CLASS NOTES

🤖 Module 5 · AI Automation & Agents

DAY 14 of 25

# AI in n8n: LLMs & Prompt Engineering

"Workflows ko dimaag do — AI ke saath."

⚡ AAJ HUM YEH BANAYENGE

## Inbox AI: Classify + Sentiment + Reply Draft

Har naya email AI padhta hai aur sales / support / spam mein baant deta hai. Sales email ka sentiment nikaal ke reply draft Gmail mein bana deta hai, support wala team ko Telegram par, spam "read" mark.

OpenAI | Claude | Gemini | LLM Chain | Output Parser

Naam: _____ Class date: _____

2 ghante ki live class · 7:00 PM – 9:00 PM IST

# Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

**💡 Yeh lesson kyun zaroori hai?**

AI ab har workflow ka hissa hai. Aaj student seekhega ki AI ko "reliable worker" kaise banaye — random chatbot nahi.

## 🎯 Aaj ke baad aap yeh kar paoge

**01 LLMs explained simply: tokens, context, temperature**

🌍 Tote ko jitna yaad, utna hi bolega (context).
⚙️ Token = shabd ka tukda; context window = ek baar mein kitna padh sake.

**02 OpenAI, Anthropic Claude, Gemini & open models in n8n**

🌍 Alag-alag teacher, alag specialty.
⚙️ OpenAI / Claude / Gemini chat model nodes — credential badlo, model badlo.

**03 Basic LLM Chain & chat model nodes**

🌍 Sawaal → jawab, seedha.
⚙️ Basic LLM Chain: prompt mein {{ $json.body }} daalo.

**04 Prompt engineering frameworks (role, task, format)**

🌍 Teacher ko clear instruction: "Tum maths teacher ho, 3 steps mein samjhao."
⚙️ Role + Task + Context + Format + Example.

**05 Structured output parsers (JSON)**

🌍 Form bharwana, essay nahi.
⚙️ Structured Output Parser: {category, sentiment, reply}.

**06 Cost control & model selection**

🌍 Chhote kaam ke liye auto, bade ke liye taxi.
⚙️ Classification = mini model; complex reasoning = bada model.

## ⏱ Class ka plan (2 ghante)

| 10m | 40m | 40m | 20m | 10m |
|---|---|---|---|---|

**0:00–0:10 Recap**

*🪄 Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.*

**0:10–0:50 Concept: LLMs & Prompts**

Bad vs good prompt live comparison

*🪄 Ek tota hai jisne poori library padh li. Tum jitna saaf sawaal poochoge, utna achha jawab dega.*

**0:50–1:30 Live Build**

AI email classifier + reply drafter

*🪄 Aaj ki kahani yaad hai — 'Bahut padha-likha tota'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.*

**1:30–1:50 Prompt Battle**

Best prompt wins

*🪄 Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

**1:50–2:00 Q&A + Homework**

*🪄 Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

# Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

### LLM

Bahut saara text padh chuka model jo agla word predict karta hai.

🪄 **Analogy:** Bahut padha-likha intern

CONCEPT 02

### Tokens & context

Model ek baar mein kitna text dekh sakta hai; cost tokens par.

🪄 **Analogy:** Exam ki answer sheet ke pages

CONCEPT 03

### Temperature

Kam = consistent, zyada = creative.

🪄 **Analogy:** Strict teacher vs creative writer

CONCEPT 04

### Prompt framework

Role + Task + Context + Format + Examples.

🪄 **Analogy:** Clear job description

### 🔑 Aaj ka main idea

LLM ek next-word predict karne wala bada model hai. Hum use prompt dete hain (role + task + format) aur woh text ya JSON lautata hai. n8n mein yeh ek node ki tarah kaam karta hai.

