CLASS NOTES

💼 Module 4 · Business Automation Playbooks

DAY 12 of 25

Marketing & Social Media Automation

“Ek baar likho, har platform par publish.”

⚡ AAJ HUM YEH BANAYENGE

AI Content Repurposing Engine

Naya blog post RSS par aate hi AI usse 5 platform-specific posts banata hai (LinkedIn, X thread, Instagram caption, newsletter, WhatsApp) aur approval ke liye "Content Queue" sheet mein daal deta hai.

RSS · LinkedIn · X · Mailchimp · Brevo

Naam: _____ Class date: _____

2 ghante ki live class · 7:00 PM – 9:00 PM IST

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Har brand ko roz content chahiye. Ek content pipeline = agency ka recurring retainer.

🎯 Aaj ke baad aap yeh kar paoge

01 Content repurposing pipelines

🌍 Ek kahani — dost ko short, dadi ko detail mein.
⚙️ RSS → AI (JSON: linkedin, thread, newsletter) → har platform.

02 Auto-posting: LinkedIn, X, Instagram, Facebook

🌍 Ek letter kai logon ko post karna.
⚙️ LinkedIn node, X node, Facebook Graph API — schedule time ke saath.

03 YouTube & RSS monitoring

🌍 Favourite channel ki bell icon.
⚙️ YouTube RSS feed → naya video → caption draft.

04 Email marketing: Mailchimp, Brevo

🌍 Society ka notice board — sabko ek saath message.
⚙️ Mailchimp/Brevo: add subscriber + tag, campaign send.

05 UTM tracking & campaign reports

🌍 Customer se poochna "humare baare mein kahan se suna?"
⚙️ Link? utm_source=linkedin&utm_campaign=dec_launch → Sheet report.

06 Competitor & keyword monitoring

🌍 Padosi dukaan ke offers par nazar.
⚙️ Competitor RSS/website HTML → naya offer → Telegram alert.

⏱ Class ka plan (2 ghante)

10m	30m	50m	20m	10m

0:00-0:10 Recap

🪄 *Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.*

0:10-0:40 Concept: Content Ops

🪄 *Ek kahani ko tum dost ko short mein, dadi ko detail mein, aur teacher ko formally sunaate ho — yahi repurposing hai.*

0:40-1:30 Live Build

Blog RSS → AI summary → LinkedIn + X + newsletter

🪄 *Aaj ki kahani yaad hai — 'Ek dal se paanch dishes'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.*

1:30-1:50 Challenge

YouTube new video → Instagram caption draft

🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50-2:00 Q&A + Homework

🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

Repurposing

Ek content → kai formats (post, thread, reel script).

🪄 **Analogy:** Ek dal se 5 dishes

CONCEPT 02

Brand voice prompt

AI ko brand ka tone sikhaana.

🪄 **Analogy:** Naye employee ki training

CONCEPT 03

Approval loop

Publish se pehle human approve kare.

🪄 **Analogy:** Editor ki final sign-off

CONCEPT 04

UTM tracking

Har link par source/medium/campaign tag.

🪄 **Analogy:** Kaunse darwaze se customer aaya

🔑 Aaj ka main idea

Content ops = content banana, alag formats mein badalna, approve karna, publish karna aur performance track karna — ek pipeline mein. AI drafts banata hai, insaan approve karta hai.

- YouTube video → reel script + blog + tweet
- Product launch → email + WhatsApp + Instagram
- Weekly newsletter auto from best posts

📖 Ek kahani se samjho: Ek dal se paanch dishes

1
📰
Naya blog post aaya
= RSS Feed Trigger

2
🍲
Dal = original content
= HTTP (full article)

3
👩‍🍳
Chef ne 5 dishes banayi
= AI: LinkedIn, X, newsletter…

4
👀
Maalik ne taste kiya
= Slack approval

5
🍽️
Serve kiya
= Publish + schedule

🪄 Ek line mein: “Ek kahani ko tum dost ko short mein, dadi ko detail mein, aur teacher ko formally sunaate ho — yahi repurposing hai.”

🔬 Gehraai se samjho — har concept andar se

Kya hai, n8n andar kya karta hai, kab use karein, kab nahi, example aur common galti.

01 Repurposing

📖 **Kya hai:** Ek baar bana content (blog, video) ko kai platforms ke format mein badalna — LinkedIn post, X thread, Instagram caption, newsletter, WhatsApp message.

