min
Har jagah post karna	20 min
	110 min

➜

⚡ Ab (n8n)

AI drafts + 1-click approve	5 min
	5 min

⏱ Har post par ~1.5 ghante bache.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
You are {{brand}}'s social media writer. Tone: friendly Hinglish. Return JSON {"linkedin":"","thread":[],"newsletter":""}
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "title": "5 automations every clinic needs",
  "link": "https://blog.example.com/clinic-automation"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "linkedin": "🏥 Clinic owners, 5 automations…",
  "thread": [
    "1/ …",
    "2/ …"
  ],
  "status": "published"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Repurposing prompt (workflow ke andar) — 📋 Select karke copy karo

```
Tum ek senior social media writer ho. Neeche diye blog post ko 5 formats mein badlo. Tone: friendly, simple Hinglish, emojis kam.

Title: {{title}}
Summary: {{summary}}
Link: {{link}}

Rules:
- linkedin: 120-180 words, hook line se shuru, 3 bullet takeaways, end mein sawaal
- x_thread: 4 tweets ka array, har tweet 260 characters se kam
- instagram: caption + 8 hashtags
- newsletter: 80 words ka para + CTA
- whatsapp: 2 line + link

Sirf JSON lautao: {"linkedin","x_thread","instagram","newsletter","whatsapp"}
```

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Naya blog post RSS par aate hi AI usse 5 platform-specific posts banata hai (LinkedIn, X thread, Instagram caption, newsletter, WhatsApp) aur approval ke liye "Content Queue" sheet mein daal deta hai.

Flow: RSS Feed Trigger (Naya blog post) → Basic LLM Chain (5 formats (JSON)) → Edit Fields (Status: pending) → Google Sheets (Content Queue)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "AI Content Repurposing Engine" (nodes: New Blog Post, Repurpose with AI, OpenAI Model, JSON Format, Queue Row, Content Queue).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Content repurposing engine: ek blog post se 5 platform-specific posts + scheduling.

📝 Homework

Weekly social media performance report auto-generate karke email karo.

- ☐ Homework ho gaya

BEGINNER
RSS → Telegram channel

INTERMEDIATE
YouTube video → Instagram caption draft

ADVANCED
Weekly performance report with AI insights

🧩 Aaj ka challenge — pehle khud try karo

🎯 AI se har post ke liye ek catchy title aur best posting time bhi maango.

💡 **Hint 1**
JSON Format (output parser) ke example mein naye fields jodo.

💡 **Hint 2**
Prompt mein bhi likho kya chahiye, aur Queue Row mein naye fields map karo.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Publish se pehle human check ko kya kehte hain?

(A) Scraping
(B) Approval loop
(C) Routing
(D) Parsing

Q2. Naya blog post detect karne ka trigger?

(A) Form
(B) RSS Feed Trigger
(C) Manual
(D) Error Trigger

Q3. AI se fixed JSON output ke liye?

(A) Sort
(B) Wait
(C) Structured Output Parser
(D) Merge

Q4. Campaign tracking ke liye?

(A) Cookies only
(B) Emoji
(C) Hashtags
(D) UTM parameters

📖 Aaj ke naye shabd

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

LLM
Large Language Model — ChatGPT/Claude jaisa AI jo text samajhta aur likhta hai.

Prompt
AI ko diya gaya instruction/sawaal.

HTTP Request
Node jo kisi bhi API ko call kar sakta hai — n8n ka universal connector.

Retainer

Har mahine fixed fees par client ka kaam/maintenance karna.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 13

E-commerce, Finance & Reporting Automation

"Orders, payments, invoices — sab autopilot par."

☐ **Day 12 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → B
Approval loop

Q2 → B
RSS Feed Trigger

Q3 → C
Structured Output Parser

Q4 → D
UTM parameters

✅ Challenge ka solution

Parser example mein "title": "...", "best_time": "Tue 9 AM" jodo. Prompt rules mein likho. Queue Row: title_ai = {{ $json.output.title }}, best_time = {{ $json.output.best_time }}.

`adifyskills.com/day/12`

DAY 13

E-commerce, Finance & Reporting Automation

"Orders, payments, invoices — sab autopilot par."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 **Yeh lesson kyun zaroori hai?**

Paisa jahan hai, wahan automation ki demand sabse zyada — orders, payments, invoices, reports.

🎯 Aaj ke baad aap yeh kar paoge

01 Shopify/WooCommerce order workflows

🌍 Dukaan mein order aaya → packing → delivery boy.
⚙️ Shopify Trigger (orders/create) → Sheet + WhatsApp confirmation.

02 Payments: Razorpay & Stripe webhooks

🌍 Paisa aate hi "ting" ki awaaz (UPI speaker).
⚙️ Razorpay webhook payment.captured → verify signature → aage badho.

03 Auto-invoice PDF generation

🌍 Kacchi parchi ki jagah printed bill.
⚙️ HTML template → PDF (Gotenberg/API) → Gmail attachment.

04 Inventory alerts & supplier emails

🌍 Ration khatam hone se pehle mummy list banati hain.
⚙️ Schedule daily → stock < 5 → supplier ko email.

05 Daily/weekly KPI reports (Sheets → charts → email)

🌍 Report card har mahine.
⚙️ Schedule Mon 9am → Sheets se sum → chart URL → email.

06 Abandoned cart recovery

🌍 Customer trolley chhod ke chala gaya — yaad dilao.
⚙️ Checkout created, order nahi → Wait 1h → WhatsApp coupon.

⏱ Class ka plan (2 ghante)

10m	30m	50m	20m	10m

`0:00-0:10` **Recap**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:40` **Concept: Ops Automation**

🪄 Jaise hi tum piggy bank mein sikka daalte ho, ek robot diary mein likh deta hai kitne paise ho gaye — tumhe ginna nahi padta.

`0:40-1:30` **Live Build**

Razorpay payment → invoice PDF → email → accounting sheet

🪄 Aaj ki kahani yaad hai — 'Kiraana dukaan ka smart galla'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Quiz + Challenge**
Module 4 quiz
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Payment webhook
Razorpay/Stripe payment success par n8n ko event bhejte hain.
🪄 **Analogy:** Bank ka SMS alert

CONCEPT 02
Signature verification
Event asli gateway se aaya hai — HMAC se check.
🪄 **Analogy:** Note ka watermark check

CONCEPT 03
PDF invoice
HTML template → PDF (API/Gotenberg) → email.
🪄 **Analogy:** Printed bill

CONCEPT 04
KPI report
Daily numbers: sales, orders, AOV.
🪄 **Analogy:** Dukaan ka roz ka hisaab

🔑 Aaj ka main idea
Ops automation = business ke roz ke repeat kaam (orders, payments, invoices, stock, reports) ko event ke saath jod dena. Paisa aaya → baaki sab apne aap.

- Shopify order → WhatsApp confirmation + packing slip
- Razorpay payment → GST invoice → accountant ko copy
- Har Monday subah sales report email

📖 Ek kahani se samjho: Kiraana dukaan ka smart galla

1 💳 **Customer ne UPI se pay kiya**
= Razorpay webhook

2 🧾 **Bill apne aap chhapa**
= Invoice PDF node

3 📩 **Customer ko bill mila**
= Gmail send

4 📒 **Hisaab ki kitaab update**
= Google Sheets append

5 📦 **Stock kam? Supplier ko call**
= IF stock < 5 → email

🪄 Ek line mein: "Jaise hi tum piggy bank mein sikka daalte ho, ek robot diary mein likh deta hai kitne paise ho gaye — tumhe ginna nahi padta."

🗺️ Aaj ka workflow: Payment Webhook → GST Invoice → Email + Finance Sheet

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

E-commerce / D2C brands (payment → invoice) — aam taur par **₹15,000 – ₹40,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Webhook**
Razorpay payment.captured event

2 🔐 **Crypto**
HMAC-SHA256 signature verify

3 👩‍💻 **Code**
GST breakup + invoice number

4 🧾 **HTML**
Invoice HTML template

5 🌐 **HTTP Request**
HTML → PDF conversion API

6 📧 **Gmail**
Customer ko PDF attach

7 📊 **Google Sheets**
Finance sheet entry

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Gmail (Google OAuth)**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] Razorpay Dashboard → Settings → Webhooks → URL = production webhook URL, event = payment.captured
- [ ] Production mein webhook signature (X-Razorpay-Signature) verify karna mat bhoolna
- [ ] "Payments" tab headers: payment_id, email, phone, total, taxable, gst, invoice_no, date

✅ Test kaise karein

1. Webhook "Listen for test event" → neeche wala sample body curl se bhejo
2. Email mein invoice aur sheet mein row check karo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Payment check karna	10 min
Invoice banana	15 min
Email karna + sheet update	10 min
	35 min

⚡ Ab (n8n)

Webhook se sab auto	1 min
	1 min

⏱ Har order par ~34 minute bache. 30 orders/din = 17 ghante/din!

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
{{ $json.payload.payment.entity.amount / 100 }}  // paise → rupees
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "event": "payment.captured",
  "payload": {
    "payment": {
      "entity": {
        "amount": 999900,
        "email": "student@mail.com"
      }
    }
  }
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "invoice": "INV-261203-17",
  "amount": 9999,
  "gst": 1525.27,
  "emailed": true
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Razorpay se "payment.captured" webhook aata hai → GST ke saath HTML invoice banta hai → customer ko email → finance sheet mein entry. Har order par 30+ minute ka kaam zero.

Flow: Webhook (Razorpay event) → IF (payment.captured?) → Edit Fields (Amount + GST) → Code (HTML invoice) → Gmail + Sheets (Customer + finance)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Payment Webhook → GST Invoice → Email + Finance Sheet" (nodes: Razorpay Webhook, Captured?, Invoice Fields, HTML Invoice, Email Invoice, Finance Sheet).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
6 nodes · ready to import
`adifyskills.com/workflows/day-13-payment-gst-invoice.json`

🌐 Lesson page
Copy buttons, quiz aur video links
`adifyskills.com/day/13`

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Paise ko rupees samajhna (amount/100)
- ! Signature verify skip karna
- ! Same payment event par do invoices (idempotency)

⭐ Pro tips — time bachane wali tricks

- ★ Payment ID se Remove Duplicates — webhook retry par double invoice nahi
- ★ Invoice number sequence DB/Sheet se lo
- ★ Daily KPI ko chart image (QuickChart) ke saath bhejo

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Payment success webhook → GST invoice PDF → customer email → finance sheet update.

📝 Homework

Daily sales KPI report jo har raat 10 baje owner ko WhatsApp par aaye.

- ☐ Homework ho gaya

BEGINNER
Woo order → Telegram alert ☐

INTERMEDIATE
Low stock alert to supplier ☐

ADVANCED
Abandoned cart 3-step recovery ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Payment ₹10,000 se upar ho to owner ko Telegram par "Big order! 🎉" alert bhi jaaye.

💡 **Hint 1**
HTML Invoice ke baad ek aur branch bana sakte ho.

💡 **Hint 2**
IF {{ $json.total }} > 10000 → Telegram.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Razorpay amount 999900 = ?

(A) ₹9999
(B) ₹99.99
(C) ₹99990
(D) ₹999900

Q2. Webhook asli hai, kaise check?

(A) HMAC signature
(B) IP guess
(C) Email
(D) Kuch nahi

Q3. Double invoice se bachne ke liye?

(A) Limit
(B) Remove Duplicates by payment ID
(C) Wait
(D) Sort

Q4. JSON → Excel file?

(A) HTML
(B) XML
(C) Convert to File
(D) Extract from File

📖 Aaj ke naye shabd

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

API
Do apps ke baat karne ka tareeka. Ek app sawaal bhejta hai, doosra jawab (data) deta hai.

HTTP Request
Node jo kisi bhi API ko call kar sakta hai — n8n ka universal connector.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 14

AI in n8n: LLMs & Prompt Engineering

"Workflows ko dimaag do — AI ke saath."

☐ **Day 13 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → A
₹9999
Amount paise mein hota hai.

Q2 → A
HMAC signature

Q3 → B
Remove Duplicates by payment ID

Q4 → C
Convert to File

✅ Challenge ka solution

HTML Invoice → IF (total > 10000) → Telegram "🎉 Big order ₹{{ $json.total }} from {{ $json.email }}".

`adifyskills.com/day/13`

DAY 14

AI in n8n: LLMs & Prompt Engineering

"Workflows ko dimaag do — AI ke saath."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 **Yeh lesson kyun zaroori hai?**

AI ab har workflow ka hissa hai. Aaj student seekhega ki AI ko "reliable worker" kaise banaye — random chatbot nahi.

🎯 Aaj ke baad aap yeh kar paoge

01 LLMs explained simply: tokens, context, temperature

🌍 Tote ko jitna yaad, utna hi bolega (context).
⚙️ Token = shabd ka tukda; context window = ek baar mein kitna padh sake.

02 OpenAI, Anthropic Claude, Gemini & open models in n8n

🌍 Alag-alag teacher, alag specialty.
⚙️ OpenAI / Claude / Gemini chat model nodes — credential badlo, model badlo.

03 Basic LLM Chain & chat model nodes

🌍 Sawaal → jawab, seedha.
⚙️ Basic LLM Chain: prompt mein {{ $json.body }} daalo.

04 Prompt engineering frameworks (role, task, format)

🌍 Teacher ko clear instruction: "Tum maths teacher ho, 3 steps mein samjhao."
⚙️ Role + Task + Context + Format + Example.

05 Structured output parsers (JSON)

🌍 Form bharwana, essay nahi.
⚙️ Structured Output Parser: {category, sentiment, reply}.

06 Cost control & model selection

🌍 Chhote kaam ke liye auto, bade ke liye taxi.
⚙️ Classification = mini model; complex reasoning = bada model.

⏱ Class ka plan (2 ghante)

10m	40m	40m	20m	10m

`0:00-0:10` **Recap**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:50` **Concept: LLMs & Prompts**

Bad vs good prompt live comparison

🪄 Ek tota hai jisne poori library padh li. Tum jitna saaf sawaal poochoge, utna achha jawab dega.

`0:50-1:30` **Live Build**

AI email classifier + reply drafter

🪄 Aaj ki kahani yaad hai — 'Bahut padha-likha tota'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Prompt Battle**
Best prompt wins
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
LLM
Bahut saara text padh chuka model jo agla word predict karta hai.
🪄 **Analogy:** Bahut padha-likha intern

CONCEPT 02
Tokens & context
Model ek baar mein kitna text dekh sakta hai; cost tokens par.
🪄 **Analogy:** Exam ki answer sheet ke pages

CONCEPT 03
Temperature
Kam = consistent, zyada = creative.
🪄 **Analogy:** Strict teacher vs creative writer

CONCEPT 04
Prompt framework
Role + Task + Context + Format + Examples.
🪄 **Analogy:** Clear job description

🔑 Aaj ka main idea
LLM ek next-word predict karne wala bada model hai. Hum use prompt dete hain (role + task + format) aur woh text ya JSON lautata hai. n8n mein yeh ek node ki tarah kaam karta hai.