- Email ko sales/support/spam mein baantna
- Review ka sentiment positive/negative
- Lamba document 5 bullet summary mein

## 📖 Ek kahani se samjho: Bahut padha-likha tota

1 🦜 **Tote ne lakhon kitabein padhi** = LLM (trained model)

2 🗣️ **Tumne sawaal poocha** = Prompt

3 🧩 **Tota shabd-shabd jodta hai** = Tokens

4 🎚️ **Seedha jawab ya creative** = Temperature

5 📋 **Jawab form mein bharo** = Structured output (JSON)

🪄 Ek line mein: “Ek tota hai jisne poori library padh li. Tum jitna saaf sawaal poochoge, utna achha jawab dega.”

# 🔬 Gehraai se samjho — har concept andar se

Kya hai, n8n andar kya karta hai, kab use karein, kab nahi, example aur common galti.

## 01 LLM

📖 **Kya hai:** LLM (Large Language Model) jaise GPT, Gemini, Claude — aisa model jisne internet ka bahut saara text padha hai aur ab aapke text ka matlab samajh kar jawab likh sakta hai.

⚙️ **Andar kaise:** Model asal mein agla shabd (token) predict karta hai — ek-ek karke poora jawab banata hai. Isliye woh bahut achha likhta hai, par facts galat bhi bana sakta hai (hallucination). n8n mein model ek "sub-node" hai jo kisi AI node (Chain, Agent, Classifier) se judta hai — model badalna ho to sirf sub-node badlo, baaki workflow same.

✅ **Kab use karein**
Text samajhna aur likhna: email classify, reply draft, summary, translation, data nikaalna, content.

⛔ **Kab nahi**
Exact calculation (GST, totals) — woh Code/expression se karo. Aur jo cheez 100% sahi honi chahiye (legal, medical), wahan AI ka output insaan check kare.

🧪 **Example:** Text Classifier + gpt-4o-mini: "Mujhe clinic ke liye quote chahiye" → sales.

⚠️ **Common galti:** AI ko maths karwana ("total kitna hua?") — kabhi-kabhi galat jod deta hai. AI se numbers nikalwao, jod Code se karo.

🪄 **LLM = padha-likha intern. Likhne mein tez, hisaab mein Code behtar.**

## 02 Tokens & context

📖 **Kya hai:** Token text ka chhota tukda hai (lagbhag ¾ English word; Hindi/Hinglish mein zyada tokens lagte hain). Model ka bill aur limit dono tokens mein ginte hain.

⚙️ **Andar kaise:** Context window = model ek baar mein kitne tokens dekh sakta hai (prompt + data + jawab). Input tokens (jo bheja) aur output tokens (jo likha) dono ka paisa lagta hai — output mehenga hota hai. Poora email thread bhejne ki jagah snippet/summary bhejo — tez bhi, sasta bhi.

✅ **Kab use karein**
Har AI workflow banate waqt socho: kitna text bhej raha hoon, kitne emails/din, mahine ka kharcha kitna?

⛔ **Kab nahi**
Har email ka poora HTML (signatures, purane replies) model ko mat bhejo — 90% tokens bekaar.

🧪 **Example:** gpt-4o-mini par 1 email classify ≈ 300 tokens. 1,000 emails/din bhi kuch hi rupaye/din.

⚠️ **Common galti:** 50 page ka PDF seedha prompt mein daal dena — context limit cross ya bahut mehenga. Lambe docs ke liye RAG (Day 16).

🪄 **Token = paisa. Kam aur saaf text bhejo.**

## 03 Temperature

📖 **Kya hai:** Temperature batata hai model kitna "creative" ho. 0 = har baar lagbhag same, seedha jawab. 1 = zyada variety aur creativity.

⚙️ **Andar kaise:** Model har agle shabd ke liye kai options mein se chunta hai. Kam temperature par sabse sambhav shabd chunta hai; zyada par kam-sambhav shabd bhi chun leta hai. Model sub-node ke Options → Sampling Temperature mein set hota hai.

✅ **Kab use karein**
Classification, data extraction, yes/no faisle → 0 se 0.2. Reply drafts → 0.4–0.7. Social posts, ideas → 0.7–1.

