CLASS NOTES

🔌 Module 3 · APIs, Webhooks & Integrations

DAY 10 of 25

Databases: Postgres, Supabase, Airtable & Notion

"Sheets se aage — real databases ke saath scale karo."

⚡ AAJ HUM YEH BANAYENGE

Supabase Leads API (Create / Update / Search)

Ek hi webhook se teen kaam: action = create, update ya search. Data Supabase (Postgres) table mein jaata hai aur API JSON lautati hai — apna chhota backend bina server ke.

Postgres · Supabase · Airtable · Notion

Naam: _____ Class date: _____

2 ghante ki live class · 7:00 PM – 9:00 PM IST

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

Sheets 10,000 rows ke baad slow ho jaati hain. Real clients ko real database chahiye — Postgres/Supabase.

🎯 Aaj ke baad aap yeh kar paoge

01 SQL basics: SELECT, INSERT, UPDATE, JOIN

🌍 Librarian se: "Delhi wale saare students do" (SELECT), "naya student jodo" (INSERT).
⚙️ SELECT name, phone FROM leads WHERE city = 'Delhi';

02 Postgres/MySQL nodes & Supabase

🌍 Bank ka main computer system.
⚙️ Postgres node → Execute Query / Insert / Upsert; Supabase node → rows CRUD.

03 Airtable & Notion as no-code databases

🌍 Sundar register (Airtable), digital diary (Notion).
⚙️ Airtable → Create record; Notion → Database page create.

04 Upsert patterns & deduplication

🌍 Contact list mein same number do baar save na ho.
⚙️ ON CONFLICT (email) DO UPDATE … / Remove Duplicates node.

05 n8n Data Tables (built-in storage)

🌍 Ghar mein chhota locker — bahar jaane ki zarurat nahi.
⚙️ n8n Data Tables: chhote projects ka built-in storage.

06 Choosing the right DB for a client

🌍 Chhote kaam ke liye cycle, bade ke liye truck.
⚙️ < 5k rows + non-tech → Airtable; app backend / scale → Postgres/Supabase.

⏱ Class ka plan (2 ghante)

10m	35m	45m	20m	10m

`0:00-0:10` **Recap**

🪄 *Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.*

`0:10-0:45` **Concept: Databases**

Sheets vs Airtable vs Postgres

🪄 *Notebook mein 10 naam dhoondhna easy, 10,000 mein mushkil. Database ek super-fast librarian hai.*

`0:45-1:30` **Live Build**

Mini CRM on Supabase with n8n API layer

🪄 *Aaj ki kahani yaad hai — 'Library aur smart librarian'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.*

`1:30-1:50` **Quiz + Challenge**

Module 3 quiz

🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

`1:50-2:00` **Q&A + Homework**

🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

Table, row, column

Database = Excel jaisa par fast aur reliable.

🪄 **Analogy:** Library ki almirah aur shelves

CONCEPT 02

SQL basics

SELECT * FROM leads WHERE city = 'Delhi'

🪄 **Analogy:** Librarian se sawaal poochna

CONCEPT 03

Upsert

Unique key (email) match → update, warna insert.

🪄 **Analogy:** Attendance: naam hai to tick, nahi to naya naam

CONCEPT 04

No-code DBs

Airtable/Notion — non-tech clients ke liye easy UI.

🪄 **Analogy:** Ready-made furniture

🔑 Aaj ka main idea

Jab data bada ho jaata hai (hazaaron rows), Sheets slow aur risky ho jaati hain. Database (Postgres/Supabase) fast, safe aur multi-user hai. Airtable/Notion beech ka raasta hain — non-tech client ke liye easy UI.

- Sheets = notebook, Database = bank ka ledger system
- Airtable = sundar register jismein filters
- Upsert = attendance: naam hai to tick, nahi to add