- Email ko sales/support/spam mein baantna
- Review ka sentiment positive/negative
- Lamba document 5 bullet summary mein

📖 Ek kahani se samjho: Bahut padha-likha tota

1 🦜 **Tote ne lakhon kitabein padhi** = LLM (trained model)

2 🗣️ **Tumne sawaal poocha** = Prompt

3 🧩 **Tota shabd-shabd jodta hai** = Tokens

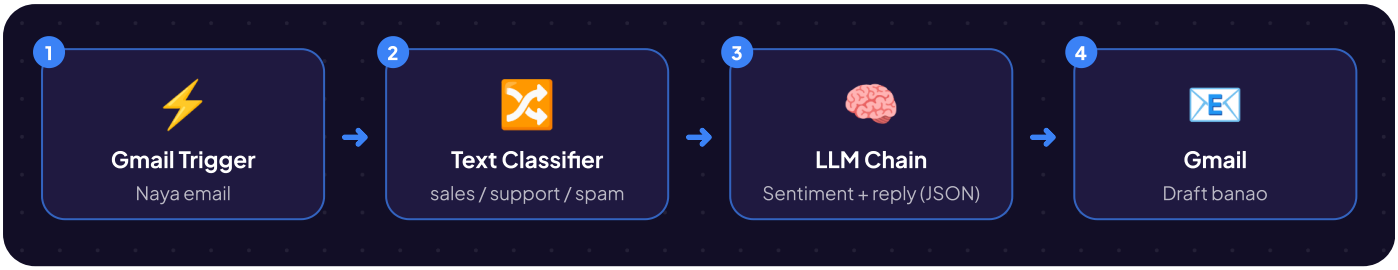

4 🎚️ **Seedha jawab ya creative** = Temperature

5 📋 **Jawab form mein bharo** = Structured output (JSON)

🪄 Ek line mein: “Ek tota hai jisne poori library padh li. Tum jitna saaf sawaal poochoge, utna achha jawab dega.”

🗺️ Aaj ka workflow: Inbox AI: Classify + Sentiment + Reply Draft

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Agencies, SaaS (AI inbox triage) — aam taur par **₹15,000 – ₹35,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Gmail Trigger**
Naya email inbox mein

2 🔀 **Text Classifier**
Categories: sales, support, billing, spam

3 🏷️ **Sentiment Analysis**
Positive / neutral / negative

4 🧠 **Basic LLM Chain**
Reply draft (brand tone) + Structured Output Parser

5 📧 **Gmail**
Draft create + label lagao

6 💼 **Slack**
Negative + support → team alert

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- ☐ Connect: **Gmail (Google OAuth)**
- ☐ Connect: **OpenAI API key**
- ☐ Connect: **Telegram bot token (BotFather se)**
- ☐ Pehle ek test Gmail account par chalao

✅ Test kaise karein

1. Apne aap ko 3 email bhejo: price poochne wala, complaint wala, promo wala
2. Gmail Trigger "Fetch test event" → har branch dekho
3. Gmail Drafts folder check karo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Har email padhna	3 min
Category decide karna	1 min
Reply likhna	6 min
	10 min

⚡ Ab (n8n)

AI classify + draft, insaan bas check kare	1 min
	1 min

⏱ 100 emails/din par ~15 ghante → 2 ghante.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
ROLE: You are a support lead at {{brand}}.
TASK: Draft a reply.
RULES: Hinglish, max 80 words, never promise refunds.
FORMAT: JSON {"reply":"","needs_human":true|false}
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "from": "customer@mail.com",
  "subject": "Refund chahiye",
  "body": "Mera course access kaam nahi kar raha,
bahut frustrating hai."
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "category": "support",
  "sentiment": "negative",
  "draft": "Hi! Sorry for the trouble 🙏 Humari team
ne aapka access reset kar diya hai…"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Sales reply prompt (workflow ke andar) — 📋 Select karke copy karo

```
Tum ek helpful sales assistant ho jo ek Indian automation agency ke liye kaam karta hai.
Neeche diye email ko padho aur:
1. sentiment batao (positive / neutral / negative)
2. 3 line ka polite reply draft karo — simple English, koi fake promise nahi, end mein 15-min call ka
offer.

From: {{from}}
Subject: {{subject}}
Email: {{body}}
```

💬 Classifier categories

📋 Select karke copy karo

```
sales: Price, quote, demo, new project ya service ke baare mein poochna
support: Existing customer ki problem, bug, refund, order issue
spam: Promotions, newsletters, cold SEO offers, irrelevant
```

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Har naya email AI padhta hai aur sales / support / spam mein baant deta hai. Sales email ka sentiment nikaal ke reply draft Gmail mein bana deta hai, support wala team ko Telegram par, spam "read" mark.

Flow: Gmail Trigger (Naya email) → Text Classifier (sales / support / spam) → LLM Chain (Sentiment + reply (JSON)) → Gmail (Draft banao)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Inbox AI: Classify + Sentiment + Reply Draft" (nodes: New Email, Classify Email, Classifier Model, Draft Sales Reply, Reply Model, Reply JSON, Create Gmail Draft, Alert Support Team, Mark Spam Read).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
9 nodes · ready to import
adifyskills.com/workflows/day-14-inbox-ai-classifier.json

🌐 Lesson page

adifyskills.com/day/14

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Telegram bot token (BotFather se)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.
AI node par 401 / 429 error?	401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo.

⚠️ Yeh galtiyan sabse common hain

- ! Prompt mein format na batana → output parse nahi hota
- ! Temperature high rakhna classification ke liye
- ! Har email par sabse mehenga model

⭐ Pro tips — time bachane wali tricks

- ★ Classification ke liye chhota/sasta model kaafi hai
- ★ Structured Output Parser + "Auto-fix" se reliable JSON
- ★ Prompts ko Sheet mein store karo — bina workflow edit kiye badlo

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Inbox AI: incoming email ko classify (sales/support/spam), sentiment nikaalo aur reply draft banao.

📝 Homework

10 prompts ki apni prompt library banao with structured JSON output.

- ☐ Homework ho gaya

BEGINNER
Review ko positive/negative classify

INTERMEDIATE
Prompt library 10 prompts JSON output ke saath

ADVANCED
Model fallback: OpenAI fail → Gemini

🧩 Aaj ka challenge — pehle khud try karo

🎯 Category mein "partnership" bhi jodo aur aise emails founder ko forward karo.

💡 **Hint 1**
Text Classifier mein categories ki list editable hai.

💡 **Hint 2**
Naya category banate hi node ka ek naya output banta hai — wahan Gmail node lagao.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Consistent output ke liye temperature?

(A) Random
(B) Matter nahi karta
(C) High (1.5)
(D) Low (0–0.3)

Q2. AI se fixed JSON?

(A) Merge
(B) Wait
(C) IF
(D) Structured Output Parser

Q3. Email ko categories mein baantne ka node?

(A) Text Classifier
(B) Summarize
(C) Sort
(D) Limit

Q4. Cost kis par depend karta hai?

(A) Font
(B) Tokens
(C) Colors
(D) Node count

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

LLM
Large Language Model — ChatGPT/Claude jaisa AI jo text samajhta aur likhta hai.

Prompt
AI ko diya gaya instruction/sawaal.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 15

AI Agents: Tools, Memory & Reasoning

"Chatbot nahi — ek digital employee banao."

☐ **Day 14 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → D
Low (0–0.3)

Q2 → D
Structured Output Parser

Q3 → A
Text Classifier

Q4 → B
Tokens

✅ Challenge ka solution

Classify Email → Add category "partnership" (collab, partnership, sponsorship requests) → naya output → Gmail send to founder@... with original subject.

Quiz, copy buttons, videos

`adifyskills.com/day/14`

DAY 15

AI Agents: Tools, Memory & Reasoning

"Chatbot nahi — ek digital employee banao."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 **Yeh lesson kyun zaroori hai?**

AI Agent = LLM + tools + memory. Yahi "digital employee" hai jo clients sabse zyada maangte hain.

🎯 Aaj ke baad aap yeh kar paoge

01 AI Agent node: how agents think & act

🌍 Didi pehle sochti hai, phir karti hai.
⚙️ AI Agent: Think → Tool call → Observe → Answer.

02 Tools: HTTP, Calculator, Code, sub-workflow as tool

🌍 Didi ke paas phone, calculator, diary.
⚙️ Tools: HTTP Request, Calculator, Code, Call n8n Workflow.

03 Memory: window buffer, Postgres/Redis chat memory

🌍 Didi ko yaad hai tumhe chai pasand hai.
⚙️ Window Buffer Memory (last 10 msgs), Postgres memory (permanent).

04 System prompts for reliable agents

🌍 Didi ko job description diya.
⚙️ System prompt: role, rules, tools kab use karein, kya nahi karna.

05 Chat Trigger & embedding chat on websites

🌍 Dukaan ke counter par help desk.
⚙️ Chat Trigger → embed widget website par.

06 Agent guardrails & human-in-the-loop

🌍 Bade kharche se pehle papa se poochna.
⚙️ Payment/delete se pehle Slack/Telegram approval.

⏱ Class ka plan (2 ghante)

10m	35m	45m	20m	10m

`0:00-0:10` **Recap**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:45` **Concept: Agents**

ReAct loop visual

🪄 Chatbot sirf baat karta hai. Agent ke paas haath bhi hain — woh calendar khol sakta hai, calculator chala sakta hai.

`0:45-1:30` **Live Build**

Personal assistant agent: Calendar + Gmail + Sheets tools

🪄 Aaj ki kahani yaad hai — 'Personal assistant didi'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Challenge**
Add a custom tool via sub-workflow
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Agent loop
Socho → tool chuno → result dekho → dobara socho → jawab.
🪄 **Analogy:** Detective jo clues dhoondhta hai

CONCEPT 02
Tools
Agent ke haath-pair: API, calculator, sub-workflow.
🪄 **Analogy:** Mechanic ka toolbox

CONCEPT 03
Memory
Pichhli baatein yaad rakhna (session ID se).
🪄 **Analogy:** Dukaan wala jo regular customer ko pehchaanta hai

CONCEPT 04
System prompt
Agent ki job description + rules + guardrails.
🪄 **Analogy:** Company ki rulebook

🔑 Aaj ka main idea

AI Agent ek LLM hai jise tools diye gaye hain. Woh khud decide karta hai kaunsa tool, kis order mein chalana hai, aur memory se pichhli baat yaad rakhta hai.

- Telegram bot jo expense Sheet mein likhe
- Website chat jo order status bataye
- Sales agent jo CRM se lead info nikaale

📖 Ek kahani se samjho: Personal assistant didi

1 📱 **Tumne message kiya "kal meeting set karo"** = Chat/Telegram Trigger

2 🤔 **Didi ne socha kya karna hai** = AI Agent (reasoning)

3 📅 **Calendar khola** = Tool: Google Calendar

4 🧠 **Pichhli baat yaad rakhi** = Memory

5 ✅ **"Ho gaya, 4 baje set hai"** = Reply

🪄 Ek line mein: "Chatbot sirf baat karta hai. Agent ke paas haath bhi hain — woh calendar khol sakta hai, calculator chala sakta hai."

🗺️ Aaj ka workflow: Telegram AI Assistant (Agent + Tools + Memory)

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Busy founders, CA firms (AI personal assistant) — aam taur par **₹15,000 – ₹40,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Telegram Trigger**
User message

2 🤖 **AI Agent**
System prompt: personal assistant, Hinglish, confirm before booking

3 🧠 **OpenAI Chat Model**
Agent ka model (sub-node)

4 💾 **Simple Memory (Window Buffer)**
Session key = chat ID, last 10 messages

5 🧩 **Call n8n Workflow Tool**
Tools: book_meeting, log_expense, summarize_inbox

6 ✈️ **Telegram**
Agent ka jawab wapas

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Telegram bot token (BotFather se)**
- [ ] Connect: **OpenAI API key**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] Connect: **Google Calendar (Google OAuth)**
- [ ] "Expenses" tab headers: date, amount, category, note
- [ ] Workflow Active karo

✅ Test kaise karein

1. "Lunch 450 rupaye" bhejo → Sheet
2. "Kal 4 baje Rahul se call" → Calendar
3. "Aur uska reminder kab hai?" — memory test

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😫 Pehle (manual)

Calendar check, slot dhoondhna, invite bhejna — **10 min**

10 min

⚡ Ab (n8n)

Telegram par ek line — **1 min**

1 min

⏱ Din mein 10 aise kaam = ~1.5 ghante bache.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
You are Aria, a personal assistant.
- Always confirm date/time before booking.
- Use tools; never invent data.
- Reply in short Hinglish.
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "text": "Kal 5 baje Rohan ke saath meeting book karo aur aaj ka ₹450 lunch expense log karo"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "reply": "✅ Kal 5:00 PM Rohan ke saath meeting book ho gayi. ₹450 lunch expense log kar diya.",
  "toolsUsed": [
    "book_meeting",
    "log_expense"
  ]
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Agent system prompt

📋 Select karke copy karo

```
Tum mera personal assistant ho. Aaj ki date: {{today}}, timezone Asia/Kolkata.
Rules:
- Meeting ke liye Calendar tool use karo (default 30 min).
- Kharche ke liye Expense tool use karo (amount, category, note).
- Calculation ke liye Calculator tool.
- Jawab chhota, Hinglish mein, emoji 1 max.
- Paise bhejne ya delete karne jaisa kaam kabhi mat karo — mana kar do.
```

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Ek personal AI assistant Telegram par: "kal 4 baje Rahul ke saath meeting rakho", "₹450 lunch
expense likho", "18% GST of 12500?" — agent khud decide karta hai Calendar, Sheet ya Calculator kaunsa
tool use kare, aur pichhli baat yaad rakhta hai.

Flow: Telegram Trigger (Message) → AI Agent (Sochta + tool chunta) → Tools (Calendar · Sheet ·
Calculator) → Memory (Last 10 messages) → Telegram (Reply)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to
test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Telegram AI Assistant (Agent + Tools + Memory)" (nodes: Telegram Message,
AI Assistant, OpenAI Model, Chat Memory, Calculator, Log Expense, Book Meeting, Reply).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
8 nodes · ready to import

🌐 Lesson page
Copy buttons, quiz aur video links
adifyskills.com/day/15

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Telegram bot token (BotFather se)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Calendar (Google OAuth)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.
AI node par 401 / 429 error?	401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Tool description vague — agent galat tool chunta hai
- ! Memory session key sabke liye same (sab users ki baatein mix)
- ! Agent ko delete/payment jaise risky tools bina approval

⭐ Pro tips — time bachane wali tricks

- ★ Tool ka naam aur description crystal clear: "book_meeting: books a calendar slot. Input: datetime, person"
- ★ Max iterations set karo — infinite loop se bacho
- ★ Risky actions par human-in-the-loop approval

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Telegram AI assistant jo meetings book kare, emails summarize kare aur expenses log kare.

📝 Homework

Apne niche ke liye ek agent banao jismein kam se kam 3 tools hon.

- ☐ Homework ho gaya

BEGINNER
Calculator tool wala agent

INTERMEDIATE
Sheet lookup tool: "mera order status?"

ADVANCED
Approval step before sending email

🧩 Aaj ka challenge — pehle khud try karo

🎯 Assistant ko ek naya tool do: "aaj ka total kharcha batao".

💡 **Hint 1**
Google Sheets Tool ko "read" operation ke saath bhi add kar sakte ho.