⛔ **Kab nahi**
Classifier par temperature 1 — same email kabhi sales, kabhi support. Faisle wale kaam par kabhi zyada mat rakho.

🧪 **Example:** Classifier Model: 0 · Reply Model: 0.5.

⚠️ **Common galti:** Ek hi model sub-node do kaamon (classify + creative reply) mein share karna. Alag sub-nodes rakho, alag settings.

🪄 **Faisla = 0. Likhna = 0.5. Ideas = 0.8.**

## 04 Prompt framework

📖 **Kya hai:** Achha prompt ek saaf job description jaisa hota hai: Role (tum kaun ho), Task (kya karna hai), Context (data), Format (jawab kis shape mein), Examples (namoona).

⚙️ **Andar kaise:** n8n mein prompt ke andar expressions se live data jaata hai ({{ $json.Subject }}). Format ke liye Structured Output Parser lagao — AI ka jawab JSON mein aata hai ($json.output.reply). Prompt mein "agar pata na ho to X bolo" jaisa niyam hallucination kam karta hai.

✅ **Kab use karein**
Har AI node. Ek baar achha prompt likho, Sheet/Edit Fields mein rakho, kai workflows mein reuse karo.

⛔ **Kab nahi**
Prompt mein secrets (API keys, passwords) ya customers ka zaroorat se zyada personal data mat daalo.

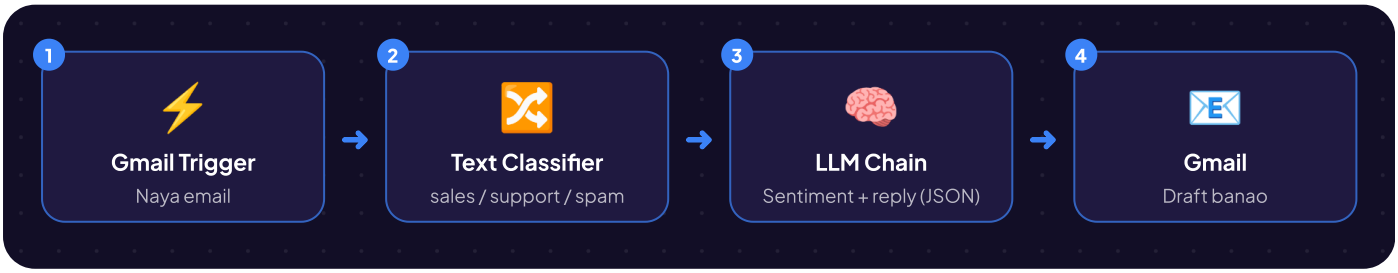

🧪 **Example:** Role: helpful sales assistant · Task: sentiment + 3 line reply · Context: From/Subject/Email · Format: { "sentiment", "reply" }.