⚙️ **Andar kaise:** Har platform ke apne niyam hain: LinkedIn par lamba, hook wala post; X par 280 characters ke tukde; Instagram par caption + hashtags; WhatsApp par 2 line + link. AI ko ek hi baar mein saare rules dekar JSON mein 5 outputs maangte hain — fir n8n har output ko alag column/platform mein bhejta hai.

✅ **Kab use karein**
Har brand jo blog/YouTube banata hai par social par regular nahi hai. Agency ke liye monthly retainer service.

⛔ **Kab nahi**
Har platform par word-to-word same text chipkana — reach girti hai. Repurpose = format badalna, copy-paste nahi.

🧪 **Example:** Ek blog "5 automations every clinic needs" → LinkedIn (150 words), 4 tweets, IG caption, newsletter para, WhatsApp blurb.

⚠️ **Common galti:** AI ka output bina padhe publish — galat facts ya brand ke against baat chali jaati hai. Isliye aaj status "pending approval".

🪄 **Ek dal, paanch dishes. Format badlo, message wahi.**

02 Brand voice prompt

📖 **Kya hai:** AI ko brand ki "awaaz" sikhaana — tone (friendly/formal), bhasha (Hinglish/English), kya bolna hai aur kya nahi, emojis kitne.

⚙️ **Andar kaise:** Prompt ke hisse: Role ("Tum ek senior social media writer ho"), Context (blog ka title/summary/link), Rules (har format ki length, structure), Tone, aur Output format (JSON schema). Jitne saaf rules, utna consistent output. 2–3 purane achhe posts examples ke taur par dene se AI style copy kar leta hai.

✅ **Kab use karein**
Har AI content workflow mein — brand voice ek baar likho, har prompt mein reuse karo (Edit Fields ya Sheet mein rakh do).

⛔ **Kab nahi**
Prompt mein 50 rules thoosna — AI aadhe bhool jaata hai. 5–8 sabse zaroori rules rakho.

🧪 **Example:** "Tone: friendly, simple Hinglish, emojis kam. linkedin: 120–180 words, hook line se shuru, 3 bullet takeaways, end mein sawaal."

⚠️ **Common galti:** "Achha post likho" jaisa vague prompt — har baar alag style, alag length. Number aur structure do.

🪄 **Role + Context + Rules + Tone + Format = brand voice prompt.**

03 Approval loop

📖 **Kya hai:** Publish se pehle ek insaan (client/editor) content dekhe aur Approve/Reject kare. AI draft banata hai, insaan final sign-off deta hai.

⚙️ **Andar kaise:** Aasaan tareeka (aaj): Sheet mein status = "pending approval"; client column mein "approved" likhe; ek alag Schedule workflow approved rows publish kare. Advanced: Slack/Telegram par Approve/Reject buttons → Wait node (Resume: On Webhook Call) → button click par workflow wahi se aage.

✅ **Kab use karein**
Brand ke naam se jo bhi public jaaye — posts, emails, ads. Khaaskar shuru ke 1-2 mahine jab tak AI par bharosa na ban jaaye.

⛔ **Kab nahi**
Internal notifications (team alert, report) par approval lagana bekaar delay hai.

🧪 **Example:** Content Queue sheet: title | linkedin | x_thread | … | status = pending approval → client "approved" likhta hai → publish workflow.

⚠️ **Common galti:** Approval ke baad bhi purana draft publish ho jaana kyunki client ne Sheet mein edit kiya par workflow ne pehle wala copy uthaya. Publish ke waqt Sheet se latest text padho.

🪄 **AI likhe, insaan approve kare, tab publish.**

04 UTM tracking

📖 **Kya hai:** UTM tags link ke end mein lagne wale labels hain jo batate hain visitor kahan se aaya: ?utm_source=linkedin&utm_medium=social&utm_campaign=clinic-blog.

⚙️ **Andar kaise:** Google Analytics (aur zyaadatar tools) in tags ko padhkar report banate hain — kitne log LinkedIn se aaye, kitne WhatsApp se, kis campaign se sale hui. n8n mein har platform ke link par alag utm_source expression se jod do — haath se bhoolne ka chance khatam.

✅ **Kab use karein**
Har link jo aap social/email/WhatsApp par share karte ho — tabhi pata chalega kaunsa channel kaam kar raha hai.

⛔ **Kab nahi**
Apni hi website ke andar ke links (menu, buttons) par UTM mat lagao — analytics ka data kharab hota hai.