💡 **Hint 2**
Tool description saaf likho: "Expenses sheet padhta hai" — agent isi se decide karta hai.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Agent ko yaaddasht dene wala sub-node?

(A) Parser
(B) Memory
(C) Embeddings
(D) Splitter

Q2. Agent galat tool chun raha hai — fix?

(A) Temperature 2
(B) Kuch nahi
(C) Tool description improve
(D) Model delete

Q3. Multi-user bot mein session key?

(A) Fixed "1"
(B) Empty
(C) Date
(D) Har user ka unique ID

Q4. Workflow ko agent ka tool banane ka node?

(A) Call n8n Workflow Tool
(B) Merge
(C) Wait
(D) Sort

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Node
Workflow ka ek dabba/step. Har node ek kaam karta hai (email bhejna, data laana…).

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

API
Do apps ke baat karne ka tareeka. Ek app sawaal bhejta hai, doosra jawab (data) deta hai.

LLM
Large Language Model — ChatGPT/Claude jaisa AI jo text samajhta aur likhta hai.

Prompt
AI ko diya gaya instruction/sawaal.

Agent
AI jo khud decide karta hai kaunsa tool use karna hai — sirf baat nahi, kaam bhi karta hai.

Embedding
Text ka "matlab" numbers mein — taaki milte-julte text dhoondhe ja sakein.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 16

RAG: Chat With Your Own Data

"Company ke documents se jawab dene wala AI."

☐ **Day 15 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → B
Memory

Q2 → C
Tool description improve

Q3 → D
Har user ka unique ID

Q4 → A
Call n8n Workflow Tool

✅ Challenge ka solution

Naya Google Sheets Tool: operation Get Rows, sheet Expenses, description "Saare kharche padhta hai, total nikaalne ke liye". System prompt mein: "Total poocha jaaye to yeh tool use karo."

DAY 16

RAG: Chat With Your Own Data

"Company ke documents se jawab dene wala AI."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

ChatGPT aapki company ke documents nahi jaanta. RAG se AI "aapke data" se jawab deta hai — sabse demanded AI project.

🎯 Aaj ke baad aap yeh kar paoge

01 RAG explained: embeddings, chunks, retrieval
🌍 Open-book exam.
⚙️ Query → embed → top-k chunks → prompt mein daalo → answer.

02 Vector stores: Pinecone, Qdrant, Supabase pgvector
🌍 Library ki almari.
⚙️ Pinecone / Qdrant / Supabase vector store nodes.

03 Document loaders & text splitters
🌍 Kitaab ko chapters mein kaatna.
⚙️ Default Data Loader + Recursive Character Splitter (chunk 800, overlap 100).

04 Ingestion pipeline: Drive → chunks → vectors
🌍 Nayi kitaab aayi → almari mein lagao.
⚙️ Drive Trigger (new file) → split → embed → insert.

05 Q&A chain with sources/citations
🌍 Jawab ke saath "page 23 dekho".
⚙️ Metadata mein file name/page → answer mein citation.

06 Evaluating & improving answer quality
🌍 Teacher copy check karti hai.
⚙️ 20 test sawaal ki sheet → answers compare → chunk size/prompt tune.

⏱ Class ka plan (2 ghante)

10m	40m	40m	20m	10m

`0:00-0:10` **Recap**
🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:50` **Concept: RAG**
Library analogy + diagram
🪄 Open-book exam! Ratne ki jagah, sahi page khol ke jawab likho.

`0:50-1:30` **Live Build**
Company FAQ bot on PDFs with citations
🪄 Aaj ki kahani yaad hai — 'Library aur librarian'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Challenge**
Auto-update vectors when Drive file changes
🪄 Practice match — jitna yahan girenge, utna asli match mein kam girenge.

1:50-2:00 **Q&A + Homework**
🪄 Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Embeddings
Text ka matlab numbers (vector) mein.
🪄 **Analogy:** Har shabd ka GPS coordinate

CONCEPT 02
Chunking
Lambe document ke chhote tukde (500–1000 chars, overlap).
🪄 **Analogy:** Kitaab ke paragraphs

CONCEPT 03
Vector store
Similar meaning wale chunks dhoondhne wala DB.
🪄 **Analogy:** Library ka smart librarian

CONCEPT 04
Retrieval + Generation
Relevant chunks dhoondho → LLM ko do → jawab with sources.
🪄 **Analogy:** Open-book exam

🔑 Aaj ka main idea
RAG = pehle apne documents mein se relevant hissa dhoondho (Retrieval), phir LLM ko woh hissa dekar jawab banwao (Generation). Isse AI apni company ka data bolta hai, guess nahi karta.

- Company policy PDF par HR bot
- Product manual par support bot
- Course notes par student doubt bot

📖 Ek kahani se samjho: Library aur librarian

1 📚 **Saari kitabein library mein** = Documents (Drive PDFs)

2 ✂️ **Har kitaab ke chhote panne** = Text splitter (chunks)

3 🏷️ **Har panne par matlab ka label** = Embeddings

4 🔍 **Librarian sahi panna dhoondhta hai** = Vector store retrieval

5 🗣️ **Panna padh ke jawab** = LLM answer + source

🪄 Ek line mein: “Open-book exam! Ratne ki jagah, sahi page khol ke jawab likho.”

🗺️ Aaj ka workflow: RAG Bot: Chat With Your PDFs

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Any business with FAQs/policies (RAG support bot) — aam taur par **₹25,000 – ₹75,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Google Drive Trigger**
Folder mein nayi/updated PDF

2 📁 **Google Drive**
File download

3 🧬 **Recursive Character Text Splitter**
Chunk 800, overlap 100

4 🧬 **Supabase Vector Store**
Insert documents + Embeddings OpenAI

5 ⚡ **Chat Trigger**
User question (website widget)

6 🔧 **Question and Answer Chain**
Retriever = Supabase Vector Store, answer with sources

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Google Drive (Google OAuth)**
- [ ] Connect: **OpenAI API key**
- [ ] Drive par ek PDF (FAQ / policy) upload karo, uski File ID paste karo
- [ ] In-memory store restart par khaali ho jaata hai — production mein Pinecone/Qdrant/Supabase vector store lagao (same wiring)

✅ Test kaise karein

1. Pehle "Load Docs" wala Test chalao
2. Phir Chat button se PDF ke baare mein sawaal pucho
3. Aisa sawaal bhi pucho jo PDF mein nahi hai — bot ko mana karna chahiye

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Customer sawaal → PDF mein dhoondhna → reply — **12 min**

12 min

→

⚡ Ab (n8n)

RAG bot turant source ke saath — **0.5 min**

0.5 min

⏱ 50 sawaal/din par ~10 ghante bache.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
Answer ONLY from the context. If not found, say "Mujhe iski jaankari nahi hai, main team se confirm karke batata hoon." Cite the source file.
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "chatInput": "Course ki refund policy kya hai?"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "output": "Pehli 2 live classes ke baad 7 din ke andar full refund milta hai. (Source: policy.pdf, page 2)"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 RAG agent system prompt — 📋 Select karke copy karo

```
Tum company ke support assistant ho. Har jawab se pehle "company_docs" tool se search karo. Sirf wahi bolo jo documents mein hai. Agar jawab nahi mila to bolo "Mujhe iska pakka jawab nahi pata, main aapko team se connect karta hoon." Jawab ke end mein source (file/section) likho.
```

💬 Build it with ChatGPT / Claude — 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Do hisse: (1) Google Drive ki PDF ko chunks mein kaat ke vector store mein daalo. (2) Chat widget par sawaal pucho — agent sirf aapke documents se jawab deta hai, source ke saath. In-memory store use kiya hai taaki koi extra account na lage.

Flow: Manual + Drive (PDF download) → Vector Store (insert) (Chunks + embeddings) → Chat Trigger (Sawaal) → AI Agent + Store tool (Docs se jawab)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "RAG Bot: Chat With Your PDFs" (nodes: Load Docs (run once), Download PDF,
Insert into Store, Embeddings (insert), PDF Loader, Splitter, Chat, Support Agent, Chat Model, Memory,
Docs Search Tool, Embeddings (search)).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ **Workflow JSON**

`adifyskills.com/day/16`

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Drive (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.
AI node par 401 / 429 error?	401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo.

⚠️ Yeh galtiyan sabse common hain

- ! Chunk size bahut bada/chhota — jawab adhoore
- ! Purane vectors delete kiye bina naye add (duplicate answers)
- ! AI ko context ke bahar jawab dene dena (hallucination)

⭐ Pro tips — time bachane wali tricks

- ★ Metadata (file name, page) save karo — citations ke liye
- ★ File update par pehle us file ke vectors delete
- ★ 20 test questions ki list banao aur har change ke baad test

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Google Drive PDFs ko ingest karke website chat widget par RAG support bot.

📝 Homework

Kisi coaching/clinic ke 5 documents par RAG bot banao aur 20 questions test karo.

- ☐ Homework ho gaya

BEGINNER
In-memory vector store se 1 PDF ☐

INTERMEDIATE
Drive update par auto re-index ☐

ADVANCED
Answer quality eval with test set ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Bot har jawab ke end mein "Kya aur kuch poochna hai? 😊" likhe aur jawab 80 words se lamba na ho.

💡 **Hint 1**
Yeh rules agent ke system prompt mein jaate hain.

💡 **Hint 2**
System message ke end mein 2 rules aur jodo.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Text ko vectors mein badalne wala?

- (A) Embeddings
- (B) Parser
- (C) Memory
- (D) Merge

Q2. RAG mein "R"?

- (A) Regex
- (B) Retrieval
- (C) Random
- (D) Reply

Q3. Hallucination kam karne ke liye?

(A) Bada font
(B) Kuch nahi
(C) "Only from context" instruction
(D) Temperature 2

Q4. Lambe PDF ko todne wala?

(A) Sort
(B) Limit
(C) IF
(D) Text Splitter

📖 Aaj ke naye shabd

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

LLM
Large Language Model — ChatGPT/Claude jaisa AI jo text samajhta aur likhta hai.

RAG
AI ko pehle aapke documents mein se sahi hissa dhoondh ke dena, phir jawab banwana — open-book exam.

Vector Store
Embeddings rakhne ka database — AI ki library.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 17

Document AI, Vision & Voice Automation

"Invoices padho, images samjho, voice notes transcribe karo."

☐ **Day 16 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → A
Embeddings

Q2 → B
Retrieval

Q3 → C
"Only from context" instruction

Q4 → D
Text Splitter

✅ Challenge ka solution

Support Agent → System Message mein jodo: "- Jawab max 80 words. - End mein likho: Kya aur kuch poochna hai? 😊"

DAY 17

Document AI, Vision & Voice Automation

"Invoices padho, images samjho, voice notes transcribe karo."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Business ka asli data PDFs, images aur voice notes mein hota hai. Multimodal AI se woh sab automation ke liye usable ban jaata hai.

🎯 Aaj ke baad aap yeh kar paoge

01 PDF & invoice data extraction with AI
🌍 Bill padh ke diary mein likhna.
⚙️ Gmail attachment → Extract from File / AI → {vendor, amount, gst, date}.

02 Image analysis with vision models
🌍 Photo dekh ke batana kya hai.
⚙️ OpenAI Analyze Image: "Is product ka naam, rang, defect?"

03 Voice note transcription (Whisper)
🌍 Dadi ka voice message likh dena.
⚙️ Telegram voice → OpenAI Transcribe (Whisper) → text.

04 AI image generation in workflows
🌍 Drawing book mein poster.
⚙️ Image generate → Drive upload → social post.

05 Multi-agent workflows & orchestration
🌍 Ghar mein sabka kaam alag — ek chef, ek waiter.
⚙️ Manager agent → researcher agent + writer agent (sub-workflows).

06 MCP (Model Context Protocol) with n8n
🌍 Universal charger.
⚙️ MCP Client/Server Trigger: tools ek standard tareeke se share.

⏱ Class ka plan (2 ghante)

10m	30m	50m	20m	10m

`0:00-0:10` **Recap**
🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:40` **Concept: Multimodal AI**
🪄 Pehle robot sirf padh sakta tha. Ab woh dekh sakta hai, sun sakta hai aur drawing bhi bana sakta hai.

`0:40-1:30` **Live Build**
WhatsApp voice note → transcribe → AI answer → voice/text reply
🪄 Aaj ki kahani yaad hai — 'Robot ki aankhein, kaan aur haath'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

`1:30-1:50` **Quiz + Challenge**
Module 5 quiz
🪄 Practice match — jitna yahan girenge, utna asli match mein kam girenge.

1:50–2:00 **Q&A + Homework**

🪄 Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

Information extraction

Unstructured text → fixed fields (schema).

🪄 **Analogy:** Form bharne wala clerk

CONCEPT 02

Vision

Image ko samajhna — bill, card, product photo.

🪄 **Analogy:** AI ki aankhen

CONCEPT 03

Transcription

Audio → text (Whisper).

🪄 **Analogy:** Stenographer

CONCEPT 04

MCP

Standard tareeka jisse AI agents external tools use karte hain; n8n MCP server/client dono ban sakta hai.

🪄 **Analogy:** Universal charger

🔑 Aaj ka main idea

Multimodal AI sirf text nahi — image, PDF, audio bhi samajhta hai. n8n mein file (binary) ko AI node mein bhejo aur structured data wapas lo.

- Invoice se vendor, amount, GST nikaalna
- WhatsApp voice note → text → task
- Product photo se description likhna

📖 Ek kahani se samjho: Robot ki aankhein, kaan aur haath

1 👀 **Robot ne bill dekha** = Vision / PDF extract

2 👂 **Voice note suna** = Whisper transcription

3 🎨 **Poster banaya** = Image generation

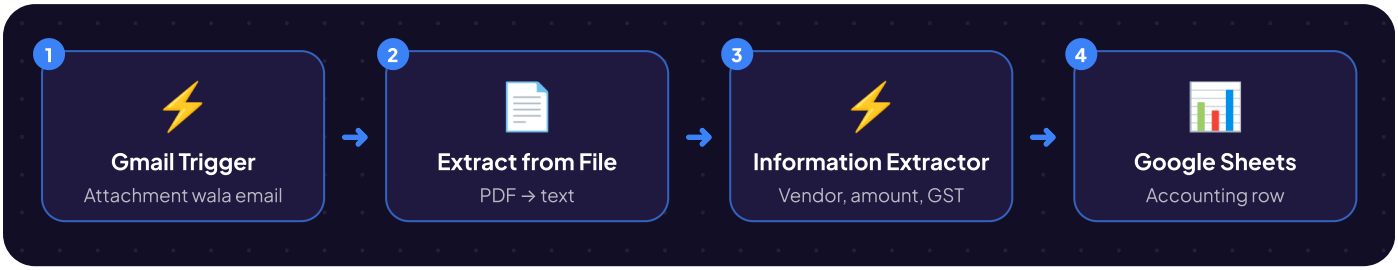

4 🤝 **Team mein kaam baanta** = Multi-agent

5 🔌 **Har tool ka ek plug** = MCP

🪄 Ek line mein: “Pehle robot sirf padh sakta tha. Ab woh dekh sakta hai, sun sakta hai aur drawing bhi bana sakta hai.”