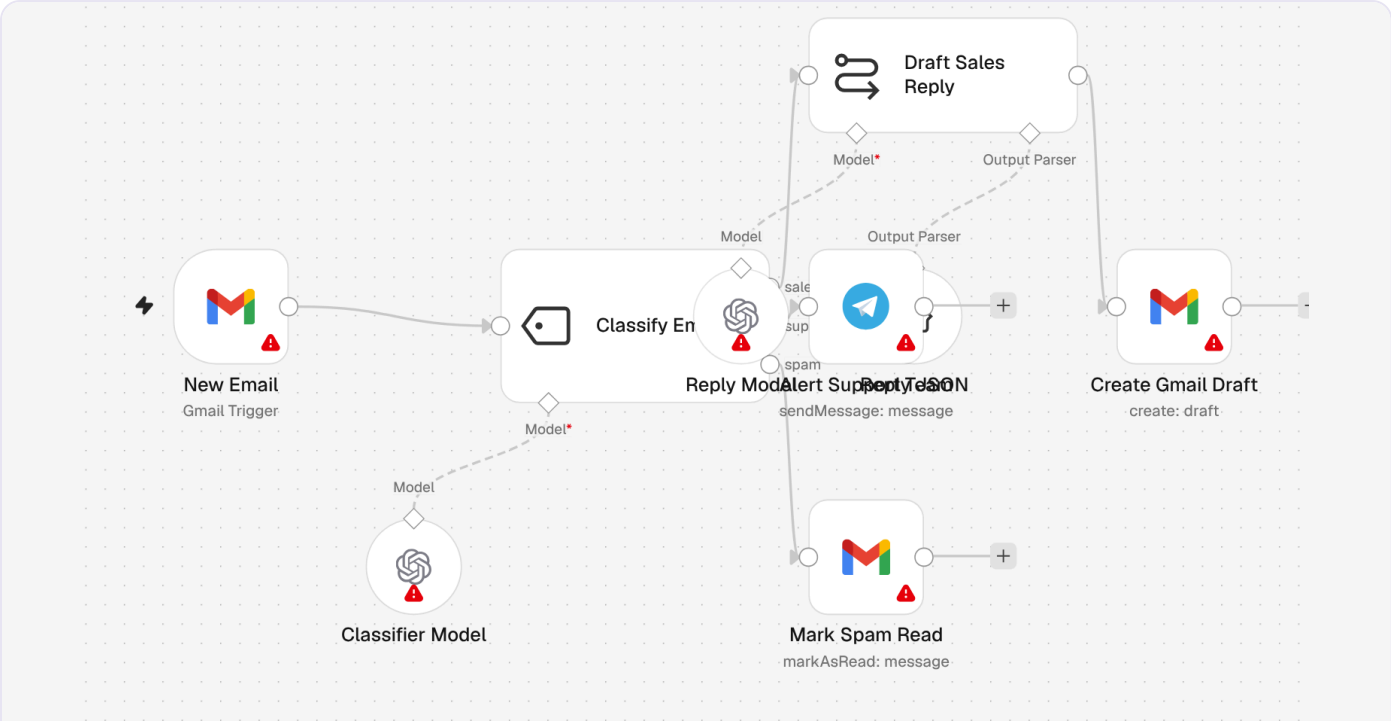

⚠️ **Common galti:** "Reply likho" — itna hi. Na tone, na length, na format → har baar alag. Framework ke 5 hisse bharo.

🪄 **Role + Task + Context + Format + Examples.**

## 🗺️ Aaj ka workflow: Inbox AI: Classify + Sentiment + Reply Draft

Data left se right chalta hai. Har dabba ek n8n node hai.

📸 Asli n8n mein import karne par yeh dikhega. Laal ⚠️ = account (credential) connect karna baaki.

### 💰 Isse kitna kama sakte ho?

Agencies, SaaS (AI inbox triage) — aam taur par **₹15,000 – ₹35,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

## 🛠 Step-by-step build — n8n kholo aur saath chalo

**1** ⚡ **Gmail Trigger**
Naya email inbox mein

**2** 🔀 **Text Classifier**
Categories: sales, support, billing, spam

**3** 🏷️ **Sentiment Analysis**
Positive / neutral / negative

**4** 🧠 **Basic LLM Chain**
Reply draft (brand tone) + Structured Output Parser

**5** 📧 **Gmail**
Draft create + label lagao

**6** 💼 **Slack**
Negative + support → team alert

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

### 🔑 Setup (import ke baad)

- [ ] Connect: **Gmail (Google OAuth)**
- [ ] Connect: **OpenAI API key**
- [ ] Connect: **Telegram bot token (BotFather se)**
- [ ] Pehle ek test Gmail account par chalao

### ✅ Test kaise karein

1. Apne aap ko 3 email bhejo: price poochne wala, complaint wala, promo wala
2. Gmail Trigger "Fetch test event" → har branch dekho
3. Gmail Drafts folder check karo

AdifySkills
DIGITAL MARKETING INSTITUTE
+91 83838 91716

# 🚚 Data ka safar — har node ke baad

Aaj ke build mein data kaise badalta hai. Expressions samajhne ki chaabi yahi hai.