🧪 **Example:** {{ $json.link }}?utm_source=whatsapp&utm_medium=broadcast&utm_campaign={{ slug }}

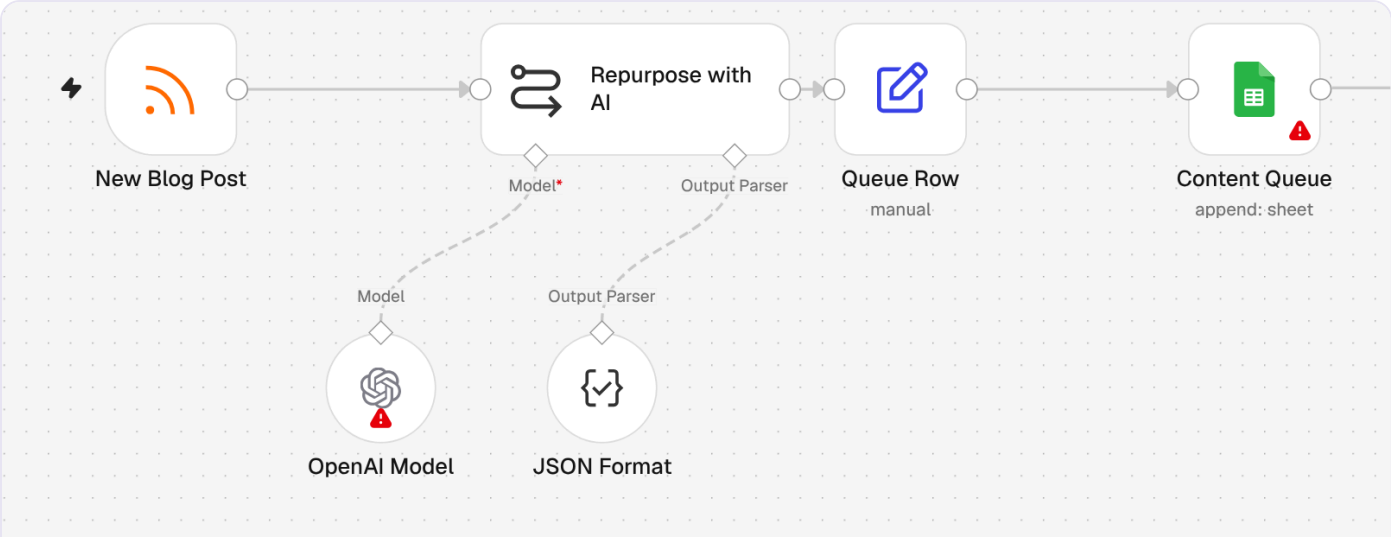

⚠️ **Common galti:** Link mein pehle se ? ho (…?id=5) aur fir se ?utm… jodna — link toot jaata hai. Pehle se ? ho to & lagao.

🪄 **UTM = kaunse darwaze se aaya. source = platform, medium = type, campaign = kaunsa post.**

🗺️ Aaj ka workflow: AI Content Repurposing Engine

Data left se right chalta hai. Har dabba ek n8n node hai.

📸 Asli n8n mein import karne par yeh dikhega. Laal ⚠️ = account (credential) connect karna baaki.

💰 Isse kitna kama sakte ho?

Creators, marketing agencies (content repurposing) — aam taur par **₹10,000 – ₹30,000 + retainer**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1. ⚡ **RSS Feed Trigger**
   Apne blog ka naya post
2. 🌐 **HTTP Request**
   Post ka full content fetch
3. 🧠 **Basic LLM Chain**
   LinkedIn post + X thread + newsletter blurb (JSON output)
4. 💼 **Slack**
   Approval message with Approve/Reject
5. ⏳ **Wait**
   Approval webhook tak ruko
6. 💼 **LinkedIn**
   Approved post publish

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **OpenAI API key**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] RSS URL ko apne blog ke feed se badlo
- [ ] "Content Queue" tab headers: title, link, linkedin, x_thread, instagram, newsletter, whatsapp, status

✅ Test kaise karein

1. RSS trigger par "Fetch test event" dabao
2. AI output JSON check karo
3. Sheet mein row aayi?

AdifySkills DIGITAL MARKETING INSTITUTE +91 83838 91716

Data ka safar — har node ke baad

Aaj ke build mein data kaise badalta hai. Expressions samajhne ki chaabi yahi hai.