🗺️ Aaj ka workflow: Invoice Inbox → AI Extraction → Accounting Sheet

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

CA firms, accounts teams (invoice extraction) — aam taur par **₹20,000 – ₹50,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Gmail Trigger**
Subject mein "invoice", has attachment

2 📄 **Extract from File**
PDF → text

3 ⚡ **Information Extractor**
Schema: vendor, invoice_no, date, subtotal, gst, total

4 🔀 **IF**
total = subtotal + gst? (validation)

5 📊 **Google Sheets**
Accounting sheet append

6 ✈️ **Telegram**
Mismatch par accountant ko alert

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Gmail (Google OAuth)**
- [ ] Connect: **OpenAI API key**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] "Invoices" tab headers: vendor, invoice_no, invoice_date, gstin, taxable_amount, gst_amount, total, email_from, received, status
- [ ] Agar output "output" ke andar aaye to Add Source mein {{ $json.output.vendor }} jaise map karo

✅ Test kaise karein

1. Apne aap ko ek sample invoice PDF email karo (subject mein "invoice")
2. Extractor ka output check karo — har field sahi aaya?

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Invoice PDF khol ke details type karna — **6 min**

6 min

⚡ Ab (n8n)

AI extraction → Sheet — **0.5 min**

0.5 min

⏱ 200 invoices/mahina = ~18 ghante bache.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
{ "vendor": "string", "invoice_no": "string", "date": "YYYY-MM-DD", "subtotal": "number", "gst": "number", "total": "number" }
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "text": "ABC Traders\nInvoice No: INV-2291\nDate: 02/12/2026\nSubtotal 20,000\nGST 18% 3,600\nTotal 23,600"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "vendor": "ABC Traders",
  "invoice_no": "INV-2291",
  "date": "2026-12-02",
  "subtotal": 20000,
  "gst": 3600,
  "total": 23600
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Extractor system prompt

📋 Select karke copy karo

```
Tum ek accountant ho. Invoice text se sirf maange gaye fields nikaalo. Jo field na mile use null rakho. Amounts sirf number mein (₹ ya comma nahi). Date YYYY-MM-DD.
```

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Email mein PDF invoice aate hi n8n attachment nikaalta hai, text padhta hai, AI se vendor, invoice no, date, amount, GST nikalwata hai aur accounting sheet mein row daal deta hai.

Flow: Gmail Trigger (Attachment wala email) → Extract from File (PDF → text) → Information Extractor (Vendor, amount, GST) → Google Sheets (Accounting row)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Invoice Inbox → AI Extraction → Accounting Sheet" (nodes: Invoice Email, PDF to Text, Extract Invoice Data, OpenAI Model, Add Source, Accounting Sheet).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
6 nodes · ready to import
adifyskills.com/workflows/day-17-invoice-ai-extractor.json

🌐 Lesson page
Copy buttons, quiz aur video links
adifyskills.com/day/17

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.
AI node par 401 / 429 error?	401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Scanned PDF (image) ko text extraction se padhna — OCR/vision chahiye
- ! Numbers ko string mein save (₹ aur comma)
- ! Validation skip — AI galti bhi kar sakta hai

⭐ Pro tips — time bachane wali tricks

- ★ Schema mein har field ka description likho — accuracy badhti hai
- ★ Confidence low ho to human review queue
- ★ Voice notes ke liye pehle transcribe, phir agent

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Invoice inbox: email PDF → AI extraction (vendor, amount, GST, date) → accounting sheet.

📝 Homework

Business card photo → contact details extract → CRM entry workflow.

☐ Homework ho gaya

BEGINNER
Business card photo → contact JSON

INTERMEDIATE
Voice note → todo list in Notion

ADVANCED
n8n workflow ko MCP server bana ke Claude/agent se call

🧩 Aaj ka challenge — pehle khud try karo

🎯 Agar extracted total khaali (null) aaye to sheet ki jagah aapko "manual check" email jaaye.

💡 **Hint 1**
Extraction ke baad ek check lagao.

💡 **Hint 2**
IF {{ $json.output.total }} is empty → Gmail, warna Sheet.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Text se fixed fields nikaalne ka node?

(A) Summarize
(B) Sort
(C) Merge
(D) Information Extractor

Q2. Audio ko text?

(A) Transcription (Whisper)
(B) Embeddings
(C) Splitter
(D) Crypto

Q3. Scanned image PDF ke liye?

(A) XML
(B) Vision/OCR
(C) Simple text extract
(D) Sort

Q4. AI output par validation kyun?

(A) Speed
(B) Zaroori nahi
(C) AI galti kar sakta hai
(D) Fun

📖 Aaj ke naye shabd

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Agent
AI jo khud decide karta hai kaunsa tool use karna hai — sirf baat nahi, kaam bhi karta hai.

MCP
Model Context Protocol — AI tools ko ek standard plug se jodne ka tareeka.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 18

Error Handling, Sub-Workflows & Reliability

"Production mein workflow ka fail hona = client ka gussa."

☐ **Day 17 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → D
Information Extractor

Q2 → A
Transcription (Whisper)

Q3 → B
Vision/OCR

Q4 → C
AI galti kar sakta hai

✅ Challenge ka solution

Extract Invoice Data → IF (total is empty) → true: Gmail "Invoice manual check karo" / false: Add Source → Sheet.

DAY 18

Error Handling, Sub-Workflows & Reliability

"Production mein workflow ka fail hona = client ka gussa."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Demo aur production mein farak: production workflow fail hone par bhi graceful rehta hai aur aapko turant batata hai.

🎯 Aaj ke baad aap yeh kar paoge

01 Error Trigger & global error workflows
🌍 Station master ko har problem ki khabar.
⚙️ Error Trigger workflow → Settings mein har workflow ka Error Workflow set.

02 Retry on fail, continue on error, fallback paths
🌍 Ghanti nahi baji? Phir bajao.
⚙️ Node Settings: Retry on Fail (3, 5s), On Error: Continue (output).

03 Stop and Error node — custom failures
🌍 Teacher ne bola "galat hai, ruko".
⚙️ IF amount < 0 → Stop and Error "Invalid amount".

04 Sub-workflows: Execute Workflow & reusable modules
🌍 Lego ka ek block baar-baar use.
⚙️ Execute Workflow (sub-workflow) with inputs.

05 Idempotency & duplicate prevention
🌍 Attendance do baar nahi lagti.
⚙️ Sheet/DB mein order_id check → mila to skip.

06 Logging & alerting (Slack/Telegram)
🌍 CCTV + alarm.
⚙️ Slack/Telegram alert: workflow, node, error, execution URL.

⏱ Class ka plan (2 ghante)

10m	35m	45m	20m	10m

`0:00-0:10` **Recap**
🪄 *Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.*

`0:10-0:45` **Concept: Reliability Engineering**
🪄 *Cycle ki chain utar gayi to tum ro ke nahi baithte — chadhate ho, nahi chadhi to papa ko bulate ho.*

`0:45-1:30` **Live Build**
Central error handler + alert + retry queue
🪄 *Aaj ki kahani yaad hai — 'Train ka safety system'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.*

`1:30-1:50` **Chaos Lab**
Hum workflow todenge, aap bachaoge
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50–2:00 **Q&A + Homework**

🪄 Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

Error workflow

Har workflow ki settings mein ek "Error workflow" set karo.

🪄 **Analogy:** Fire alarm

CONCEPT 02

Retry on fail

Node fail ho to X baar, Y second ke gap par retry.

🪄 **Analogy:** Phone na lage to dobara try

CONCEPT 03

Continue on fail

Error ko output mein bhejo aur alag handle karo.

🪄 **Analogy:** Plan B

CONCEPT 04

Sub-workflows

Common logic ek jagah — 10 workflows reuse.

🪄 **Analogy:** Lego blocks

🔑 Aaj ka main idea

Reliability = workflow fail ho to bhi system sambhal le: retry kare, alternate raasta le, duplicate na kare, aur turant batade. Production mein yeh sabse zaroori skill hai.

- API down → 3 baar retry → phir Telegram alert
- Duplicate order webhook → ek hi baar process
- Common "send WhatsApp" sub-workflow sab jagah use

📖 Ek kahani se samjho: Train ka safety system

1 🚆 **Train chal rahi hai** = Workflow run

2 ⚠️ **Signal fail ho gaya** = Node error

3 🔁 **Driver ne dobara try kiya** = Retry on fail

4 🛤️ **Doosri line par moda** = Fallback path

5 📟 **Station master ko alert** = Error Trigger → Telegram

🪄 Ek line mein: “Cycle ki chain utar gayi to tum ro ke nahi baithte — chadhate ho, nahi chadhi to papa ko bulate ho.”

🗺️ Aaj ka workflow: Global Error Workflow → Telegram + Log

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Har client project mein add-on (error monitoring) — aam taur par **₹3,000 – ₹8,000 add-on**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1. ⚡ **Error Trigger**
   Kisi bhi workflow ka failure
2. ✏️ **Edit Fields (Set)**
   workflow name, node, error message, execution URL
3. ✈️ **Telegram**
   Alert: "❌ Lead Engine fail — HubSpot 401"
4. 📊 **Google Sheets**
   Error log
5. 🔀 **IF**
   Retryable error (429/5xx)?
6. 🧩 **Execute Workflow (Sub-workflow)**
   Retry queue workflow call

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Telegram bot token (BotFather se)**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] Is workflow ko save karo (Active karne ki zaroorat nahi)
- [ ] Har doosre workflow mein: Settings → Error Workflow → "Day 18 — Global Error Workflow" chuno
- [ ] "Errors" tab headers: workflow, node, error, url, time

✅ Test kaise karein

1. Ek test workflow banao jisme HTTP node galat URL par jaaye, uska Error Workflow set karo
2. Use Active karke fail karwao → Telegram alert aaya?

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Client bole "kaam nahi hua" tab pata chalna — **120 min**

120 min

⚡ Ab (n8n)

2 second mein alert + link — **1 min**

1 min

⏱ Downtime ghante se minute mein. Client ka bharosa bacha.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
❌ {{ $json.workflow.name }} failed at {{ $json.execution.error.node.name }}
{{ $json.execution.error.message }}
🔗 {{ $json.execution.url }}
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "execution": {
    "id": "2231",
    "url": "https://n8n.you.com/execution/2231",
    "error": {
      "message": "401 Unauthorized",
      "node": {
        "name": "HubSpot"
      }
    }
  },
  "workflow": {
    "name": "Lead Engine"
  }
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "alerted": true,
  "logged": true,
  "retry": false
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Ek baar banao, sab workflows par lagao: koi bhi workflow fail ho to 2 second mein Telegram par alert (workflow, node, error, execution link) aur error log sheet mein entry.

Flow: Error Trigger (Koi workflow fail) → Edit Fields (Details nikaalo) → Telegram (Alert) → Google Sheets (Error log)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Global Error Workflow → Telegram + Log" (nodes: On Any Error, Error Details, Telegram Alert, Error Log).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Telegram bot token (BotFather se)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Error workflow banaya par workflows ki settings mein set nahi kiya
- ! Har error par retry (401 retry karne se theek nahi hota)
- ! Alerts itne zyada ki koi dekhe hi nahi

⭐ Pro tips — time bachane wali tricks

- ★ Idempotency key (order ID) se duplicate side-effects roko
- ★ Sub-workflow inputs ko clearly define karo
- ★ Weekly error report — trends dekho

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Global error workflow: kisi bhi workflow fail par Telegram alert with error details + execution link.

📝 Homework

Apne purane 3 workflows mein proper error handling + sub-workflows add karo.

- ☐ Homework ho gaya

BEGINNER
Error workflow → Telegram ☐

INTERMEDIATE
Retry on fail + fallback path ☐

ADVANCED
Dead-letter queue in Postgres + replay ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Same workflow 10 minute mein 3 baar fail ho to alert mein "🔥 Repeated failure" likha aaye.

💡 **Hint 1**
Pichhle errors Error Log sheet mein hain — unhe padh sakte ho.

💡 **Hint 2**
Sheets read → Code mein last 10 min ke same workflow errors gino.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Global failure handler ka trigger?

- (A) Manual
- (B) Form
- (C) Error Trigger
- (D) Webhook

Q2. Kaunsa error retry karne layak?

- (A) 401
- (B) 400 validation
- (C) 404
- (D) 429 / 503

Q3. Reusable logic ke liye?

- (A) Sub-workflow
- (B) Copy-paste
- (C) Sticky note
- (D) Pin

Q4. Custom failure throw karne ka node?

- (A) Sort
- (B) Stop and Error
- (C) NoOp
- (D) Merge

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Node
Workflow ka ek dabba/step. Har node ek kaam karta hai (email bhejna, data laana…).

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Execution
Workflow ka ek baar chalna. Har run ka record Executions tab mein dikhta hai.

Retry
Fail hone par apne aap dobara try karna.

Sub-Workflow
Ek workflow jo doosre workflow ke andar se chalaya jaata hai — reusable block.

Idempotency
Ek hi kaam do baar aaye to bhi result ek hi baar ho (duplicate se bachna).

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 19

Self-Hosting n8n: Docker, VPS & Domains

"Apna khud ka n8n server — unlimited workflows."

☐ **Day 18 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → C
Error Trigger

Q2 → D
429 / 503

Q3 → A
Sub-workflow

Q4 → B
Stop and Error

✅ Challenge ka solution

Error Details → Google Sheets (read Errors) → Code: count rows where workflow same and time > now-10min → Telegram text mein count >= 3 ho to 🔥 prefix.

`adifyskills.com/day/18`

DAY 19

Self-Hosting n8n: Docker, VPS & Domains

"Apna khud ka n8n server — unlimited workflows."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Self-hosting = unlimited executions, data apne paas, client ko kam cost. Har serious automator ko aana chahiye.

🎯 Aaj ke baad aap yeh kar paoge

01 Cloud vs self-hosted: cost & control

🌍 Kiraya vs EMI.
⚙️ Cloud: easy, limits. Self-host: sasta, full control, maintenance.

02 Docker & Docker Compose basics

🌍 Tiffin box — sab ek dabbe mein.
⚙️ docker-compose.yml: n8n + postgres services, volumes.

03 VPS setup (Hostinger VPS / any Ubuntu server)

🌍 Khaali plot.
⚙️ Ubuntu VPS → SSH → Docker install → firewall.

04 Custom domain + SSL (reverse proxy)

🌍 Ghar ka naam board + taala.
⚙️ DNS A record → Caddy/Nginx reverse proxy → Let's Encrypt SSL.

05 Environment variables & Postgres backend

🌍 Ghar ki settings ek list mein.
⚙️ N8N_HOST, WEBHOOK_URL, N8N_ENCRYPTION_KEY, DB_TYPE=postgresdb.

06 Updates, backups & restore

🌍 Ghar ki duplicate chaabi.
⚙️ pg_dump nightly + encryption key safe; docker compose pull && up -d.

⏱️ Class ka plan (2 ghante)

0:00–0:10 Recap

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

0:10–0:40 Concept: Hosting Architecture

🪄 Kiraye ke ghar mein maalik ke rules. Apne ghar mein tumhare rules — par safai bhi tumhe karni hai.