## 1 📧 New Email

Simplify ON — kaam ke fields seedhe mil gaye.

```
{
  "id": "18c9a4f2b7e1d0c3",
  "threadId": "18c9a4f2b7e1d0c3",
  "snippet": "Hi, humein apni clinic ke liye WhatsApp booking automation chahiye. Budget 40k ke aas-paas
hai…",
  "From": "Dr. Mehta <dr.mehta@clinic.in>",
  "To": "hello@adifyskills.com",
  "Subject": "WhatsApp automation quote",
  "labelIds": [
    "INBOX",
    "UNREAD"
  ]
}
```

## 2 📧 Classify Email

AI ne "sales" chuna → output 0. Item jaisa tha waisa hi aage gaya (sirf raasta chuna).

```
{
  "sales (1 item)": "WhatsApp automation quote",
  "support (0)": "—",
  "spam (0)": "—"
}
```

## 3 🔧 Draft Sales Reply

Parser ne jawab JSON mein diya — output ke andar.

```
{
  "output": {
    "sentiment": "positive",
    "reply": "Hi Dr. Mehta, thanks for reaching out! WhatsApp booking automation is exactly what we build for
clinics. Would a quick 15-min call this week work to understand your setup?"
  }
}
```

## 4 📧 Create Gmail Draft

Gmail mein draft ban gaya — owner bas review karke Send karega.

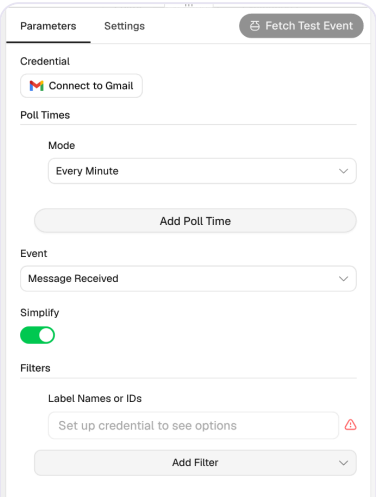

```
{
  "id": "r-48213377150214",
  "message": {
    "id": "18c9a4f9c2d3e4f5",
    "threadId": "18c9a4f9c2d3e4f5",
    "labelIds": [
      "DRAFT"
    ]
  }
}
```

# Node anatomy — har setting ka matlab

Har zaroori option kya karta hai aur kab badalna hai. Isse aap khud naye workflows bana paoge.

## Gmail Trigger

Inbox mein naya email aate hi workflow chalata hai.

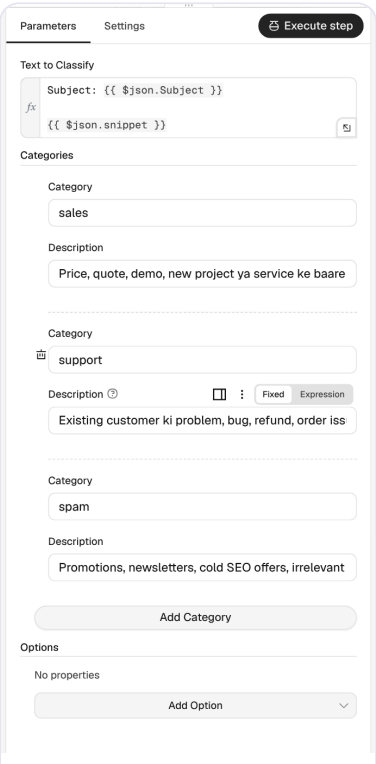

📸 Asli n8n: Gmail Trigger

| Setting | Kya karti hai | Aaj ki value | Kab badlein |
|---|---|---|---|
| **Credential** | Gmail OAuth2 | `Gmail account` | — |
| **Poll Times** | Kitni der mein check kare | `Every Minute` | Live par Every 5 Minutes kaafi |
| **Simplify** | Chhota output: From, To, Subject, snippet | `On` | Poora body/attachments chahiye to Off |
| **Filters → Label Names or IDs** | Kaunse label ke emails | `INBOX` | Search (q) se: from:... -category:promotions |

## Text Classifier

Har email ko ek category mein daal kar alag raaste bhejta hai.

