CLASS NOTES

Module 7 · Real-World Project Sprints

DAY 22 of 25

Project Sprint 2: AI Content & Marketing Engine

"Ek idea → 30 din ka content."

⚡ AAJ HUM YEH BANAYENGE

AI Content Engine with Telegram Approval

Roz subah trend feed se top 3 topics → AI brand voice mein LinkedIn post likhta hai → aapko Telegram par Approve / Decline button aata hai → approve karte hi LinkedIn par post aur log sheet mein entry.

RSS | OpenAI | Slack | LinkedIn | Sheets

Naam: _____ Class date: _____

2 ghante ki live class · 7:00 PM – 9:00 PM IST

Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Content engine agencies ka favorite retainer hai — har mahine recurring income.

🎯 Aaj ke baad aap yeh kar paoge

01 Trend research automation (RSS, Reddit, YouTube)
- 🌍 Reporter har subah khabar laata hai.
- ⚙️ RSS + Reddit API + YouTube search → top 10 topics.

02 AI content generation with brand voice
- 🌍 Har akhbaar ki apni bhasha.
- ⚙️ System prompt mein brand voice + 3 sample posts.

03 Image generation & design templates
- 🌍 Photo ke bina khabar adhoori.
- ⚙️ Image generate ya Bannerbear/Canva template fill.

04 Approval workflow (Slack/Telegram buttons)
- 🌍 Editor ka haan/naa.
- ⚙️ Telegram inline buttons ✅/❌ → Wait for webhook.

05 Multi-platform scheduling
- 🌍 Subah 9 baje akhbaar.
- ⚙️ Schedule queue: LinkedIn, X, Instagram alag time par.

06 Performance analytics loop
- 🌍 Kaunsi khabar sabse zyada padhi gayi.
- ⚙️ Weekly: likes/clicks fetch → Sheet → top posts AI ko feedback.

⏱ Class ka plan (2 ghante)

15m	75m	20m	10m

`0:00-0:15` **Brief & Architecture**

🪄 Akhbaar roz chhapta hai kyunki har insaan ka kaam fix hai — reporter, writer, editor. Hamare workflow mein bhi har node ka kaam fix hai.

`0:15-1:30` **Build Sprint**

🪄 Marathon ek saath nahi daudte — har kilometer par paani peete hain. Har phase ek kilometer hai.

`1:30-1:50` **Demo & Review**

🪄 Science fair — model dikhao, batao kaise chalta hai, sawaalon ka jawab do.

`1:50-2:00` **Homework**

🪄 Project ka agla page — ghar par likhna hai, kal sabko dikhana hai.

Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

Research automation

Trends RSS/Reddit/YouTube se.

🪄 **Analogy:** Akhbaar padhne wala assistant

CONCEPT 02

Brand kit

Voice, do/don't, examples — prompt mein.

🪄 **Analogy:** Brand ki rulebook

CONCEPT 03

Human approval

Slack/Telegram buttons se.

🪄 **Analogy:** Editor ki sign-off

CONCEPT 04

Feedback loop

Performance data wapas AI ko.

🪄 **Analogy:** Report card se seekhna

🔑 Aaj ka main idea

Content engine ek loop hai: research → create → approve → publish → measure → seekho. Analytics se pata chalta hai kya chala, aur agla content usi hisaab se.

- Agency ke 5 clients ke liye daily LinkedIn posts
- YouTube trending topics se reel scripts
- Weekly newsletter auto

📖 Ek kahani se samjho: Akhbaar ka newsroom

1
📡
Reporter khabar laaye
= Trend research (RSS/Reddit)

2
✍️
Writer ne article likha
= AI + brand voice

3
🖼️
Designer ne photo banayi
= Image generation

4
🧑‍💼
Editor ne OK kiya
= Approval buttons

5
🗞️
Akhbaar chhapa aur bika
= Publish + analytics

🪄 Ek line mein: “Akhbaar roz chhapta hai kyunki har insaan ka kaam fix hai — reporter, writer, editor. Hamare workflow mein bhi har node ka kaam fix hai.”

🔬 Gehraai se samjho — har concept andar se

Kya hai, n8n andar kya karta hai, kab use karein, kab nahi, example aur common galti.

01 Research automation

📖 **Kya hai:** Content ke topics haath se dhoondhne ki jagah automation roz trends laata hai — RSS feeds, Reddit, YouTube, Google News, Hacker News se.