0:40–1:35 Live Setup

Fresh VPS → Docker → n8n + Postgres → domain + SSL

🪄 Aaj ki kahani yaad hai — 'Kiraye ka flat vs apna ghar'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:35–1:50 Checklist Review

Security hardening

🪄 Practice match — jitna yahan girenge, utna asli match mein kam girenge.

1:50-2:00 **Q&A + Homework**

🪄 Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

VPS

Cloud mein apna virtual computer (Ubuntu).

🪄 **Analogy:** Kiraye ka flat jahan aap kuch bhi rakh sakte ho

CONCEPT 02

Docker

App + uski saari dependencies ek "container" mein.

🪄 **Analogy:** Tiffin box — sab packed

CONCEPT 03

Reverse proxy + SSL

Domain → n8n, HTTPS ke saath (Caddy/Nginx).

🪄 **Analogy:** Building ka reception

CONCEPT 04

Encryption key

Credentials encrypt karne ki key — kho gayi to credentials gaye.

🪄 **Analogy:** Locker ki master key

🔑 Aaj ka main idea

Self-hosting = n8n ko apne server (VPS) par Docker se chalana. Domain + HTTPS lagao, Postgres database use karo, aur regular backup lo.

- Hostinger VPS par n8n + Postgres
- n8n.meracompany.com HTTPS ke saath
- Har raat database backup Drive par

📖 Ek kahani se samjho: Kiraye ka flat vs apna ghar

1 — **Cloud = kiraye ka flat** = n8n Cloud

2 — **Apna plot liya** = VPS server

3 — **Ready-made ghar ka dabba** = Docker container

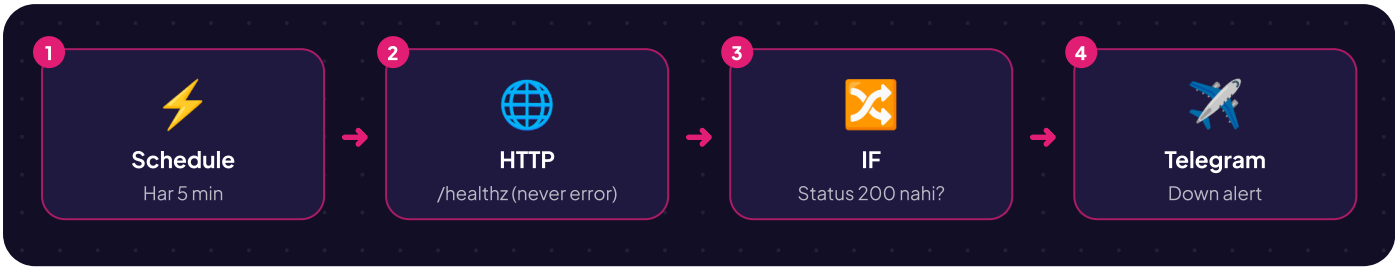

4 — **Ghar ka address board** = Domain + SSL

5 — **Tijori aur backup chaabi** = Postgres + backups

🪄 Ek line mein: “Kiraye ke ghar mein maalik ke rules. Apne ghar mein tumhare rules — par safai bhi tumhe karni hai.”

🗺️ Aaj ka workflow: Self-Hosted n8n + Uptime Monitor

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Clients jo apna n8n chahte hain (VPS setup + monitoring) — aam taur par **₹8,000 – ₹20,000 + maintenance**.
(Andaaza hai; client aur scope ke hisaab se badalta hai.)

🛠 Step-by-step build — n8n kholo aur saath chalo

1. 🖥️ **SSH**
   VPS mein login, apt update
2. 🖥️ **SSH**
   Docker install: curl -fsSL https://get.docker.com | sh
3. 📄 **Read/Write Files from Disk**
   docker-compose.yml: n8n + postgres
4. 🖥️ **SSH**
   DNS A record → VPS IP; Caddy reverse proxy
5. 🖥️ **SSH**
   docker compose up -d
6. ⚡ **Schedule Trigger**
   Nightly backup workflow

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- ☐ Connect: **Telegram bot token (BotFather se)**
- ☐ URL mein apna domain daalo
- ☐ Best practice: yeh monitor kisi DOOSRE n8n / server par chalao (same server down hua to alert kaun bhejega?)

✅ Test kaise karein

1. Galat URL daal ke test karo → alert aana chahiye

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)	⚡ Ab (n8n)
Cloud plan ₹2000+/mahina, limits	VPS ~₹500/mahina, unlimited workflows

⏱ Kharcha kam, control poora — lekin maintenance tumhari.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
services:
  n8n:
    image: docker.n8n.io/n8nio/n8n
    environment:
      - N8N_HOST=n8n.yourbrand.com
      - WEBHOOK_URL=https://n8n.yourbrand.com/
      - DB_TYPE=postgresdb
      - N8N_ENCRYPTION_KEY=${N8N_ENCRYPTION_KEY}
    volumes: [n8n_data:/home/node/.n8n]
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "domain": "n8n.yourbrand.com",
  "vps": "2 vCPU / 4 GB RAM"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "url": "https://n8n.yourbrand.com",
  "ssl": "valid",
  "db": "postgres"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude — 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Aaj VPS par Docker Compose se n8n + Postgres + Caddy (auto HTTPS) chalate hain — ready files neeche hain. Saath mein ek chhota workflow jo har 5 minute aapke n8n ka /healthz check karta hai aur down hone par Telegram alert deta hai.

Flow: Schedule (Har 5 min) → HTTP (/healthz (never error)) → IF (Status 200 nahi?) → Telegram (Down alert)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "Self-Hosted n8n + Uptime Monitor" (nodes: Every 5 Minutes, Ping n8n,
Down?, Down Alert).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
4 nodes · ready to import
`adifyskills.com/workflows/day-19-uptime-monitor.json`

🌐 Lesson page
Copy buttons, quiz aur video links
`adifyskills.com/day/19`

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Telegram bot token (BotFather se)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.

⚠️ Yeh galtiyan sabse common hain

- ! WEBHOOK_URL set na karna — webhooks localhost dikhate hain
- ! Encryption key backup na karna
- ! Volume mount bhool jaana — restart par sab data gayab

⭐ Pro tips — time bachane wali tricks

- ★ Hostinger VPS par n8n ka 1-click template bhi milta hai
- ★ Updates se pehle backup + release notes padho
- ★ Firewall: sirf 22, 80, 443 open

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Live: ek fresh Ubuntu VPS par n8n + Postgres Docker Compose ke saath, apne domain par HTTPS.

📝 Homework

Apna self-hosted instance setup karo aur ek workflow export/import karke migrate karo.

- [ ] Homework ho gaya

BEGINNER
Local Docker par n8n chalao

INTERMEDIATE
VPS + domain + SSL

ADVANCED
Automatic backups to S3/Drive

🧩 Aaj ka challenge — pehle khud try karo

🎯 Monitor ko 2 baar lagataar fail hone par hi alert bhejne do (false alarm kam).

💡 Hint 1
Ek baar fail hone par thoda ruk ke dobara check karo.

💡 Hint 2
Down? true → Wait 1 minute → Ping dobara → IF phir bhi down → alert.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Webhooks ka public URL batane wala env?

(A) NODE_ENV
(B) WEBHOOK_URL
(C) PORT
(D) TZ

Q2. Credentials encrypt karne wali key?

(A) SSH key
(B) SSL cert
(C) N8N_ENCRYPTION_KEY
(D) API_KEY

Q3. Data restart ke baad bhi rahe — kya chahiye?

- (A) Cache
- (B) Cookie
- (C) Nothing
- (D) Docker volume

Q4. HTTPS ke liye?

- (A) Reverse proxy + SSL cert
- (B) Bada server
- (C) Postgres
- (D) Redis

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Docker
Software ko ek ready dabbe (container) mein chalane ka tool — har jagah same chalta hai.

VPS
Kiraye ka online computer/server jo 24×7 chalta hai.

SSL
Website ka taala — https wala lock, data safe rehta hai.

Schedule
Fixed time par workflow chalana — roz, har ghante, har Monday.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 20

Scaling, Security & Workflow DevOps

"Ek client se 50 clients tak — bina tootey."

☐ **Day 19 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → B
WEBHOOK_URL

Q2 → C
N8N_ENCRYPTION_KEY

Q3 → D
Docker volume

Q4 → A
Reverse proxy + SSL cert

✅ Challenge ka solution

Down? (true) → Wait 1 min → HTTP Ping n8n (copy) → IF statusCode != 200 → Down Alert.

WhatsApp par seedha message

`wa.me/919000000000?text=Day%2019%20(Self-Hosting%20n8n%3A%20Docker%2C%20VPS%20%26%20Domains)%20mein%20doubt%20hai%3A%20`

🌐 Day 19 lesson page

Quiz, copy buttons, videos

`adifyskills.com/day/19`

DAY 20

Scaling, Security & Workflow DevOps

"Ek client se 50 clients tak — bina tootey."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Ek client se 50 clients tak jaane ke liye scale, security aur version control chahiye — warna ek galti sab tod deti hai.

🎯 Aaj ke baad aap yeh kar paoge

01 Queue mode with Redis & workers
🌍 Order board + kai chef.
⚙️ EXECUTIONS_MODE=queue, Redis, n8n worker containers.

02 Performance: batching, memory, binary data mode
🌍 Ek baar mein 10 plate, 1000 nahi.
⚙️ Split in Batches, binary data mode = filesystem.

03 Security: credentials, RBAC, secrets, webhook auth
🌍 Ghar ki chaabi sabko nahi dete.
⚙️ Credentials store, user roles, webhook header/basic auth.

04 Version control: export JSON, Git, environments
🌍 Recipe book ki photocopy.
⚙️ n8n API → workflows export JSON → GitHub commit.

05 Testing workflows & staging vs production
🌍 Pehle ghar par try, phir party mein.
⚙️ Staging instance → test data → phir production.

06 Monitoring: execution logs, uptime, metrics
🌍 Dukaan ka CCTV.
⚙️ Execution logs, uptime ping, failed executions count alert.

⏱ Class ka plan (2 ghante)

10m	35m	45m	20m	10m

`0:00-0:10` **Recap**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:45` **Concept: Scale Architecture**

🪄 Ek chef 100 log ka khana nahi bana sakta. 5 chef aur ek order board chahiye.

`0:45-1:30` **Live Build**

Workflow backup to GitHub (auto, nightly)

🪄 Aaj ki kahani yaad hai — 'Restaurant ka bada kitchen'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.

1:30-1:50 **Quiz + Audit**
Module 6 quiz + security audit checklist
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 **Q&A + Homework**
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01
Queue mode
Main instance + Redis + multiple workers — parallel executions.
🪄 **Analogy:** Restaurant: ek order-taker, kai chefs

CONCEPT 02
Binary data mode
Files memory ki jagah disk/S3 par — RAM bachti hai.
🪄 **Analogy:** Saamaan godown mein rakho, kamre mein nahi

CONCEPT 03
Source control
Workflows JSON ko Git mein — history + rollback.
🪄 **Analogy:** Google Docs version history

CONCEPT 04
Least privilege
Har credential ko sirf zaroori permission.
🪄 **Analogy:** Guest ko sirf drawing room ki chaabi

🔑 Aaj ka main idea
Scale = zyada load sambhalna (queue mode, workers, batching). Security = credentials, access aur webhooks ko surakshit rakhna. DevOps = workflows ka version, testing aur monitoring.

- Redis + 3 workers se 10× throughput
- Webhook par header auth
- Har raat workflows GitHub par backup

📖 Ek kahani se samjho: Restaurant ka bada kitchen

1 🧾 **Bahut saare orders aaye** = Executions queue

2 📋 **Order board par lage** = Redis queue

3 👨‍🍳 **5 chef saath kaam karein** = Workers

4 🔐 **Kitchen mein sirf staff** = RBAC + credentials

5 📸 **Har recipe ki copy** = Git version control

🪄 Ek line mein: “Ek chef 100 log ka khana nahi bana sakta. 5 chef aur ek order board chahiye.”

🗺️ Aaj ka workflow: Nightly Workflow Backup → GitHub

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Agencies with many workflows (backup + DevOps) — aam taur par **₹5,000 – ₹15,000 add-on**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1. ⚡ **Schedule Trigger**
   Roz raat 2 baje
2. 🌐 **n8n (API node)**
   Get all workflows
3. 🔁 **Loop Over Items (Split in Batches)**
   Har workflow ek-ek karke
4. 👨‍💻 **Code**
   JSON pretty-print, file name = workflow-name.json
5. 🐙 **GitHub**
   Create/update file in backup repo
6. ✈️ **Telegram**
   "✅ 37 workflows backed up"

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **n8n API key (Settings → n8n API)**
- [ ] Connect: **GitHub (personal access token)**
- [ ] GitHub par private repo "n8n-backups" banao
- [ ] n8n Settings → n8n API → API key banao; credential mein Base URL = https://your-n8n-domain/api/v1
- [ ] GitHub token mein "Contents: read & write" permission do

✅ Test kaise karein

1. "Test workflow" → GitHub repo mein backups/<aaj ki date>/ folder check karo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)	⚡ Ab (n8n)
Ek server, ek line mein sab — slow	Queue mode: workers parallel

⏱ 1000 webhooks/minute bhi bina atke.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
EXECUTIONS_MODE=queue
QUEUE_BULL_REDIS_HOST=redis
N8N_DEFAULT_BINARY_DATA_MODE=filesystem
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "workflows": 37
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "committed": 37,
  "repo": "yourbrand/n8n-backup"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude — 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Har raat 2 baje n8n API se saare workflows nikaalta hai aur har ek ko date-wise folder mein GitHub repo mein commit karta hai. Galti se delete ho jaaye to bhi version wapas.

Flow: Schedule (2:00 AM) → n8n API (Saare workflows) → Code (File path + JSON) → GitHub (Commit file)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "Nightly Workflow Backup → GitHub" (nodes: Every Night 2 AM, Get All
Workflows, Prepare Files, Commit to GitHub).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

Copy buttons, quiz aur video links
`adifyskills.com/day/20`

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "n8n API key (Settings → n8n API)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "GitHub (personal access token)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.

⚠️ Yeh galtiyan sabse common hain

- ! Production mein direct edit — staging nahi
- ! API keys workflow JSON mein hardcoded (Git par leak)
- ! Execution data kabhi prune na karna — DB full

⭐ Pro tips — time bachane wali tricks

- ★ EXECUTIONS_DATA_PRUNE=true + max age set karo
- ★ Credentials kabhi export mat karo Git mein
- ★ Uptime monitoring (UptimeRobot) on /healthz

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Nightly workflow: saare workflows export karke GitHub repo mein commit karna.

📝 Homework

Apne instance ka security audit checklist ke hisaab se karo aur report submit karo.

- ☐ Homework ho gaya

BEGINNER
Workflow manually export/import ☐

INTERMEDIATE
Nightly GitHub backup ☐

ADVANCED
Staging → production promotion flow ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Backup ke baad Telegram par "✅ 12 workflows backed up" message aaye.

💡 Hint 1
Commit ke baad saare items ko gino.

💡 Hint 2
Aggregate ya Code node: return [{ json: { count: $input.all().length } }]

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Parallel executions ke liye mode?

- (A) Queue mode
- (B) Manual mode
- (C) Test mode
- (D) Pin mode

Q2. Queue mode ko kya chahiye?