1 🔧 New Blog Post

Naya post mila — title, link aur chhota summary.

```
{
  "title": "n8n 2.0: faster editor and AI agents",
  "link": "https://blog.n8n.io/n8n-2-0/",
  "contentSnippet": "n8n 2.0 brings a faster editor, better AI agents and…",
  "pubDate": "Thu, 03 Dec 2026 09:00:00 GMT",
  "creator": "n8n team"
}
```

2 🔧 Repurpose with AI

Model ne prompt padha, parser ne jawab ko JSON mein dhaala. Sab "output" ke andar.

```
{
  "output": {
    "linkedin": "🚀 n8n 2.0 aa gaya — aur automation ab aur tez hai.\n\nTeen badi baatein:\n• …\n\nAap pehle
kya try karoge?",
    "x_thread": [
      "1/ n8n 2.0 is here 🚀 …",
      "2/ …",
      "3/ …",
      "4/ …"
    ],
    "instagram": "Automation ka naya level 🔥 … #n8n #automation …",
    "newsletter": "Is hafte n8n 2.0 launch hua…",
    "whatsapp": "n8n 2.0 aa gaya! 2 min mein padho 👉 https://blog.n8n.io/n8n-2-0/"
  }
}
```

3 🔧 Queue Row

Har format ek column. x_thread ki list ko join karke text banaya. status = pending approval.

```
{
  "title": "n8n 2.0: faster editor and AI agents",
  "link": "https://blog.n8n.io/n8n-2-0/",
  "linkedin": "🚀 n8n 2.0 aa gaya…",
  "x_thread": "1/ n8n 2.0 is here 🚀 …\n\n2/ …",
  "instagram": "…",
  "newsletter": "…",
  "whatsapp": "…",
  "status": "pending approval"
}
```

4 🔧 Content Queue

Sheet mein nayi row — ab client approve karega.

```
{
  "title": "n8n 2.0: faster editor and AI agents",
  "status": "pending approval",
  "…": "(baaki columns)"
}
```

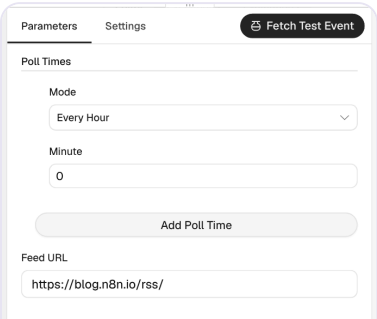

AdifySkills
DIGITAL MARKETING INSTITUTE

Node anatomy — har setting ka matlab

Har zaroori option kya karta hai aur kab badalna hai. Isse aap khud naye workflows bana paoge.

RSS Feed Trigger

Blog par naya post aate hi workflow chalta hai.

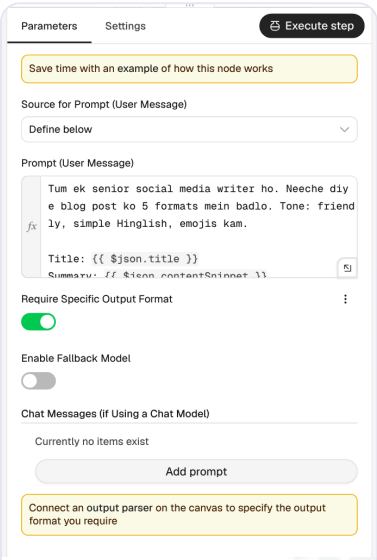

📸 Asli n8n: RSS Feed Trigger

Setting	Kya karti hai	Aaj ki value	Kab badlein
Poll Times	Kitni der mein check kare	`Every Hour`	Roz 1 post ho to Every Day bhi theek
Feed URL	Blog ka RSS address	`https://blog.n8n.io/rss/`	WordPress: site.com/feed · YouTube: channel ka RSS
Naya kya hai?	n8n pichhli baar dekhe items yaad rakhta hai, sirf naye deta hai	–	Pehli activation par purane items nahi aate
Output fields	title, link, contentSnippet, pubDate, creator	–	Prompt mein title + contentSnippet + link

Basic LLM Chain

Ek prompt → AI → jawab. Sabse simple AI node.