⚙️ **Andar kaise:** RSS Read node kisi bhi feed ke items deta hai (title, link, date). Limit/Filter se top N chuno, Remove Duplicates (past executions) se kal wale topics dobara mat lo. Zyada advanced: har item ka score (comments, upvotes) se sort, ya AI se "kaunsa topic humari audience ke liye relevant hai" filter.

✅ **Kab use karein**
Har content engine ka pehla step — creators, agencies, newsletter wale, LinkedIn personal brand.

⛔ **Kab nahi**
Sirf trend ke peeche bhaagna jab brand ka niche alag ho — clinic brand ke liye har tech trend relevant nahi. Niche feeds chuno.

🧪 **Example:** Hacker News frontpage RSS → Top 3. Clinic niche ke liye: Google News RSS search "dental clinic India".

⚠️ **Common galti:** Roz same top post dobara uthana kyunki feed mein 2 din tak rehta hai. Remove Duplicates node ya Sheet se "pehle use hua?" check.

🪄 **Akhbaar padhne wala assistant. Niche feed + dedupe.**

02 Brand kit

📖 **Kya hai:** Brand kit = AI ke liye brand ki rulebook: voice (friendly expert), do (chhote sentences, practical examples), don't (buzzwords, fake numbers), aur 1–2 achhe purane posts ka example.

⚙️ **Andar kaise:** Example post prompt mein dena sabse taakatwar tareeka hai — AI style, length aur structure copy kar leta hai. Brand kit ko ek Sheet cell / Edit Fields mein rakho aur saare content prompts mein expression se daalo — ek jagah badlo, sab jagah update.

✅ **Kab use karein**
Har client ke content workflow mein. Onboarding mein client se 5 favourite posts aur 5 "aisa kabhi nahi" maango.

⛔ **Kab nahi**
Doosre brand ke viral post ko "example" banakar copy karwana — plagiarism aur brand ki apni awaaz khatam.

🧪 **Example:** "Brand voice: friendly expert, short sentences, practical, no buzzwords, Indian audience. Example: 'Most businesses don't need AI. They need fewer copy-paste jobs…'"

⚠️ **Common galti:** Brand kit mein sirf adjectives ("professional, engaging") — AI ke liye bekaar. Asli example + do/don't list do.

🪄 **Brand kit = voice + do/don't + example post.**

03 Human approval

📖 **Kya hai:** AI ka draft publish hone se pehle aapke phone par aata hai — Approve / Decline button. Ek tap se faisla, workflow wahin se aage.

⚙️ **Andar kaise:** Telegram (ya Gmail/Slack) node ka "Send and Wait for Response" operation message bhejta hai aur execution ko WAIT par daal deta hai. Button dabate hi n8n ko webhook milta hai aur output mein data.approved = true/false. Approval type: Approve only, ya Approve + Decline (double). Limit Wait Time set kar sakte ho (jaise 24 ghante baad auto-expire).

✅ **Kab use karein**
Public posts, client ko bheje jaane wale emails, bade payments, bulk messages — jahan galti mehengi ho.

⛔ **Kab nahi**
Roz 50 approvals — insaan thak jaata hai aur bina padhe approve karne lagta hai. Bharosa banne par kam-risk wale cheezein auto.

🧪 **Example:** Telegram: "📝 Draft post: …" [✅ Approve] [❌ Decline] → Approve → LinkedIn par post.

⚠️ **Common galti:** Approval ke baad text $json.text se lena — Send and Wait ka output sirf data.approved deta hai, post text nahi! $("Write Post").item.json.text use karo.

🪄 **Send and Wait = editor ki sign-off. Text purane node se lo.**

04 Feedback loop

📖 **Kya hai:** Publish hue posts ka performance (likes, comments, clicks) wapas laakar AI ko batana kya kaam kiya — taaki agle posts behtar banein.

⚙️ **Andar kaise:** Log Post sheet mein har post ka topic + text save hota hai. Hafte mein ek baar platform API ya manual se performance column bharo. Fir prompt mein "pichhle hafte ke top 2 posts" examples ki tarah daalo. Dheere-dheere AI aapki audience ka style seekhta hai.

✅ **Kab use karein**
Content engine 2-3 hafte chal jaane ke baad — tab data hota hai.

⛔ **Kab nahi**
Ek post ke numbers se bada faisla mat lo — kam se kam 10-15 posts ka pattern dekho.