- (A) SMTP
- (B) Redis
- (C) MongoDB
- (D) FTP

Q3. Workflows ki history ke liye?

(A) Email
(B) Pen drive
(C) Git / source control
(D) Screenshots

Q4. DB full hone se bachne ke liye?

(A) Bada font
(B) More nodes
(C) Kuch nahi
(D) Execution pruning

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Node
Workflow ka ek dabba/step. Har node ek kaam karta hai (email bhejna, data laana…).

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

API
Do apps ke baat karne ka tareeka. Ek app sawaal bhejta hai, doosra jawab (data) deta hai.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

Credential
Kisi app ka login/API key jo n8n safe tareeke se yaad rakhta hai.

Execution
Workflow ka ek baar chalna. Har run ka record Executions tab mein dikhta hai.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 21

Project Sprint 1: AI Customer Support Desk

"24×7 support jo kabhi chhutti nahi leta."

☐ **Day 20 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → A
Queue mode

Q2 → B
Redis

Q3 → C
Git / source control

Q4 → D
Execution pruning

✅ Challenge ka solution

Commit to GitHub → Code: return [{json: {count: $input.all().length}}] → Telegram "✅ {{ $json.count }} workflows backed up".

🌐 Day 20 lesson page

Quiz, copy buttons, videos

`adifyskills.com/day/20`

DAY 21

Project Sprint 1: AI Customer Support Desk

"24×7 support jo kabhi chhutti nahi leta."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Pehla full client-grade project. Yahan student "tutorial follower" se "solution builder" banta hai.

🎯 Aaj ke baad aap yeh kar paoge

01 Client requirement document (SRS) banana

🌍 Darzi pehle naap leta hai.
⚙️ SRS: problem, users, channels, success metric, out-of-scope.

02 Multi-channel inbox: WhatsApp + email + website chat

🌍 Ek darwaza, kai raaste.
⚙️ WhatsApp Trigger + Gmail Trigger + Chat Trigger → common format.

03 RAG knowledge base + AI agent

🌍 Rule book + samajhdaar didi.
⚙️ Vector store tool + AI Agent with system prompt.

04 Ticket creation & human escalation

🌍 Principal ka room.
⚙️ Confidence low / "human" keyword → ticket (Sheet/Freshdesk) + Slack.

05 CSAT feedback loop

🌍 Smiley feedback machine.
⚙️ Reply ke baad 1-5 rating → Sheet → weekly avg.

06 Handover documentation

🌍 Naye manager ke liye diary.
⚙️ Loom video + README: credentials, flows, kaise edit karein.

⏱ Class ka plan (2 ghante)

15m	75m	20m	10m

`0:00-0:15` **Brief & Architecture**

Client brief walkthrough

🪄 *Help desk didi ke paas rule book hai. Jo usme likha hai woh turant batati hai, baaki principal sir ko bhejti hai.*

`0:15-1:30` **Build Sprint**

Guided build in phases with checkpoints

🪄 *Marathon ek saath nahi daudte — har kilometer par paani peete hain. Har phase ek kilometer hai.*

`1:30-1:50` **Demo & Review**

3 students demo

🪄 *Science fair — model dikhao, batao kaise chalta hai, sawaalon ka jawab do.*

1:50-2:00 **Homework**

🪄 Project ka agla page — ghar par likhna hai, kal sabko dikhana hai.

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

SRS

Software Requirement Spec — client kya chahta hai, likhit mein.

🪄 **Analogy:** Ghar banane se pehle naksha

CONCEPT 02

Multi-channel

WhatsApp, email, website — ek hi brain.

🪄 **Analogy:** Ek receptionist, teen phone lines

CONCEPT 03

Escalation

AI na sambhaal paaye to human ko ticket.

🪄 **Analogy:** Junior → senior

CONCEPT 04

CSAT

Customer satisfaction feedback loop.

🪄 **Analogy:** Restaurant ka feedback card

🔑 Aaj ka main idea

Real project = requirement samajhna, architecture banana, phir build. Support desk mein sab channels ek jagah aate hain, AI RAG se jawab deta hai, aur jo nahi aata woh insaan ko jaata hai.

- D2C brand ka WhatsApp support
- Coaching institute ka admission desk
- SaaS ka email support

📖 Ek kahani se samjho: School ka help desk

1 🙋 **Bachche har taraf se sawaal laaye** = WhatsApp + email + chat

2 📖 **Help desk didi ne rule book dekhi** = RAG knowledge base

3 💬 **Aasaan sawaal turant solve** = AI agent answer

4 🎫 **Mushkil wala principal ko** = Ticket + escalation

5 ⭐ **"Kaisa laga?" poocha** = CSAT feedback

🪄 Ek line mein: “Help desk didi ke paas rule book hai. Jo usme likha hai woh turant batati hai, baaki principal sir ko bhejti hai.”

🗺️ Aaj ka workflow: AI Customer Support Desk (Chat + Email → Agent → Ticket)

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

D2C brands, coaching, SaaS (AI support desk) — aam taur par **₹50,000 – ₹1,50,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **WhatsApp Trigger**
Customer message (+ Gmail Trigger for email)

2 ✏️ **Edit Fields (Set)**
Normalize: channel, user_id, text

3 🤖 **AI Agent**
RAG tool + order lookup tool + Postgres Chat Memory

4 🔀 **IF**
needs_human = true?

5 ✅ **ClickUp**
Ticket create + team notify

6 💬 **WhatsApp Business Cloud**
Reply + CSAT 👍/👎

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Gmail (Google OAuth)**
- [ ] Connect: **OpenAI API key**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] Connect: **Slack (OAuth / bot token)**
- [ ] Day 16 wala "Docs Search Tool" (vector store) copy karke is agent mein ai_tool ki tarah jodo
- [ ] "Tickets" tab headers: channel, user, text, output
- [ ] Slack mein #support channel

✅ Test kaise karein

1. Chat mein normal sawaal → AI jawab
2. "Mujhe insaan se baat karni hai" → ticket + Slack
3. Support email bhejo → reply thread mein aaya?

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😫 Pehle (manual)

3 log, 3 inbox, har reply manually — **480 min**

480 min

⚡ Ab (n8n)

70% AI se, 30% team ko ticket — **120 min**

120 min

⏱ Support team ka ~75% time bacha, reply time ghanton se seconds.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
Escalate (needs_human=true) if: refund, legal, angry tone, or 2 failed answers.
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "channel": "whatsapp",
  "from": "+919811122233",
  "text": "Order #4521 kab aayega?"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "reply": "Aapka order #4521 kal tak deliver ho
jayega 🚚",
  "needs_human": false,
  "csat": "asked"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Support agent system prompt

📋 Select karke copy karo

```
Tum "YourBrand" ke support agent ho. Policies:
- Refund 7 din ke andar, unused product.
- Delivery 3-5 working days.
- Order status ke liye order ID maango.
Sirf in policies aur knowledge tool se jawab do. Agar customer gussa hai, refund ₹5000 se upar hai, legal baat hai, ya tumhe pakka nahi pata — sirf likho: ESCALATE: <ek line reason>
```

💬 Client SRS template prompt

📋 Select karke copy karo

```
Act as an automation consultant. Client: {{business}}. Problem: {{problem}}.
Write a 1-page SRS with: goal, users, channels, current process (steps + time), proposed workflow (trigger → steps → output), integrations & credentials needed, edge cases, success metrics, out of scope, timeline. Keep it simple and in bullet points.
```

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Website chat aur email dono ek jagah aate hain. AI agent knowledge base se jawab deta hai; jab confident na ho ya customer "human" bole to ticket sheet mein banta hai aur team ko Slack alert jaata hai.

Flow: Chat + Gmail (2 channels) → Edit Fields (Common format) → AI Agent (KB se jawab) → IF (ESCALATE?) → Ticket + Slack / Reply (Insaan ya AI)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "AI Customer Support Desk (Chat + Email → Agent → Ticket)" (nodes: Website Chat, Support Email, Normalize Chat, Normalize Email, Support Agent, Agent Model, Agent Memory, Escalate?, Create Ticket, Alert Team, Email or Chat?, Reply Email, Chat Answer).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
13 nodes · ready to import
`adifyskills.com/workflows/day-21-ai-support-desk.json`

🌐 Lesson page
Copy buttons, quiz aur video links
`adifyskills.com/day/21`

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Slack (OAuth / bot token)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.
AI node par 401 / 429 error?	401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Har channel ke liye alag agent (maintenance nightmare)
- ! Escalation rules vague
- ! Handover docs ke bina deliver

⭐ Pro tips — time bachane wali tricks

- ★ Ek normalized "message" format banao — sab channels usme convert
- ★ Har AI reply log karo — weekly review
- ★ 3 min Loom demo = portfolio gold

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Full AI support desk: WhatsApp + email → AI agent (RAG) → answer ya ticket + escalation.

📝 Homework

Project ko polish karo, Loom demo video (3 min) record karo.

- ☐ Homework ho gaya

BEGINNER
Sirf email channel ☐

INTERMEDIATE
WhatsApp + email ☐

ADVANCED
Website chat + analytics dashboard ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Har ticket ke saath ek ticket number (TKT-1234) banao aur customer ko batao.

💡 Hint 1
Create Ticket se pehle ek Set node mein number banao.

💡 Hint 2
Expression: {{ 'TKT-' + $now.toFormat('MMddHHmm') }}

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Project shuru karne se pehle?

- (A) Logo
- (B) Invoice
- (C) Deploy
- (D) SRS / requirements

Q2. AI na sambhaal paaye to?

- (A) Human escalation
- (B) Ignore
- (C) Delete
- (D) Retry forever

Q3. Multi-user memory ke liye best?

(A) Sheet cell
(B) Postgres Chat Memory
(C) No memory
(D) Sticky note

Q4. Customer satisfaction metric?

(A) SQL
(B) API
(C) CSAT
(D) CPU

📖 Aaj ke naye shabd

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Agent
AI jo khud decide karta hai kaunsa tool use karna hai — sirf baat nahi, kaam bhi karta hai.

RAG
AI ko pehle aapke documents mein se sahi hissa dhoondh ke dena, phir jawab banwana — open-book exam.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 22

Project Sprint 2: AI Content & Marketing Engine

"Ek idea → 30 din ka content."

☐ **Day 21 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → D
SRS / requirements

Q2 → A
Human escalation

Q3 → B
Postgres Chat Memory

Q4 → C
CSAT

✅ Challenge ka solution

Escalate? true → Set ticket_no = {{ 'TKT-' + $now.toFormat('MMddHHmm') }} → Create Ticket → reply mein ticket_no bhejo.

DAY 22

Project Sprint 2: AI Content & Marketing Engine

"Ek idea → 30 din ka content."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 **Yeh lesson kyun zaroori hai?**

Content engine agencies ka favorite retainer hai — har mahine recurring income.

🎯 Aaj ke baad aap yeh kar paoge

01 Trend research automation (RSS, Reddit, YouTube)
🌍 Reporter har subah khabar laata hai.
⚙️ RSS + Reddit API + YouTube search → top 10 topics.

02 AI content generation with brand voice
🌍 Har akhbaar ki apni bhasha.
⚙️ System prompt mein brand voice + 3 sample posts.

03 Image generation & design templates
🌍 Photo ke bina khabar adhoori.
⚙️ Image generate ya Bannerbear/Canva template fill.

04 Approval workflow (Slack/Telegram buttons)
🌍 Editor ka haan/naa.
⚙️ Telegram inline buttons ✅/❌ → Wait for webhook.

05 Multi-platform scheduling
🌍 Subah 9 baje akhbaar.
⚙️ Schedule queue: LinkedIn, X, Instagram alag time par.

06 Performance analytics loop
🌍 Kaunsi khabar sabse zyada padhi gayi.
⚙️ Weekly: likes/clicks fetch → Sheet → top posts AI ko feedback.

⏱ Class ka plan (2 ghante)

15m	75m	20m	10m

`0:00-0:15` **Brief & Architecture**
🪄 Akhbaar roz chhapta hai kyunki har insaan ka kaam fix hai — reporter, writer, editor. Hamare workflow mein bhi har node ka kaam fix hai.

`0:15-1:30` **Build Sprint**
🪄 Marathon ek saath nahi daudte — har kilometer par paani peete hain. Har phase ek kilometer hai.

`1:30-1:50` **Demo & Review**
🪄 Science fair — model dikhao, batao kaise chalta hai, sawaalon ka jawab do.

`1:50-2:00` **Homework**
🪄 Project ka agla page — ghar par likhna hai, kal sabko dikhana hai.

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

Research automation

Trends RSS/Reddit/YouTube se.

🪄 **Analogy:** Akhbaar padhne wala assistant

CONCEPT 02

Brand kit

Voice, do/don't, examples — prompt mein.

🪄 **Analogy:** Brand ki rulebook

CONCEPT 03

Human approval

Slack/Telegram buttons se.

🪄 **Analogy:** Editor ki sign-off

CONCEPT 04

Feedback loop

Performance data wapas AI ko.

🪄 **Analogy:** Report card se seekhna

🔑 Aaj ka main idea

Content engine ek loop hai: research → create → approve → publish → measure → seekho. Analytics se pata chalta hai kya chala, aur agla content usi hisaab se.

- Agency ke 5 clients ke liye daily LinkedIn posts
- YouTube trending topics se reel scripts
- Weekly newsletter auto

📖 Ek kahani se samjho: Akhbaar ka newsroom

1 — 📡 **Reporter khabar laaye** = Trend research (RSS/Reddit)

2 — ✍️ **Writer ne article likha** = AI + brand voice

3 — 🖼️ **Designer ne photo banayi** = Image generation

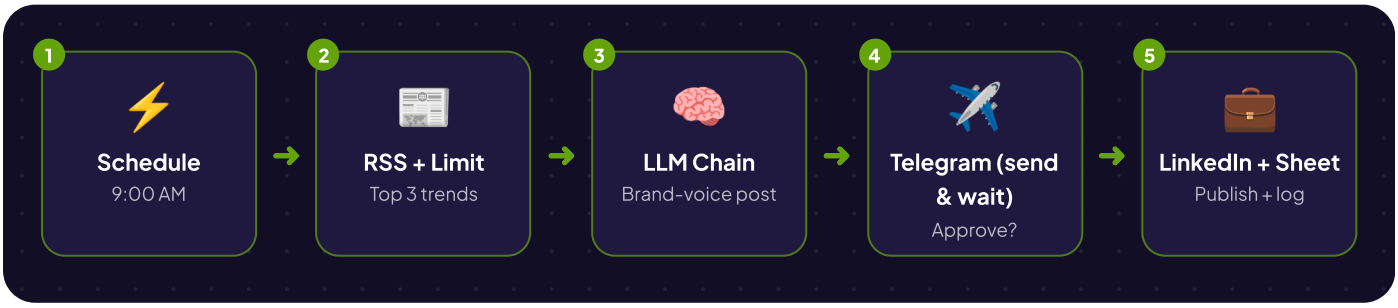

4 — 🤵 **Editor ne OK kiya** = Approval buttons

5 — 🗞️ **Akhbaar chhapa aur bika** = Publish + analytics

🪄 Ek line mein: “Akhbaar roz chhapta hai kyunki har insaan ka kaam fix hai — reporter, writer, editor. Hamare workflow mein bhi har node ka kaam fix hai.”