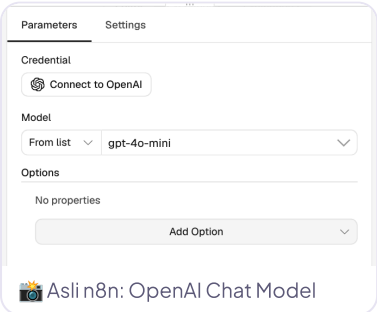

📸 Asli n8n: Basic LLM Chain

Setting	Kya karti hai	Aaj ki value	Kab badlein
Source for Prompt	Connected Chat Trigger Node ya Define below	`Define below`	Chat workflows mein Chat Trigger
Prompt (User Message)	Role + blog data + rules (expressions ke saath)	`Tum ek senior social media writer ho…`	Rules ko numbered list mein likho
Require Specific Output Format	Output Parser jodne ke liye	`On`	JSON chahiye to hamesha On
Model (neeche wala connector)	Kaunsa AI model	`OpenAI Model`	Gemini/Claude/Groq bhi jod sakte ho

OpenAI Chat Model

Chain ko "dimaag" deta hai.

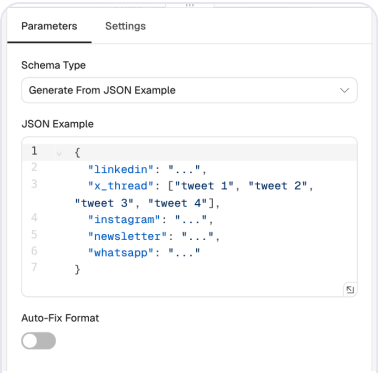

📸 Asli n8n: OpenAI Chat Model

Setting	Kya karti hai	Aaj ki value	Kab badlein
Credential	OpenAI API key	`OpenAI account`	Billing mein credit hona chahiye
Model	Kaunsa model	`gpt-4o-mini`	Sasta aur content ke liye kaafi
Options → Sampling Temperature	0 = same jawab, 1 = creative	`default (0.7)`	Content ke liye 0.7; data nikaalne ke liye 0
Options → Maximum Number of Tokens	Jawab ki max lambai	`default`	5 formats ke liye kam se kam 1500

AdifySkills DIGITAL MARKETING INSTITUTE +91 83838 91716

🔧 Structured Output Parser

AI ka jawab fixed JSON shape mein — taaki har field alag column mein jaaye.

📸 Asli n8n: Structured Output Parser

Setting	Kya karti hai	Aaj ki value	Kab badlein
Schema Type	Generate From JSON Example ya Define using JSON Schema	`From JSON Example`	Example sabse aasaan
JSON Example	Jaisa output chahiye waisa namoona	`{ "linkedin": "...", "x_thread": ["…"], … }`	Array chahiye to example mein array do
Output	Chain ke output mein $json.output.linkedin, $json.output.x_thread…	–	Parser fail ho to "Auto-fix" option wala parser

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😫 Pehle (manual)

Blog padh ke har platform ka post likhna	90 min
Har jagah post karna	20 min
	110 min

⚡ Ab (n8n)

AI drafts + 1-click approve	5 min
	5 min

⏱ Har post par ~1.5 ghante bache.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
You are {{brand}}'s social media writer. Tone: friendly Hinglish. Return JSON {"linkedin":"","thread":[],"newsletter":""}
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "title": "5 automations every clinic needs",
  "link": "https://blog.example.com/clinic-automation"
}
```

📤 Output — 📋 Select karke copy karo

```
{
  "linkedin": "🏥 Clinic owners, 5 automations…",
  "thread": [
    "1/ …",
    "2/ …"
  ],
  "status": "published"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Repurposing prompt (workflow ke andar)

📋 Select karke copy karo

```
Tum ek senior social media writer ho. Neeche diye blog post ko 5 formats mein badlo. Tone: friendly,
simple Hinglish, emojis kam.

Title: {{title}}
Summary: {{summary}}
Link: {{link}}

Rules:
- linkedin: 120-180 words, hook line se shuru, 3 bullet takeaways, end mein sawaal
- x_thread: 4 tweets ka array, har tweet 260 characters se kam
- instagram: caption + 8 hashtags
- newsletter: 80 words ka para + CTA
- whatsapp: 2 line + link

Sirf JSON lautao: {"linkedin","x_thread","instagram","newsletter","whatsapp"}
```

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Naya blog post RSS par aate hi AI usse 5 platform-specific posts banata hai (LinkedIn, X thread,
Instagram caption, newsletter, WhatsApp) aur approval ke liye "Content Queue" sheet mein daal deta hai.