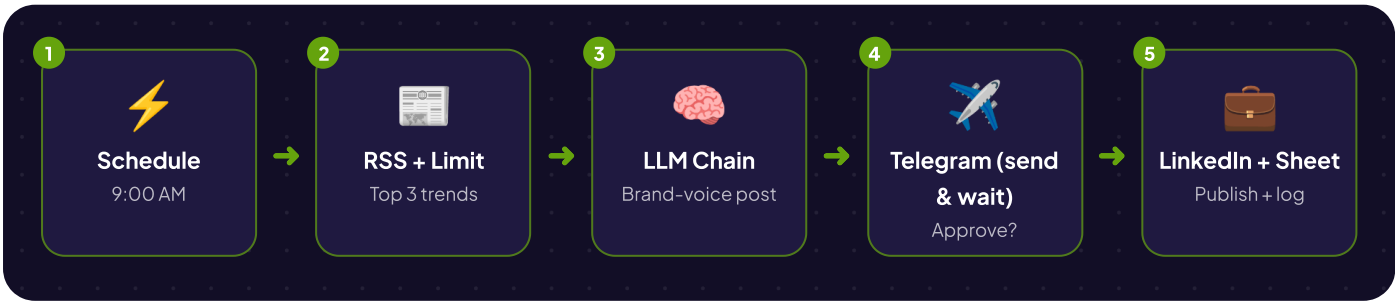

🧪 **Example:** Posts sheet: date | topic | post | status | likes | comments → har Monday top 2 posts prompt ke "examples" mein.

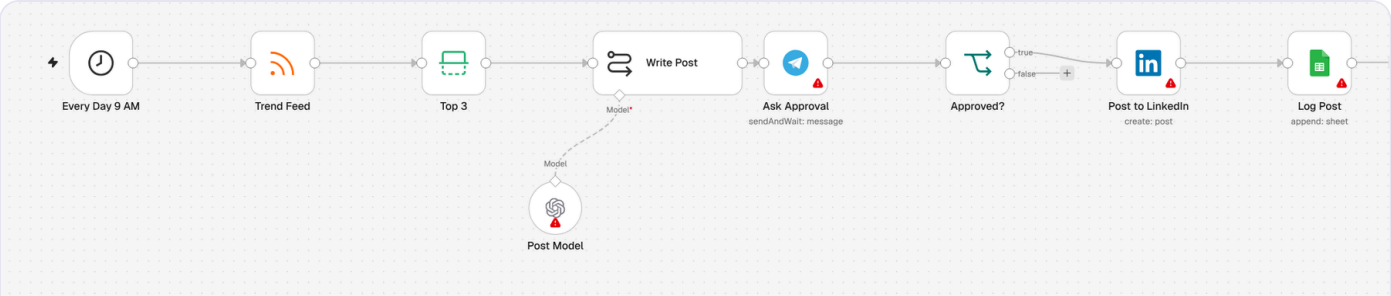

⚠️ **Common galti:** Sirf likes dekhna — comments aur profile visits/leads zyada important hain. Jo metric business laata hai wahi optimize karo.

🪄 **Report card se seekhna. Top posts → agle prompt ke examples.**

🗺️ Aaj ka workflow: AI Content Engine with Telegram Approval

Data left se right chalta hai. Har dabba ek n8n node hai.

📸 Asli n8n mein import karne par yeh dikhega. Laal ⚠️ = account (credential) connect karna baaki.

💰 Isse kitna kama sakte ho?

Personal brands, agencies (content engine) — aam taur par **₹30,000 – ₹80,000 + retainer**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Schedule Trigger**
Har Monday 9 AM

2 ⚡ **RSS Feed Trigger**
Niche ke top 5 feeds (HTTP/RSS Read)

3 🤖 **AI Agent**
5 post ideas + drafts (brand kit prompt)

4 💼 **Slack**
Approval buttons

5 ⏳ **Wait**
Approval webhook

6 💼 **LinkedIn**
Schedule/publish + Sheets log

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **OpenAI API key**
- [ ] Connect: **Telegram bot token (BotFather se)**
- [ ] Connect: **LinkedIn (OAuth)**
- [ ] Connect: **Google Sheets (Google OAuth)**
- [ ] RSS ko apni niche ke feed se badlo (Reddit: https://www.reddit.com/r/n8n/.rss)
- [ ] LinkedIn credential connect karke node mein apna profile chuno
- [ ] "Posts" tab headers: date, topic, post, status

✅ Test kaise karein

1. Test chalao → Telegram par 3 drafts, ek approve, ek decline karo
2. LinkedIn aur Posts sheet check karo

Data ka safar — har node ke baad

Aaj ke build mein data kaise badalta hai. Expressions samajhne ki chaabi yahi hai.