🗺️ Aaj ka workflow: AI Content Engine with Telegram Approval

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 **Isse kitna kama sakte ho?**

Personal brands, agencies (content engine) — aam taur par **₹30,000 – ₹80,000 + retainer**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1. ⚡ **Schedule Trigger**
   Har Monday 9 AM
2. ⚡ **RSS Feed Trigger**
   Niche ke top 5 feeds (HTTP/RSS Read)
3. 🤖 **AI Agent**
   5 post ideas + drafts (brand kit prompt)
4. 💼 **Slack**
   Approval buttons
5. ⏳ **Wait**
   Approval webhook
6. 💼 **LinkedIn**
   Schedule/publish + Sheets log

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **OpenAI API key**
- [ ] Connect: **Telegram bot token (BotFather se)**
- [ ] Connect: **LinkedIn (OAuth)**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] RSS ko apni niche ke feed se badlo (Reddit: https://www.reddit.com/r/n8n/.rss)
- [ ] LinkedIn credential connect karke node mein apna profile chuno

✅ Test kaise karein

1. Test chalao → Telegram par 3 drafts, ek approve, ek decline karo
2. LinkedIn aur Posts sheet check karo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😫 Pehle (manual)

Research, likhna, design, post — har din — **180 min**

180 min

➜

⚡ Ab (n8n)

Approve karna bas — **15 min**

15 min

⏱ Roz ~2.5 ghante bache, consistency 100%.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo 📋 Select karke copy karo

```
BRAND VOICE: friendly, Hinglish, no jargon, 1 emoji max, end with a question.
```

📦 Sample data — input se output tak

📥 Input 📋 Select karke copy karo

```
{
  "niche": "fitness coaching",
  "feeds": 5
}
```

📤 Output 📋 Select karke copy karo

```
{
  "drafts": 5,
  "approved": 3,
  "published": 3
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Brand voice post prompt 📋 Select karke copy karo

```
Brand voice: friendly expert, short sentences, practical, no buzzwords, Indian audience.
Example post style:
"Most businesses don't need AI. They need fewer copy-paste jobs. Here's how one clinic saved 9 hours a week..."

Topic: {{title}}
Link: {{link}}

LinkedIn post likho: hook line, 3 short insights, automation/AI angle, 1 question for comments, max 150 words, 3 hashtags.
```

💬 Build it with ChatGPT / Claude 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Roz subah trend feed se top 3 topics → AI brand voice mein LinkedIn post likhta hai → aapko Telegram par Approve / Decline button aata hai → approve karte hi LinkedIn par post aur log sheet mein entry.

Flow: Schedule (9:00 AM) → RSS + Limit (Top 3 trends) → LLM Chain (Brand-voice post) → Telegram (send & wait) (Approve?) → LinkedIn + Sheet (Publish + log)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "AI Content Engine with Telegram Approval" (nodes: Every Day 9 AM, Trend
Feed, Top 3, Write Post, Post Model, Ask Approval, Approved?, Post to LinkedIn, Log Post).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚠️ Yeh galtiyan sabse common hain

! Generic AI content — brand voice examples nahi diye
! Approval timeout handle na karna
! Copyright images use karna

⭐ Pro tips — time bachane wali tricks

★ Best performing posts ko few-shot examples banao
★ Wait node mein timeout + reminder
★ Weekly analytics Sheet → AI insights email

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Content engine: research → AI drafts → human approval → auto-publish → weekly analytics.

📝 Homework

Engine ko apne/kisi brand ke liye 1 week chalao aur results share karo.

☐ Homework ho gaya

BEGINNER
RSS → AI summary → Telegram ☐

INTERMEDIATE
Approval flow ☐

ADVANCED
Analytics loop + best time to post ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Decline hone par AI se dusra version banwao (max 1 baar).

💡 Hint 1
Approved? ki false branch ko wapas likhne wale step se jodo.

💡 Hint 2
Loop se bachne ke liye ek counter field rakho (attempt = 2).

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Brand voice ke liye best?

- (A) High temperature
- (B) Kuch nahi
- (C) Examples prompt mein
- (D) Bada model

Q2. Approval ke liye workflow kaise ruke?

- (A) Sort
- (B) Limit
- (C) IF
- (D) Wait (on webhook)

Q3. Recurring schedule?

- (A) Schedule Trigger
- (B) Manual
- (C) Form
- (D) Error Trigger

Q4. AI ko improve karne ke liye?

- (A) Nothing
- (B) Performance feedback loop
- (C) Delete posts
- (D) More emojis

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

Prompt
AI ko diya gaya instruction/sawaal.

Agent
AI jo khud decide karta hai kaunsa tool use karna hai — sirf baat nahi, kaam bhi karta hai.

Schedule
Fixed time par workflow chalana — roz, har ghante, har Monday.

Retainer
Har mahine fixed fees par client ka kaam/maintenance karna.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 23

Project Sprint 3: Finance & Operations Autopilot

“Back-office jo khud chalta hai.”

☐ **Day 22 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → C
Examples prompt mein

Q2 → D
Wait (on webhook)

Q3 → A
Schedule Trigger

Q4 → B
Performance feedback loop

✅ Challenge ka solution

Approved? false → Set attempt=2 → Write Post (prompt mein "different angle, shorter") → Ask Approval. IF attempt=2 aur phir decline → stop.

🌐 Day 22 lesson page

Quiz, copy buttons, videos

`adifyskills.com/day/22`

DAY 23

Project Sprint 3: Finance & Operations Autopilot

"Back-office jo khud chalta hai."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Back-office (finance, HR, ops) mein sabse zyada repetitive kaam — aur sabse kam competition.

🎯 Aaj ke baad aap yeh kar paoge

01 Invoice intake & AI extraction

🌍 Daakiya bill laaya, padh ke diary mein.
⚙️ Gmail Trigger (has:attachment invoice) → AI extract → Sheet.

02 Approval chains & payment reminders

🌍 ₹10k tak bhaiya, upar papa.
⚙️ Switch amount → manager / CFO approval (Slack buttons).

03 Bank/payment reconciliation basics

🌍 Doodh wale ka hisaab milana.
⚙️ Bank statement rows vs invoices → match by amount+date → mismatch list.

04 HR onboarding automation

🌍 Naye bachche ka school mein pehla din.
⚙️ Form submit → Google account, Slack invite, welcome email, task list.

05 Management dashboards

🌍 Mahine ka report card.
⚙️ Schedule month-end → aggregate → chart → email PDF.

06 Client handover & maintenance SLA

🌍 Gaadi ki servicing contract.
⚙️ SLA: response time, monthly fee, kya cover hai, kya nahi.

⏱ Class ka plan (2 ghante)

15m	75m	20m	10m

`0:00-0:15` **Brief & Architecture**

🪄 *Mummy ki diary mein har kharcha likha hota hai aur mahine ke end mein total. Robot yahi diary apne aap bharta hai.*

`0:15-1:30` **Build Sprint**

🪄 *Marathon ek saath nahi daudte — har kilometer par paani peete hain. Har phase ek kilometer hai.*

`1:30-1:50` **Demo & Review**

🪄 *Science fair — model dikhao, batao kaise chalta hai, sawaalon ka jawab do.*

`1:50-2:00` **Capstone brief**

Capstone topics finalize

🪄 *Project ka agla page — ghar par likhna hai, kal sabko dikhana hai.*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

Approval chain

Amount ke hisaab se manager → finance → CEO.

🪄 **Analogy:** Leave application flow

CONCEPT 02

Reminders

Due date se pehle/baad automatic nudges.

🪄 **Analogy:** Kisi ka udhaar yaad dilana

CONCEPT 03

Reconciliation

Bank/payment entries ko invoices se match.

🪄 **Analogy:** Hisaab milana

CONCEPT 04

SLA & maintenance

Delivery ke baad support ka agreement.

🪄 **Analogy:** AMC (annual maintenance)

🔑 Aaj ka main idea

Finance/Ops autopilot = invoices, approvals, reminders, reconciliation aur reports ko jodna. Rule-based steps + AI extraction + human approval jahan paisa jaaye.

- Vendor invoice → manager approval → payment reminder
- Naye employee ka onboarding: email, Slack, docs
- Monthly P&L summary CEO ko

📖 Ek kahani se samjho: Ghar ka hisaab-kitaab robot

1 — 📨 **Bill aaye email mein** = Invoice intake

2 — 🔍 **Robot ne padha** = AI extraction

3 — 👨 **Papa ne approve kiya** = Approval chain

4 — ⏰ **Due date se pehle yaad** = Payment reminders

5 — 📊 **Mahine ka report card** = P&L dashboard

🪄 Ek line mein: "Mummy ki diary mein har kharcha likha hota hai aur mahine ke end mein total. Robot yahi diary apne aap bharta hai."

🗺️ Aaj ka workflow: Finance Autopilot: Invoice Approval + Monthly P&L

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 **Isse kitna kama sakte ho?**

SMEs, startups (finance autopilot) — aam taur par **₹40,000 – ₹1,00,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1. ⚡ **Gmail Trigger**
   Vendor invoice emails
2. ⚡ **Information Extractor**
   Invoice fields
3. 🔀 **Switch**
   Amount < 10k auto, 10k–1L manager, > 1L CFO
4. 💼 **Slack**
   Approval request
5. ⚡ **Schedule Trigger**
   Daily due-date reminders
6. 📊 **Google Sheets**
   Monthly P&L summary + email

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Gmail (Google OAuth)**
- [ ] Connect: **OpenAI API key**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] Sheet tabs: "Payables" (vendor, invoice_no, total, due_date, status) aur "Ledger" (date, type, category, amount)
- [ ] Manager / owner emails badlo

✅ Test kaise karein

1. ₹5,000 aur ₹25,000 ke do sample invoices email karo
2. Bade wale par approval email aana chahiye
3. P&L flow ko manually execute karke dekho

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😫 Pehle (manual)

Accountant ka roz ka data entry + follow-up — **240 min**

240 min

➜

⚡ Ab (n8n)

Exceptions check karna bas — **30 min**

30 min

⏱ **Accountant ka ~85% time analysis par, entry par nahi.**

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo 📋 Select karke copy karo

```
{{ $json.total < 10000 ? "auto" : $json.total ⩽ 100000 ? "manager" : "cfo" }}
```

📦 Sample data — input se output tak

📥 Input 📋 Select karke copy karo

```
{
  "vendor": "Cloud Hosting Co",
  "total": 45000,
  "due": "2026-12-10"
}
```

📤 Output 📋 Select karke copy karo

```
{
  "route": "manager",
  "approved": true,
  "reminder": "2026-12-08"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Do flows ek workflow mein: (1) vendor invoice → AI extraction → ₹10,000 se kam auto-approve, upar wala manager ko email par Approve/Reject → Payables sheet. (2) Har mahine ki 1 tareekh ko sheet se P&L summary email.

Flow: Gmail Trigger (Vendor invoice) → PDF + AI extract (Amount, vendor) → IF (₹10k se upar?) → Gmail send & wait (Manager approval) → Sheets + Monthly P&L (Payables + report)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt 📋 Select karke copy karo

```
I'm building the n8n workflow "Finance Autopilot: Invoice Approval + Monthly P&L" (nodes: Vendor Invoice, PDF Text, Extract, Extract Model, Above 10k?, Manager Approval, Set Status, Payables, 1st of Month, Read Ledger, P&L Summary, Email P&L).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON

`adifyskills.com/day/23`

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.
AI node par 401 / 429 error?	401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Approval history save na karna (audit trail)
- ! Timezone galat — reminder raat 3 baje
- ! Client handover mein credentials ownership clear na karna

⭐ Pro tips — time bachane wali tricks

- ★ Har approval ka who/when log
- ★ Client ke apne accounts par credentials — aapke nahi
- ★ Maintenance retainer proposal ready rakho

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Ops autopilot: invoices → extraction → approval → reminders → monthly P&L summary.

📝 Homework

Capstone project proposal submit karo (problem, solution, architecture diagram).

- [ ] Homework ho gaya

BEGINNER
Due-date reminder

INTERMEDIATE
Approval chain

ADVANCED
Payment reconciliation with fuzzy matching

🧩 Aaj ka challenge — pehle khud try karo

🎯 Due date se 3 din pehle vendor payment ka reminder finance team ko jaaye.

💡 Hint 1
Roz chalne wala ek alag flow chahiye jo Payables padhe.

💡 Hint 2
Schedule daily → Sheets read Payables → Filter due_date = aaj + 3 din → Gmail.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Amount ke hisaab se 3 raaste?

(A) Limit
(B) Switch
(C) Merge
(D) Sort

Q2. Daily reminders ka trigger?

(A) Form
(B) Chat
(C) Schedule Trigger
(D) Webhook

Q3. Audit ke liye kya save karein?

(A) Kuch nahi
(B) Sirf total
(C) Emoji
(D) Approval history

Q4. Delivery ke baad support agreement?

(A) SLA / maintenance
(B) SRS
(C) API
(D) SQL

📖 Aaj ke naye shabd

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Switch
Kai raaston mein se ek chunna — jaise traffic police kisi gaadi ko alag lane mein bhejta hai.

Schedule
Fixed time par workflow chalana — roz, har ghante, har Monday.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 24

Freelancing, Agency & Client Delivery

"Skill ko income mein badlo."

☐ **Day 23 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → B
Switch

Q2 → C
Schedule Trigger

Q3 → D
Approval history

Q4 → A
SLA / maintenance

✅ Challenge ka solution

Schedule (daily 10am) → Read Payables → Filter {{ $json.due_date }} equals {{ $now.plus({ days: 3 }).toFormat('yyyy-MM-dd') }} → Gmail reminder.

DAY 24

Freelancing, Agency & Client Delivery

"Skill ko income mein badlo."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Skill tab tak hobby hai jab tak usse paisa na aaye. Aaj student apna offer, gig aur outreach live karta hai.

🎯 Aaj ke baad aap yeh kar paoge

01 Niche selection & offer creation

🌍 Sab kuch bechne wali dukaan yaad nahi rehti, "best chai" yaad rehti hai.
⚙️ Niche: industry + problem, e.g. "clinics ke liye appointment automation".

02 Portfolio: case studies & demo videos

🌍 Dukaan par "1000+ happy customers" board.
⚙️ Case study: problem → workflow screenshot → result (hours/₹ saved) + 2 min Loom.

03 Upwork, Fiverr, LinkedIn & cold outreach

🌍 Mela mein awaaz lagana.
⚙️ LinkedIn post 3×/week, Upwork proposals, 20 cold DMs/day.

04 Pricing: per project, retainer, value-based

🌍 Chai ₹10, special ₹30, monthly pass.
⚙️ Project ₹15k–50k, retainer ₹10k/mahina, value = saved hours × rate.

05 Proposals, contracts & discovery calls

🌍 Shaadi se pehle rishta pakka.
⚙️ Discovery call → proposal (scope, timeline, price) → contract → 50% advance.

06 Selling n8n templates & productized services

🌍 Ek recipe kai baar bechna.
⚙️ n8n templates, Gumroad, productized "setup in 7 days" package.

⏱ Class ka plan (2 ghante)

10m	40m	40m	20m	10m

`0:00-0:10` **Recap**

🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.

`0:10-0:50` **Masterclass: Getting Clients**

🪄 Nimbu-paani bechne ke liye pehle batana padta hai tumhare paas nimbu-paani hai, kitne ka hai, aur kyun achha hai.

`0:50-1:30` **Workshop**

Apna offer + proposal + gig live banao

🪄 Marathon ek saath nahi daudte — har kilometer par paani peete hain. Har phase ek kilometer hai.

`1:30-1:50` **Mock Sales Call**

Pairs role-play

🪄 Nimbu-paani bechne wala pehle poochta hai — garmi lag rahi hai? Phir glass deta hai.

1:50-2:00 **Capstone check-in**

🪄 Project ka agla page — ghar par likhna hai, kal sabko dikhana hai.

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

Niche + offer

"Main clinics ke liye AI receptionist banata hoon" > "Main automation karta hoon".

🪄 **Analogy:** Specialist doctor vs general

CONCEPT 02

Portfolio

Case study: problem → solution → result + Loom demo.

🪄 **Analogy:** Shop ka showroom

CONCEPT 03

Pricing

Setup fee + monthly retainer; value-based.

🪄 **Analogy:** Gym: joining fee + monthly

CONCEPT 04

Discovery call

Client ka pain samjho, solution baad mein.

🪄 **Analogy:** Doctor pehle symptoms poochta hai

🔑 Aaj ka main idea

Automation skill ko paise mein badalne ke liye: ek niche chuno, ek clear offer banao ("main X ke liye Y karta hoon, Z result"), proof dikhao, roz outreach karo, aur value ke hisaab se price lo.

- "Real estate agents ke liye lead follow-up automation"
- Fiverr gig: "WhatsApp order bot for D2C brands"
- Monthly retainer: maintenance + 2 naye workflows

📖 Ek kahani se samjho: Gully ki chai ki dukaan se brand tak

1 🎯 **Ek cheez mein best (chai)** = Niche

2 🖼️ **Board par photo + review** = Portfolio

3 📣 **Logon ko bulaya** = Outreach (LinkedIn/Upwork)

4 💰 **Sahi daam rakha** = Pricing

5 🤝 **Regular customer bane** = Retainer clients

🪄 Ek line mein: “Nimbu-paani bechne ke liye pehle batana padta hai tumhare paas nimbu-paani hai, kitne ka hai, aur kyun achha hai.”

🗺️ Aaj ka workflow: AI Proposal Generator for Freelancers

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Freelancers & agencies (proposal generator — khud bhi use karo!) — aam taur par **₹10,000 – ₹25,000**.
(Andaaza hai; client aur scope ke hisaab se badalta hai.)

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **n8n Form Trigger**
Apna "Free automation audit" form

2 🤖 **AI Agent**
Lead ke business ke liye 3 automation ideas generate

3 📁 **Google Docs**
Mini proposal auto-create

4 📧 **Gmail**
Proposal + Calendly link bhejo

5 📇 **HubSpot**
Lead pipeline mein add

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **OpenAI API key**
- [ ] Connect: **Gmail (Google OAuth)**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] "Deals" tab headers: client, email, budget, stage, date

✅ Test kaise karein

1. Form mein ek dummy client bharo
2. Gmail Drafts mein proposal padho — edit karke bhejo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)	⚡ Ab (n8n)
Bina offer ke random clients dhoondhna	Clear offer + case study + daily outreach

⏱ Clear niche wale freelancers ko jaldi aur zyada paisa milta hai.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
Hi {{name}}, aapki clinic ke Google reviews dekhe — 3 automations se no-shows ~30% kam ho sakte hain. 15 min call?
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "business": "Dental clinic, Pune",
  "pain": "Missed calls & no-shows"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "ideas": [
    "AI call-back on missed calls",
    "WhatsApp reminders",
    "Review requests"
  ],
  "proposal": "doc link",
  "meeting": "invite sent"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Proposal prompt (workflow ke andar) — 📋 Select karke copy karo