Flow: RSS Feed Trigger (Naya blog post) → Basic LLM Chain (5 formats (JSON)) → Edit Fields (Status:
pending) → Google Sheets (Content Queue)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to
test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "AI Content Repurposing Engine" (nodes: New Blog Post, Repurpose with AI,
OpenAI Model, JSON Format, Queue Row, Content Queue).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **Workflow JSON** wale button par click karo (ya lesson page par 📋 **Copy workflow JSON** dabao).
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ **Workflow JSON**
6 nodes · ready to import
`adifyskills.com/workflows/day-12-ai-content-repurposer.json`

🌐 **Lesson page**
Copy buttons, quiz aur video links
`adifyskills.com/day/12`

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.
AI node par 401 / 429 error?	401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Bina approval auto-publish (brand risk)
- ! Platform character limits ignore karna
- ! Har post par same hashtags

⭐ Pro tips — time bachane wali tricks

- ★ Wait node ka "On webhook call" approval ke liye perfect
- ★ Image ke liye Edit Image node se logo watermark
- ★ Weekly analytics wapas Sheet mein → AI se insights

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Content repurposing engine: ek blog post se 5 platform-specific posts + scheduling.

📝 Homework

Weekly social media performance report auto-generate karke email karo.

- [ ] Homework ho gaya

BEGINNER

RSS → Telegram channel

- [ ]

INTERMEDIATE

YouTube video → Instagram caption draft

- [ ]

ADVANCED

Weekly performance report with AI insights

- [ ]

🧩 Aaj ka challenge — pehle khud try karo

🎯 AI se har post ke liye ek catchy title aur best posting time bhi maango.

💡 Hint 1

JSON Format (output parser) ke example mein naye fields jodo.

💡 Hint 2

Prompt mein bhi likho kya chahiye, aur Queue Row mein naye fields map karo.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

Adify DIGITAL MARKETING INSTITUTE +91 83838 91716

Expression practice sheet

Input dekho aur khaali jagah mein expression likho. Jawab aakhri page par hain.

1. Thread mein kitne tweets?

```
{"output":{"x_thread":["1/ …","2/ …","3/ …","4/ …"]}}
```

Mera jawab: _____

2. Har tweet 280 se chhota?

```
{"output":{"x_thread":["short tweet","another one"]}}
```

Mera jawab: _____

3. Title se campaign slug

```
{"title":"5 Automations Every Clinic Needs"}
```

Mera jawab: _____

4. Link par UTM lagao

```
{"link":"https://blog.example.com/clinic"}
```

Mera jawab: _____

5. Summary mein kitne words?

```
{"contentSnippet":"n8n 2.0 brings faster editor and AI agents"}
```

Mera jawab: _____

2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Publish se pehle human check ko kya kehte hain?

- (A) Scraping
- (B) Approval loop
- (C) Routing
- (D) Parsing

Q2. Naya blog post detect karne ka trigger?

- (A) Form
- (B) RSS Feed Trigger
- (C) Manual
- (D) Error Trigger

Q3. AI se fixed JSON output ke liye?

- (A) Sort
- (B) Wait
- (C) Structured Output Parser
- (D) Merge

Q4. Campaign tracking ke liye?

- (A) Cookies only
- (B) Emoji
- (C) Hashtags
- (D) UTM parameters

📖 Aaj ke naye shabd

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

LLM
Large Language Model — ChatGPT/Claude jaisa AI jo text samajhta aur likhta hai.

Prompt
AI ko diya gaya instruction/sawaal.

HTTP Request
Node jo kisi bhi API ko call kar sakta hai — n8n ka universal connector.

Retainer
Har mahine fixed fees par client ka kaam/maintenance karna.

AdifySkills DIGITAL MARKETING INSTITUTE +91 83838 91716

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 13

E-commerce, Finance & Reporting Automation

"Orders, payments, invoices — sab autopilot par."

☐ **Day 12 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → B
Approval loop

Q2 → B
RSS Feed Trigger

Q3 → C
Structured Output Parser

Q4 → D
UTM parameters

✅ Challenge ka solution

Parser example mein "title": "...", "best_time": "Tue 9 AM" jodo. Prompt rules mein likho. Queue Row: title_ai = {{ $json.output.title }}, best_time = {{ $json.output.best_time }}.

🧪 Expression sheet ke jawab

1. `{{ $json.output.x_thread.length }}` → **4**
2. `{{ $json.output.x_thread.every(t => t.length <= 280) }}` → **true**
3. `{{ $json.title.toLowerCase().replace(/[^a-z0-9]+/g, "-") }}` → **5-automations-every-clinic-needs**
4. `{{ $json.link + "?utm_source=linkedin&utm_medium=social" }}` → **https://blog.example.com/clinic?utm_source=linkedin&utm_medium=social**
5. `{{ $json.contentSnippet.split(" ").length }}` → **8**