1 🔧 Trend Feed

Hacker News frontpage ke ~30 items.

```
{
  "title": "Show HN: I automated my clinic's appointment reminders",
  "link": "https://news.ycombinator.com/item?id=4271…",
  "pubDate": "Mon, 14 Dec 2026 03:12:00 GMT",
  "…": "(+29 aur items)"
}
```

2 🔧 Top 3

3 topics bache — ab 3 posts banenge.

```
{
  "title": "Show HN: I automated my clinic's appointment reminders",
  "…": "(+2 aur items)"
}
```

3 🔧 Write Post

Brand voice mein post (har topic ka ek).

```
{
  "text": "Most clinics don't lose patients to competitors.\nThey lose them to a missed reminder.\n\n3 things this builder got right:\n• …\n\nWhat's the one reminder your business forgets? 👇\n\n#automation #n8n #smallbusiness"
}
```

4 🔧 Ask Approval

Aapne Telegram par ✅ Approve dabaya — execution wahin se chala.

```
{
  "data": {
    "approved": true
  }
}
```

5 🔧 Approved?

approved = true → publish.

```
{
  "true (1 item)": "approved",
  "false (0)": "—"
}
```

6 💼 Post to LinkedIn

LinkedIn par post live — urn = post ka ID.

```
{
  "urn": "urn:li:share:7273019384756128768"
}
```

7 🔧 Log Post

Posts sheet mein entry — feedback loop ke liye.

```
{
  "date": "2026-12-14",
  "topic": "Show HN: I automated my clinic's appointment reminders",
  "post": "Most clinics don't lose patients…",
  "status": "published"
}
```

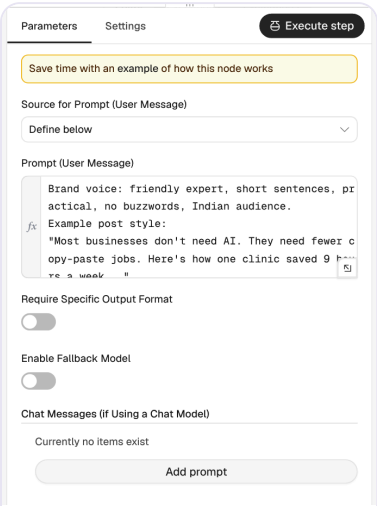

AdifySkills DIGITAL MARKETING INSTITUTE +91 83838 91716

Node anatomy — har setting ka matlab

Har zaroori option kya karta hai aur kab badalna hai. Isse aap khud naye workflows bana paoge.

Basic LLM Chain — brand voice

Har trend topic par brand ki awaaz mein post.

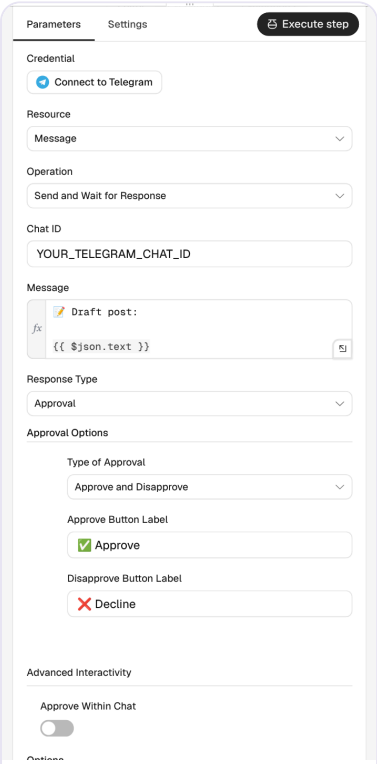

📸 Asli n8n: Basic LLM Chain — brand voice

Setting	Kya karti hai	Aaj ki value	Kab badlein
Prompt → Brand voice	Tone + audience	`friendly expert, short sentences, no buzzwords, Indian audience`	Brand kit Sheet se expression mein
Prompt → Example	Ek asli post ka namoona	`"Most businesses don't need AI…"`	Sabse zyada asar isi ka
Prompt → Structure	Hook + 3 insights + question + 3 hashtags, max 150 words	—	Numbers mein limit
Output	Plain text (parser nahi)	`$json.text`	Ek hi field chahiye to parser ki zaroorat nahi

Telegram — Send and Wait

Draft aapke phone par, Approve/Decline ke saath.