```
You are a senior automation consultant writing a short, clear proposal email.
Client: {{client_name}} ({{business}})
Problem: {{problem}}
Hours wasted per week: {{hours}}
Budget: ₹{{budget}}

Write: 1) one-line understanding of the problem, 2) proposed n8n solution in 3-5 bullets (trigger → steps → result), 3) deliverables, 4) timeline (phases), 5) price: one-time setup + optional monthly maintenance, within budget, 6) ROI: hours saved × ₹500/hour per month, 7) next step: 50% advance to start. Simple English, max 250 words, no hype.
```

💬 Fiverr / Upwork gig prompt — 📋 Select karke copy karo

```
Write a Fiverr gig for an n8n automation freelancer in India targeting {{niche}}.
Include: SEO title (max 80 chars), 3 packages (Basic/Standard/Premium) with deliverables, delivery days and INR + USD prices, a 150-word description with outcomes (hours saved), 5 FAQs, and 5 search tags.
```

💬 LinkedIn cold DM prompt

📋 Select karke copy karo

```
Write 3 short LinkedIn DMs (max 60 words each) to the owner of a {{business_type}}. Mention one specific repetitive task they likely do ({{task}}), offer a free 15-min automation audit, no links in first message, friendly and human.
```

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Discovery call ke baad form bharo (client, business, problem, budget). AI ek professional proposal (scope, timeline, price, ROI) likhta hai, aapke Gmail mein draft ban jaata hai aur CRM sheet mein deal log ho jaati hai.

Flow: Form (Client details) → LLM Chain (Proposal likho) → Gmail (Draft (review karke bhejo)) → Google Sheets (Deals pipeline)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "AI Proposal Generator for Freelancers" (nodes: Discovery Form, Write Proposal, Proposal Model, Gmail Draft, Deals Sheet).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.
AI node par 401 / 429 error?	401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Sabke liye sab kuch offer karna
- ! Hourly pricing se shuru karke value under-sell
- ! Bina demo video ke outreach

⭐ Pro tips — time bachane wali tricks

- ★ Apni hi lead-gen automation banao — best case study
- ★ Upwork par niche keywords + Loom in proposal
- ★ Har client ko retainer offer karo

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Apna automation offer, Fiverr/Upwork gig aur LinkedIn profile live karna — class mein hi.

📝 Homework

10 personalized outreach messages bhejo + capstone final build.

- ☐ Homework ho gaya

BEGINNER
LinkedIn headline + about rewrite ☐

INTERMEDIATE
Fiverr/Upwork gig live ☐

ADVANCED
Apna lead-gen system for your agency ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Proposal ke saath ek follow-up: 3 din baad jawab na aaye to reminder draft.

💡 **Hint 1**
Wait node + ek aur Gmail draft.

💡 **Hint 2**
Deals Sheet ke baad Wait 3 days → Gmail draft "Just checking in".

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Best offer kaisa?

(A) Niche-specific
(B) Sab kuch
(C) Sabse sasta
(D) Vague

Q2. Recurring income ka model?

(A) Barter
(B) Retainer
(C) One-time only
(D) Free

Q3. Discovery call ka focus?

(A) Price
(B) Discount
(C) Client ka pain
(D) Aapka tech stack

Q4. Portfolio mein sabse powerful?

(A) Long resume
(B) Logo
(C) Certificates only
(D) Demo video + result

📖 Aaj ke naye shabd

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Agent
AI jo khud decide karta hai kaunsa tool use karna hai — sirf baat nahi, kaam bhi karta hai.

Retainer
Har mahine fixed fees par client ka kaam/maintenance karna.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 25

Capstone Demo Day & Graduation

DAY 25

Capstone Demo Day & Graduation

"Aaj aap student nahi — Automation Expert ho."

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Demo Day = confidence + portfolio + network. Student yahan se "Automation Expert" ban ke nikalta hai.

🎯 Aaj ke baad aap yeh kar paoge

01 Capstone presentations (5 min each)

🌍 Science fair presentation.
⚙️ Slide 1 problem, 2 architecture, 3 live run, 4 impact, 5 next steps.

02 Peer + mentor scoring

🌍 Judges ke marks.
⚙️ Rubric: kaam karta hai, error handling, clarity, business value.

03 Final assessment

🌍 Final exam.
⚙️ Quiz + ek naya mini-workflow 30 minute mein.

04 Certificate & badges

🌍 Medal aur certificate.
⚙️ Form submit → certificate PDF auto-generate → email (n8n se hi!).

05 Next 90-day roadmap

🌍 New year resolution list.
⚙️ 30 din: 2 clients outreach; 60: 1 retainer; 90: templates product.

06 Alumni network onboarding

🌍 School ke purane bachchon ka group.
⚙️ Alumni community, monthly build session, job/client leads.

⏱ Class ka plan (2 ghante)

90m	15m	15m

`0:00-1:30` **Demo Day**

Student capstone presentations

🪄 *Science fair — model dikhao, batao kaise chalta hai, sawaalon ka jawab do.*

`1:30-1:45` **Awards & Certificates**

Top 3 projects

🪄 *Annual function — medal milta hai, aur agle saal ka plan bhi.*

`1:45-2:00` **Graduation & Roadmap**

What next + alumni

🪄 *Annual function — medal milta hai, aur agle saal ka plan bhi.*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

Demo storytelling

Problem → before → live run → after → impact (time/₹).

🪄 **Analogy:** Movie trailer

CONCEPT 02

Architecture diagram

Ek slide jo poora system dikhaye.

🪄 **Analogy:** Naksha

CONCEPT 03

Peer review

Rubric ke hisaab se scoring.

🪄 **Analogy:** Judges panel

CONCEPT 04

90-day roadmap

Next steps: 3 clients / job / advanced AI.

🪄 **Analogy:** GPS route

🔑 Aaj ka main idea

Demo Day par 5 minute mein: problem kya tha, architecture kaisa hai, live run, aur business impact (time/₹ bacha). Yahi format clients ke saamne bhi kaam aata hai.

- Clinic appointment bot — 10 ghante/hafta bache
- D2C invoice autopilot — 0 manual entry
- AI support desk — 70% auto-resolve

📖 Ek kahani se samjho: Annual function ka stage

1 🎤 **Bachcha stage par aaya** = Capstone presentation

2 🖥️ **Live dikhaya** = Live demo run

3 🏆 **Judges ne marks diye** = Peer + mentor scoring

4 📜 **Certificate mila** = Graduation

5 🚀 **Agle saal ka plan** = 90-day roadmap

🪄 Ek line mein: "Science fair mein tum model dikhate ho aur batate ho kaise kaam karta hai. Aaj tumhara model ek automation hai."

🗺️ Aaj ka workflow: Graduation Certificate Generator

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Coaching institutes, event organisers (certificate automation) — aam taur par **₹8,000 – ₹20,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1. ⚡ **Manual Trigger**
   Capstone live run
2. 🤖 **AI Agent**
   Aapka capstone ka core logic
3. 📊 **Google Sheets**
   Results / metrics
4. 💼 **Slack**
   Demo notification to mentors

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Gmail (Google OAuth)**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] "Alumni" tab headers: name, email, capstone, certificate_id, date
- [ ] Code node mein course naam / colors apne brand ke hisaab se badlo

✅ Test kaise karein

1. Form ka Test URL kholo, apna naam daalo
2. Email mein certificate dekho

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😫 Pehle (manual)
Day 1: "automation kya hota hai?"

➜

⚡ Ab (n8n)
Day 25: client-ready capstone + offer

⏱ 25 din mein beginner se paid freelancer tak.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
5-min demo: 1 min problem · 1 min architecture · 2 min live run · 1 min impact
```

📦 Sample data — input se output tak

📥 Input 📋 Select karke copy karo

```
{
  "capstone": "AI receptionist for clinics"
}
```

📤 Output 📋 Select karke copy karo

```
{
  "score": "92/100",
  "award": "Top Automator 🏆"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Capstone pitch prompt

📋 Select karke copy karo

```
Help me write a 5-minute Demo Day script for my n8n capstone.
Project: {{title}}
Problem: {{problem}}
Workflow: {{trigger → steps → output}}
Result: {{hours/₹ saved}}
Structure: 30s hook, 1 min problem, 2 min live demo talking points, 1 min impact with numbers, 30s next steps. Simple English.
```

💬 90-day roadmap prompt

📋 Select karke copy karo

```
I just finished a 25-day n8n automation course. My skills: {{skills}}. My goal: {{freelance/job/own agency}}. Hours per week: {{hours}}.
Make a 90-day plan with weekly goals: portfolio projects, outreach numbers, learning topics, and income targets. Keep it realistic for India.
```

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Graduation ka automation khud n8n se! Student form bharta hai (naam, email, capstone) → ek sundar HTML certificate banta hai → email par jaata hai → alumni sheet mein entry. Demo Day ke din live chalao.

Flow: Form (Student details) → Code (Certificate HTML + ID) → Gmail (Certificate email) → Google Sheets (Alumni list)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Graduation Certificate Generator" (nodes: Graduation Form, Build Certificate, Email Certificate, Alumni Sheet).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Live demo bina backup recording
- ! Sirf tech dikhana, business impact nahi
- ! Time over karna

⭐ Pro tips — time bachane wali tricks

- ★ Backup Loom video hamesha ready
- ★ Numbers bolo: "30 hrs/week bachaye"
- ★ LinkedIn post same din — visibility

Phir bhi atke? Koi baat nahi 🙂

Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Apna capstone live demo karo — problem, architecture, live run, business impact.

📝 Homework

Capstone ko portfolio + LinkedIn par publish karo. Welcome to the alumni club! 🎓

- [ ] Homework ho gaya

BEGINNER

Capstone ka LinkedIn post

- [ ]

INTERMEDIATE

Case study page

- [ ]

ADVANCED

Capstone ko n8n template ki tarah publish

- [ ]

🧩 Aaj ka challenge — pehle khud try karo

🎯 Certificate email ke saath LinkedIn share link bhi bhejo jo course page kholta ho.

💡 Hint 1

LinkedIn share URL ka format: https://www.linkedin.com/sharing/share-offsite/?url=...

💡 Hint 2

URL ko encode karna padta hai: encodeURIComponent()

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Demo ka sabse important part?

- (A) Font
- (B) Node colors
- (C) Long intro
- (D) Business impact

Q2. Live demo fail ho jaaye to?

- (A) Backup recording
- (B) Rona
- (C) Skip
- (D) Restart PC

Q3. Capstone rubric mein highest weight?

- (A) Length
- (B) Working live demo
- (C) Logo
- (D) Colors

Q4. Course ke baad?

- (A) Sab bhool jao
- (B) Sirf certificate
- (C) 90-day roadmap follow
- (D) Kuch nahi

📖 Aaj ke naye shabd

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Agent
AI jo khud decide karta hai kaunsa tool use karna hai — sirf baat nahi, kaam bhi karta hai.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

🎓 Aakhri din!

Course complete

Agle page par aapka certificate hai — apna naam likho aur share karo.

☐ **Day 25 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → D
Business impact

Q2 → A
Backup recording

Q3 → B
Working live demo

Q4 → C
90-day roadmap follow

✅ Challenge ka solution

Build Certificate mein: const share = 'https://www.linkedin.com/sharing/share-offsite/?url=' + encodeURIComponent('https://yourdomain.com'); email mein button ki tarah lagao.
