⏱️ Class plan (minute)

Minute	Kya	Kaise
0–10	🎲 **Teams + card draw**	Teams banao. Har team ek industry chit kheenchti hai. Wahi industry ka /business page kholo: story aur schema 3 minute padho.
10–40	⚡ **Round 1 — Level 1 build**	Form → Set (ID + time) → Google Sheet → Telegram alert. Schema ke columns sheet mein banao. Pehli working row par haath upar karo — speed bonus.
40–45	🃏 **Twist card**	Har team ek twist chit kheenchti hai. Mentor 1 minute mein samjhata hai ki kaunsa node lagega (hint ke roop mein).
45–70	🔧 **Round 2 — twist jodo**	Twist ko apne workflow mein jodo. Sticky note mein likho kya badla. Test 2 baar karo: ek sahi, ek galat input se.
70–90	🎤 **Demo + pitch**	Har team 2 minute: tester live form bharta hai, alert dikhta hai, pitcher client wali line bolta hai. Baaki class "client" banke 1 sawaal poochti hai.
90–120	🏆 **Score + review**	Score sheet bharo, winner announce. Phir sab milkar 2 sabse achhe workflows ka JSON dekhte hain: naming, IF logic, error handling.

👨‍🏫 Mentor tips

- Battle se pehle khud ek industry ka Level 1 bana ke rakho, taaki koi team atke to 30 second mein dikha sako.
- Jo team bahut peeche ho, use industry page ka ready JSON import karne do, par twist khud banana hoga (Round 1 ke 30 mein se 15 points milenge).
- Kamzor students ko "tester" role do pehle round mein: form bharna aur bug pakadna bhi seekhna hai.
- Pitch mein tech words (node, JSON, webhook) bole to −2: client ki language mein bolna practice karwana hai.
- Winner team ko certificate ki jagah "Client Ready" sticker/shoutout + agle class mein apna workflow sabko sikhane ka mauka do.