📖 Ek kahani se samjho: Library aur smart librarian

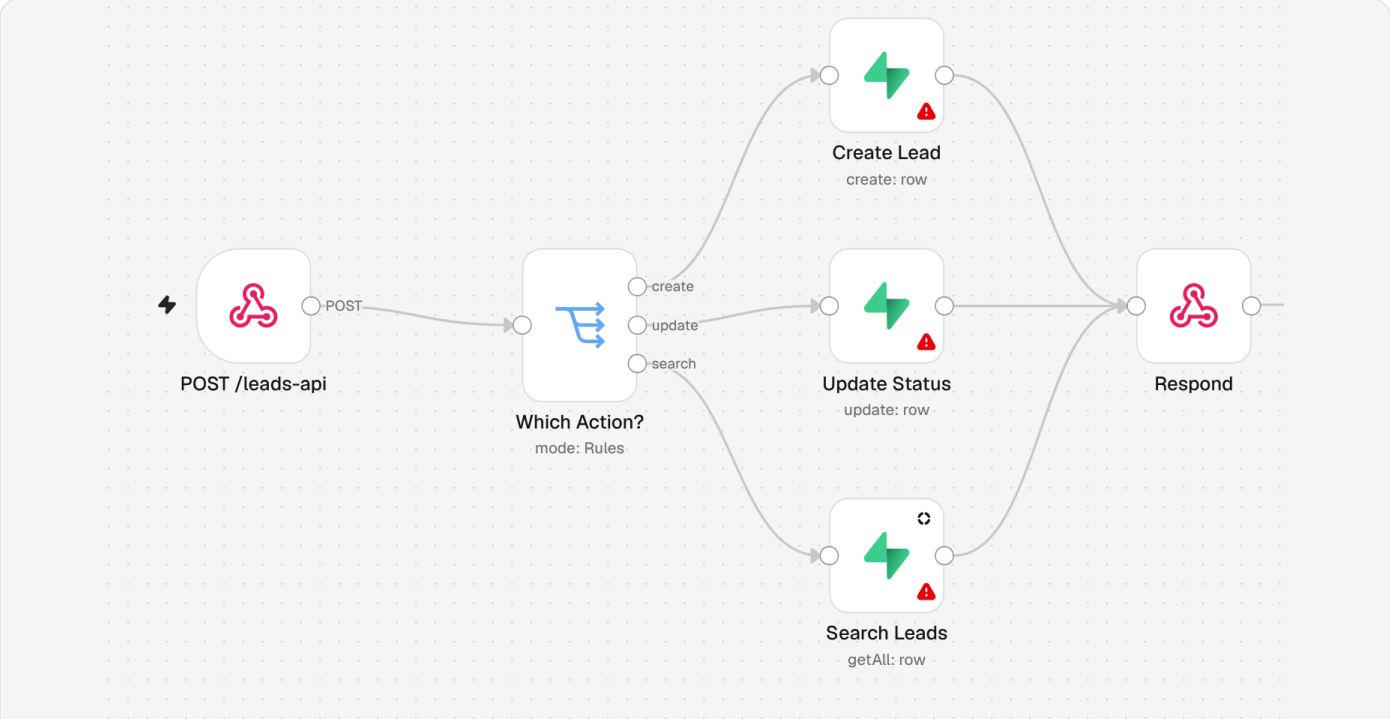

1. 📚 **Library = database** = Postgres / Supabase
2. 🗂️ **Almirah = table** = leads table
3. 📖 **Kitaab = row** = Ek lead record
4. 🙋 **Librarian se sawaal** = SQL SELECT
5. 🔁 **Kitaab hai to update, nahi to nayi** = Upsert

🪄 Ek line mein: “Notebook mein 10 naam dhoondhna easy, 10,000 mein mushkil. Database ek super-fast librarian hai.”

🗺️ Aaj ka workflow: Supabase Leads API (Create / Update / Search)

Data left se right chalta hai. Har dabba ek n8n node hai.

📸 Asli n8n mein import karne par yeh dikhega. Laal ⚠️ = account (credential) connect karna baaki.

💰 Isse kitna kama sakte ho?

Startups (mini backend / leads API) — aam taur par **₹15,000 – ₹40,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1 ⚡ **Webhook**
POST /crm/lead

2 🗄 **Supabase**
Upsert into leads (email unique)

3 ⚡ **Webhook**
GET /crm/search?city=

4 🗄 **Postgres**
SELECT name, phone FROM leads WHERE city = $1

5 ⚡ **Respond to Webhook**
Results JSON

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- [ ] Connect: **Supabase (project URL + service key)**
- [ ] Supabase SQL editor mein yeh chalao: create table leads (id bigint generated always as identity primary key, name text, email text unique, status text default 'new', created_at timestamptz default now());

✅ Test kaise karein

1. curl se action=create bhejo, phir search, phir update
2. Supabase Table Editor mein data dekho

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😫 Pehle (manual)

10,000 rows ki slow Sheet	10 min
Duplicate dhoondhna	20 min
	30 min

➜

⚡ Ab (n8n)