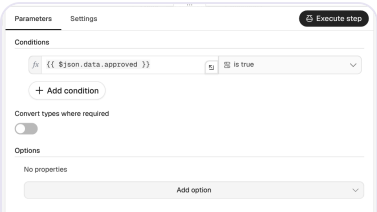

📸 Asli n8n: Telegram — Send and Wait

Setting	Kya karti hai	Aaj ki value	Kab badlein
Operation	Send and Wait for Response	`sendAndWait`	Gmail/Slack mein bhi same operation
Chat ID	Aapka chat	`YOUR_TELEGRAM_CHAT_ID`	@userinfobot se apna ID
Message	Draft text	`📝 Draft post:\n\n{{ $json.text }}`	—
Response Type → Approval Options	Approve only ya Approve + Decline	`double (dono buttons)`	Free text feedback ke liye "Free Text" type
Options → Limit Wait Time	Kitni der intezaar	—	24 ghante — warna execution hamesha wait mein

🔀 IF — approved?

Sirf approved post publish.

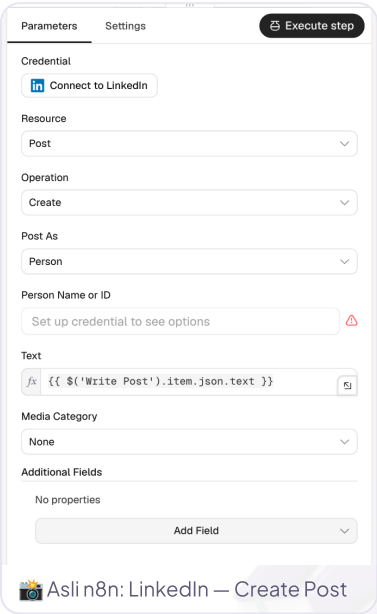

📸 Asli n8n: IF — approved?

Setting	Kya karti hai	Aaj ki value	Kab badlein
Value	Button ka jawab	`{{ $json.data.approved }}`	true = Approve, false = Decline
Operator	Boolean → is true	–	—
false branch	Decline	`khaali`	Idea: "Rewrite" ke liye AI ko feedback ke saath wapas

💼 LinkedIn — Create Post

Approved post LinkedIn par.

📸 Asli n8n: LinkedIn — Create Post

Setting	Kya karti hai	Aaj ki value	Kab badlein
Credential	LinkedIn OAuth2	`LinkedIn account`	Company page ke liye Community Management API access
Post As	Person ya Organization	`Person`	Client ke page ke liye Organization
Person	Aapka profile	`YOUR_LINKEDIN_PERSON_ID`	Credential connect karke list se chuno
Text	Write Post node se (approval node se nahi!)	`{{ $("Write Post").item.json.text }}`	Approval output mein text nahi hota

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😫 Pehle (manual)

Research, likhna, design, post — har din — **180 min**

180 min

➜

⚡ Ab (n8n)

Approve karna bas — **15 min**

15 min

⏱ Roz ~2.5 ghante bache, consistency 100%.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
BRAND VOICE: friendly, Hinglish, no jargon, 1 emoji max, end with a question.
```

📦 Sample data — input se output tak

📥 Input 📋 Select karke copy karo

```
{
  "niche": "fitness coaching",
  "feeds": 5
}
```

📤 Output 📋 Select karke copy karo

```
{
  "drafts": 5,
  "approved": 3,
  "published": 3
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Brand voice post prompt

📋 Select karke copy karo

```
Brand voice: friendly expert, short sentences, practical, no buzzwords, Indian audience.
Example post style:
"Most businesses don't need AI. They need fewer copy-paste jobs. Here's how one clinic saved 9 hours a week..."

Topic: {{title}}
Link: {{link}}

LinkedIn post likho: hook line, 3 short insights, automation/AI angle, 1 question for comments, max 150 words, 3 hashtags.
```

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Roz subah trend feed se top 3 topics → AI brand voice mein LinkedIn post likhta hai → aapko Telegram par Approve / Decline button aata hai → approve karte hi LinkedIn par post aur log sheet mein entry.