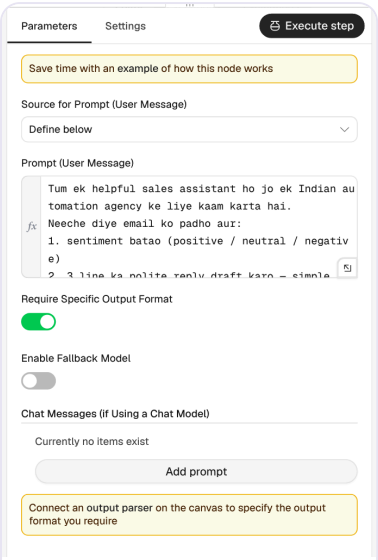

📸 Asli n8n: Text Classifier

| Setting | Kya karti hai | Aaj ki value | Kab badlein |
|---|---|---|---|
| **Text to Classify** | AI ko kya padhaana | `Subject: {{ $json.Subject }} + snippet` | Poora body mehenga; subject + snippet kaafi |
| **Categories** | Naam + description (description hi asli instruction hai) | `sales · support · spam` | Description mein examples do |
| **Options → Allow Multiple Classes To Be True** | Ek email kai categories mein | `Off` | Off = har email sirf ek raaste |
| **Options → When No Clear Match** | Discard Item ya Output on Extra "Other" Branch | `Discard` | "Other" branch lagao taaki koi email gum na ho |
| **Outputs** | Har category ka apna output (upar se neeche) | `0 sales · 1 support · 2 spam` | Category order = output order |

## 🧠 Basic LLM Chain — reply draft

Sentiment + reply ek saath, JSON mein.

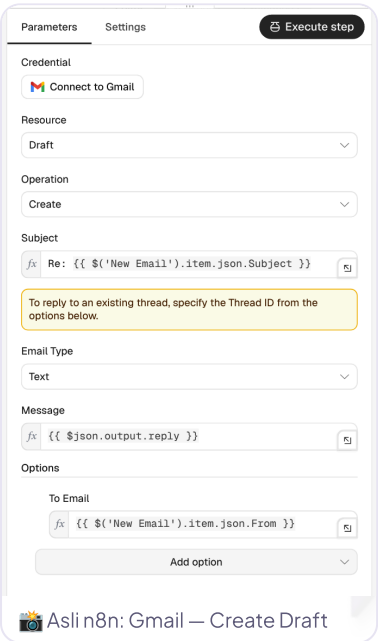

📸 Asli n8n: Basic LLM Chain — reply draft

| Setting | Kya karti hai | Aaj ki value | Kab badlein |
|---|---|---|---|
| **Prompt** | Role + 2 tasks + email data | `Tum ek helpful sales assistant ho…` | "koi fake promise nahi" jaisa niyam zaroor |
| **Data kahan se** | $("New Email").item.json — kyunki classifier ke baad bhi original chahiye | `From, Subject, snippet` | — |
| **Require Specific Output Format** | On + Structured Output Parser | `Reply JSON` | {"sentiment", "reply"} |
| **Model** | Alag sub-node (Reply Model) | `gpt-4o-mini` | Temperature 0.5 — thoda natural |

## 📧 Gmail — Create Draft

Seedha bhejne ki jagah draft — insaan dekh kar Send dabaye.

📸 Asli n8n: Gmail — Create Draft

| Setting | Kya karti hai | Aaj ki value | Kab badlein |
|---|---|---|---|
| **Resource / Operation** | Draft → Create | `Create` | Bharosa ban jaaye tab Message → Reply |
| **Subject** | Re: + original subject | `Re: {{ $("New Email").item.json.Subject }}` | — |
| **Message** | AI ka reply | `{{ $json.output.reply }}` | — |
| **Options → Send To** | Draft kisko jaayega | `{{ $("New Email").item.json.From }}` | Thread mein rakhne ke liye Options → Thread ID |

# ⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

**😩 Pehle (manual)**

| | |
|---|---|
| Har email padhna | 3 min |
| Category decide karna | 1 min |
| Reply likhna | 6 min |
| | 10 min |

**⚡ Ab (n8n)**

| | |
|---|---|
| AI classify + draft, insaan bas check kare | 1 min |
| | 1 min |

⏱ 100 emails/din par ~15 ghante → 2 ghante.