DB mein fast search + auto dedupe

0 min

⏱ Search seconds mein, duplicates automatic band.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo — 📋 Select karke copy karo

```
INSERT INTO leads (email, name, city) VALUES ($1, $2, $3)
ON CONFLICT (email) DO UPDATE SET name = EXCLUDED.name, city = EXCLUDED.city;
```

📦 Sample data — input se output tak

📥 Input — 📋 Select karke copy karo

```
{
  "email": "raj@mail.com",
  "name": "Raj",
  "city": "Jaipur"
}
```

📤 Output — 📋 Select karke copy karo

```
[
  {
    "name": "Raj",
    "phone": "9000011111",
    "city": "Jaipur"
  }
]
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Build it with ChatGPT / Claude

📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Ek hi webhook se teen kaam: action = create, update ya search. Data Supabase (Postgres) table mein jaata hai aur API JSON lautati hai — apna chhota backend bina server ke.

Flow: Webhook (POST /leads-api) → Switch (action?) → Supabase (create / update / search) → Respond (JSON result)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to test it and the 3 most common errors beginners hit.
```

💬 Debug helper prompt

📋 Select karke copy karo

```
I'm building the n8n workflow "Supabase Leads API (Create / Update / Search)" (nodes: POST /leads-api, Which Action?, Create Lead, Update Status, Search Leads, Respond).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **Workflow JSON** wale button par click karo (ya lesson page par 📋 **Copy workflow JSON** dabao).
2. Poora text copy karo (`Ctrl` + `A` , `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V` . Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON
6 nodes · ready to import
`adifyskills.com/workflows/day-10-supabase-leads-api.json`

🌐 Lesson page
Copy buttons, quiz aur video links
`adifyskills.com/day/10`

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Supabase (project URL + service key)" connect karo.
Webhook/Form test par kuch nahi ho raha?	"Listen for test event" / Test URL use karo aur 2 minute ke andar request bhejo. Production URL sirf Active workflow par chalta hai.

⚠️ Yeh galtiyan sabse common hain

! SQL mein user input seedha jodna (SQL injection) — query parameters use karo
! Unique constraint ke bina upsert
! Supabase service key ko frontend mein expose karna

⭐ Pro tips — time bachane wali tricks

★ n8n Data Tables chhote projects ke liye built-in storage
★ Index lagao frequently searched columns par
★ Client ke liye Airtable interface bana do — woh khud data dekh sake

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Supabase mein leads table + n8n se create/update/search endpoints.

📝 Homework

Notion content calendar ko Airtable ke saath 2-way sync karo.

☐ Homework ho gaya

BEGINNER
Airtable mein record add ☐

INTERMEDIATE
Notion ↔ Airtable sync ☐

ADVANCED
Paginated search API with LIMIT/OFFSET ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Same email se dobara "create" aaye to error ki jagah "already exists" message lautao.

💡 Hint 1
Pehle search karo, phir decide karo create karna hai ya nahi.

💡 Hint 2
Create se pehle Supabase getAll (filter email=eq.X) + IF "item mila?"

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Data padhne ka SQL command?

- (A) DROP
- (B) UPDATE
- (C) INSERT
- (D) SELECT

Q2. SQL injection se bachne ke liye?

- (A) Capital letters
- (B) Long query
- (C) Comments
- (D) Query parameters

Q3. Non-tech client ke liye easy DB?

- (A) Postgres CLI
- (B) Airtable
- (C) Redis
- (D) MongoDB shell

Q4. Upsert ka matlab?

- (A) Backup
- (B) Delete+insert
- (C) Update ya insert
- (D) Sirf insert

📖 Aaj ke naye shabd

Webhook
Ek URL jis par koi doosra app data bhejta hai aur aapka workflow turant chal padta hai.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

CRM
Customers aur leads ka record rakhne ka system.

AdifySkills DIGITAL MARKETING INSTITUTE +91 83838 91716

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 11

Lead Generation & CRM Automation

"Har lead, har baar, 60 seconds ke andar follow-up."

☐ **Day 10 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

AdifySkills DIGITAL MARKETING INSTITUTE +91 83838 91716

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → D
SELECT

Q2 → D
Query parameters

Q3 → B
Airtable

Q4 → C
Update ya insert

✅ Challenge ka solution

Which Action? (create) → Supabase getAll (email=eq.{{ $json.body.email }}, Always Output Data on) → IF {{ $json.id }} exists → Respond "already exists", warna Create Lead.