Flow: Schedule (9:00 AM) → RSS + Limit (Top 3 trends) → LLM Chain (Brand-voice post) → Telegram (send & wait) (Approve?) → LinkedIn + Sheet (Publish + log)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "AI Content Engine with Telegram Approval" (nodes: Every Day 9 AM, Trend Feed, Top 3, Write Post, Post Model, Ask Approval, Approved?, Post to LinkedIn, Log Post).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **Workflow JSON** wale button par click karo (ya lesson page par 📋 **Copy workflow JSON** dabao).
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

Workflow JSON
9 nodes · ready to import
`adifyskills.com/workflows/day-22-ai-content-engine.json`

Lesson page
Copy buttons, quiz aur video links
`adifyskills.com/day/22`

Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Telegram bot token (BotFather se)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "LinkedIn (OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Google Sheets (Google OAuth)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.
AI node par 401 / 429 error?	401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo.
"Sheet not found" / column khaali?	Sheet ID aur tab ka naam (capital/small bhi) check karo. Pehli row mein headers hone chahiye.

⚠️ Yeh galtiyan sabse common hain

- ! Generic AI content — brand voice examples nahi diye
- ! Approval timeout handle na karna
- ! Copyright images use karna

⭐ Pro tips — time bachane wali tricks

- ★ Best performing posts ko few-shot examples banao
- ★ Wait node mein timeout + reminder
- ★ Weekly analytics Sheet → AI insights email

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Content engine: research → AI drafts → human approval → auto-publish → weekly analytics.

📝 Homework

Engine ko apne/kisi brand ke liye 1 week chalao aur results share karo.

- [ ] Homework ho gaya

BEGINNER
RSS → AI summary → Telegram

INTERMEDIATE
Approval flow

ADVANCED
Analytics loop + best time to post

🧩 Aaj ka challenge — pehle khud try karo

🎯 Decline hone par AI se dusra version banwao (max 1 baar).

💡 Hint 1
Approved? ki false branch ko wapas likhne wale step se jodo.

💡 Hint 2
Loop se bachne ke liye ek counter field rakho (attempt = 2).

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🧪 Expression practice sheet

Input dekho aur khaali jagah mein expression likho. Jawab aakhri page par hain.

1. Post 150 words se chhota?

```
{"text":"Most businesses don't need AI. They need fewer copy-paste jobs."}
```

Mera jawab: _____

2. Approve hua?

```
{"data":{"approved":false}}
```

Mera jawab: _____

3. Post mein kitne hashtags?

```
{"text":"Great tips… #AI #n8n #automation"}
```

Mera jawab: _____

4. Sirf hook line (pehli line)

```
{"text":"Most businesses don't need AI.\nThey need fewer copy-paste jobs."}
```

Mera jawab: _____

5. Lamba title chhota karo

```
{"title":"Show HN: I automated my clinic"}
```

Mera jawab: _____

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Brand voice ke liye best?

- (A) High temperature
- (B) Kuch nahi
- (C) Examples prompt mein
- (D) Bada model

Q2. Approval ke liye workflow kaise ruke?

- (A) Sort
- (B) Limit
- (C) IF
- (D) Wait (on webhook)

Q3. Recurring schedule?

- (A) Schedule Trigger
- (B) Manual
- (C) Form
- (D) Error Trigger

Q4. AI ko improve karne ke liye?

- (A) Nothing
- (B) Performance feedback loop
- (C) Delete posts
- (D) More emojis

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

Prompt
AI ko diya gaya instruction/sawaal.

Agent
AI jo khud decide karta hai kaunsa tool use karna hai — sirf baat nahi, kaam bhi karta hai.

Schedule
Fixed time par workflow chalana — roz, har ghante, har Monday.

Retainer
Har mahine fixed fees par client ka kaam/maintenance karna.

AdifySkills DIGITAL MARKETING INSTITUTE +91 83838 91716

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 23

Project Sprint 3: Finance & Operations Autopilot

"Back-office jo khud chalta hai."

☐ **Day 22 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → C
Examples prompt mein

Q2 → D
Wait (on webhook)

Q3 → A
Schedule Trigger

Q4 → B
Performance feedback loop

✅ Challenge ka solution

Approved? false → Set attempt=2 → Write Post (prompt mein "different angle, shorter") → Ask Approval. IF attempt=2 aur phir decline → stop.

🧪 Expression sheet ke jawab

1. `{{ $json.text.split(" ").length <= 150 }}` → **true**
2. `{{ $json.data.approved }}` → **false**
3. `{{ ($json.text.match(/#\w+/g) || []).length }}` → **3**
4. `{{ $json.text.split("\n")[0] }}` → **Most businesses don't need AI.**
5. `{{ $json.title.length > 60 ? $json.title.slice(0, 57) + "..." : $json.title }}` → **Show HN: I automated my clinic**