## ⌨️ Aaj ka key snippet

**Copy karke n8n mein paste karo** — 📋 Select karke copy karo

```
ROLE: You are a support lead at {{brand}}.
TASK: Draft a reply.
RULES: Hinglish, max 80 words, never promise refunds.
FORMAT: JSON {"reply":"","needs_human":true|false}
```

## 📦 Sample data — input se output tak

**📥 Input** — 📋 Select karke copy karo

```
{
  "from": "customer@mail.com",
  "subject": "Refund chahiye",
  "body": "Mera course access kaam nahi kar raha,
bahut frustrating hai."
}
```

**📤 Output** — 📋 Select karke copy karo

```
{
  "category": "support",
  "sentiment": "negative",
  "draft": "Hi! Sorry for the trouble 🙏 Humari team
ne aapka access reset kar diya hai…"
}
```

# 💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

**💬 Sales reply prompt (workflow ke andar)** — 📋 Select karke copy karo

```
Tum ek helpful sales assistant ho jo ek Indian automation agency ke liye kaam karta hai.
Neeche diye email ko padho aur:
1. sentiment batao (positive / neutral / negative)
2. 3 line ka polite reply draft karo — simple English, koi fake promise nahi, end mein 15-min call ka
offer.

From: {{from}}
Subject: {{subject}}
Email: {{body}}
```

### 💬 Classifier categories

📋 Select karke copy karo

```
sales: Price, quote, demo, new project ya service ke baare mein poochna
support: Existing customer ki problem, bug, refund, order issue
spam: Promotions, newsletters, cold SEO offers, irrelevant
```

### 💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Har naya email AI padhta hai aur sales / support / spam mein baant deta hai. Sales email ka sentiment nikaal ke reply draft Gmail mein bana deta hai, support wala team ko Telegram par, spam "read" mark.

Flow: Gmail Trigger (Naya email) → Text Classifier (sales / support / spam) → LLM Chain (Sentiment + reply (JSON)) → Gmail (Draft banao)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

### 💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Inbox AI: Classify + Sentiment + Reply Draft" (nodes: New Email, Classify Email, Classifier Model, Draft Sales Reply, Reply Model, Reply JSON, Create Gmail Draft, Alert Support Team, Mark Spam Read).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

## 📥 Workflow ko n8n mein kaise laayein

1. **Workflow JSON** wale button par click karo (ya lesson page par 📋 **Copy workflow JSON** dabao).
2. Poora text copy karo ( `Ctrl` + `A` , `Ctrl` + `C` ).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ **Workflow JSON**
9 nodes · ready to import
adifyskills.com/workflows/day-14-inbox-ai-classifier.json

🌐 **Lesson page**
Copy buttons, quiz aur video links
adifyskills.com/day/14

# Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

| Agar yeh ho raha hai… | To yeh karo |
|---|---|
| **Node par laal ⚠️ triangle?** | Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo. |
| **Node par laal ⚠️ triangle?** | Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo. |
| **Node par laal ⚠️ triangle?** | Account connect nahi hua. Node kholo → Credential → "Telegram bot token (BotFather se)" connect karo. |
| **Time par apne aap nahi chala?** | "Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo. |
| **AI node par 401 / 429 error?** | 401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo. |

### ⚠️ Yeh galtiyan sabse common hain

- ! Prompt mein format na batana → output parse nahi hota
- ! Temperature high rakhna classification ke liye
- ! Har email par sabse mehenga model

### ⭐ Pro tips — time bachane wali tricks

- ★ Classification ke liye chhota/sasta model kaafi hai
- ★ Structured Output Parser + "Auto-fix" se reliable JSON
- ★ Prompts ko Sheet mein store karo — bina workflow edit kiye badlo

**Phir bhi atke? Koi baat nahi 🙂**
Screenshot + error message ke saath WhatsApp par poochho →

# Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

### 🛠 Live lab

Inbox AI: incoming email ko classify (sales/support/spam), sentiment nikaalo aur reply draft banao.

### 📝 Homework

10 prompts ki apni prompt library banao with structured JSON output.

- ☐ Homework ho gaya

**BEGINNER**
Review ko positive/negative classify ☐

**INTERMEDIATE**
Prompt library 10 prompts JSON output ke saath ☐

**ADVANCED**
Model fallback: OpenAI fail → Gemini ☐

## 🧩 Aaj ka challenge — pehle khud try karo

**🎯 Category mein "partnership" bhi jodo aur aise emails founder ko forward karo.**

**💡 Hint 1**
Text Classifier mein categories ki list editable hai.

**💡 Hint 2**
Naya category banate hi node ka ek naya output banta hai — wahan Gmail node lagao.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

AdifySkills DIGITAL MARKETING INSTITUTE +91 83838 91716

# Expression practice sheet

Input dekho aur khaali jagah mein expression likho. Jawab aakhri page par hain.

**1. From se sirf email**

```
{"From":"Dr. Mehta <dr.mehta@clinic.in>"}
```

Mera jawab: _____

**2. From se sirf naam**

```
{"From":"Dr. Mehta <dr.mehta@clinic.in>"}
```

Mera jawab: _____

**3. Reply subject**

```
{"Subject":"WhatsApp automation quote"}
```

Mera jawab: _____

**4. Negative sentiment hai?**

```
{"output":{"sentiment":"negative"}}
```

Mera jawab: _____

**5. Alert ke liye chhota preview**

```
{"snippet":"Hi, humein apni clinic ke liye WhatsApp booking chahiye"}
```

Mera jawab: _____

# 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

**Q1. Consistent output ke liye temperature?**

- (A) Random
- (B) Matter nahi karta
- (C) High (1.5)
- (D) Low (0–0.3)

**Q2. AI se fixed JSON?**

- (A) Merge
- (B) Wait
- (C) IF
- (D) Structured Output Parser

**Q3. Email ko categories mein baantne ka node?**

- (A) Text Classifier
- (B) Summarize
- (C) Sort
- (D) Limit

**Q4. Cost kis par depend karta hai?**

- (A) Font
- (B) Tokens
- (C) Colors
- (D) Node count

## 📖 Aaj ke naye shabd

**Workflow**
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

**Trigger**
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

**JSON**
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

**LLM**
Large Language Model — ChatGPT/Claude jaisa AI jo text samajhta aur likhta hai.

**Prompt**
AI ko diya gaya instruction/sawaal.

AdifySkills DIGITAL MARKETING INSTITUTE +91 83838 91716

## ✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 15

**AI Agents: Tools, Memory & Reasoning**

"Chatbot nahi — ek digital employee banao."

☐ **Day 14 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

# 🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

**Q1 → D**
Low (0–0.3)

**Q2 → D**
Structured Output Parser

**Q3 → A**
Text Classifier

**Q4 → B**
Tokens

### ✅ Challenge ka solution

Classify Email → Add category "partnership" (collab, partnership, sponsorship requests) → naya output → Gmail send to founder@... with original subject.

### 🧪 Expression sheet ke jawab

1. `{{ $json.From.match(/<(.+)>/)[1] }}` → **dr.mehta@clinic.in**
2. `{{ $json.From.split("<")[0].trim() }}` → **Dr. Mehta**
3. `{{ "Re: " + $json.Subject }}` → **Re: WhatsApp automation quote**
4. `{{ $json.output.sentiment === "negative" }}` → **true**
5. `{{ $json.snippet.slice(0, 30) + "…" }}` → **Hi, humein apni clinic ke liye…**
