n8n Automation Mastery

📘 CLASS NOTES

🤖 Module 5 · AI Automation & Agents

DAY 14 of 25

AI in n8n: LLMs & Prompt Engineering

"Workflows ko dimaag do — AI ke saath."

⚡ AAJ HUM YEH BANAYENGE

Inbox AI: Classify + Sentiment + Reply Draft

Har naya email AI padhta hai aur sales / support / spam mein baant deta hai. Sales email ka sentiment nikaal ke reply draft Gmail mein bana deta hai, support wala team ko Telegram par, spam "read" mark.

OpenAI | Claude | Gemini | LLM Chain | Output Parser

Naam: _____ Class date: _____

2 ghante ki live class · 7:00 PM – 9:00 PM IST

🧭 Aaj ka roadmap

Ek nazar mein poori class — kya, kyun aur kitne time mein.

💡 Yeh lesson kyun zaroori hai?

AI ab har workflow ka hissa hai. Aaj student seekhega ki AI ko "reliable worker" kaise banaye — random chatbot nahi.

🎯 Aaj ke baad aap yeh kar paoge

01 LLMs explained simply: tokens, context, temperature
🌍 Tote ko jitna yaad, utna hi bolega (context).
⚙️ Token = shabd ka tukda; context window = ek baar mein kitna padh sake.

02 OpenAI, Anthropic Claude, Gemini & open models in n8n
🌍 Alag-alag teacher, alag specialty.
⚙️ OpenAI / Claude / Gemini chat model nodes — credential badlo, model badlo.

03 Basic LLM Chain & chat model nodes
🌍 Sawaal → jawab, seedha.
⚙️ Basic LLM Chain: prompt mein {{ $json.body }} daalo.

04 Prompt engineering frameworks (role, task, format)
🌍 Teacher ko clear instruction: "Tum maths teacher ho, 3 steps mein samjhao."
⚙️ Role + Task + Context + Format + Example.

05 Structured output parsers (JSON)
🌍 Form bharwana, essay nahi.
⚙️ Structured Output Parser: {category, sentiment, reply}.

06 Cost control & model selection
🌍 Chhote kaam ke liye auto, bade ke liye taxi.
⚙️ Classification = mini model; complex reasoning = bada model.

⏱️ Class ka plan (2 ghante)

10m	40m	40m	20m	10m

0:00–0:10 Recap
🪄 *Cricket match se pehle warm-up karte ho na? Recap dimaag ka warm-up hai.*

0:10–0:50 Concept: LLMs & Prompts
Bad vs good prompt live comparison
🪄 *Ek tota hai jisne poori library padh li. Tum jitna saaf sawaal poochoge, utna achha jawab dega.*

0:50–1:30 Live Build
AI email classifier + reply drafter
🪄 *Aaj ki kahani yaad hai — 'Bahut padha-likha tota'? Ab wahi kahani n8n mein banayenge. Har scene ek node hai: ek-ek block jodo aur har block ke baad dekho sab chal raha hai ya nahi.*

1:30–1:50 Prompt Battle
Best prompt wins
🪄 *Practice match — jitna yahan girenge, utna asli match mein kam girenge.*

1:50–2:00 Q&A + Homework
🪄 *Ghar jaane se pehle bag check — sab samajh aaya? Homework diary mein likha?*

🧠 Concepts — aasaan bhasha mein

Har concept ke saath ek real-life analogy. Analogy yaad rahegi to concept bhi yaad rahega.

CONCEPT 01

LLM

Bahut saara text padh chuka model jo agla word predict karta hai.

🪄 **Analogy:** Bahut padha-likha intern

CONCEPT 02

Tokens & context

Model ek baar mein kitna text dekh sakta hai; cost tokens par.

🪄 **Analogy:** Exam ki answer sheet ke pages

CONCEPT 03

Temperature

Kam = consistent, zyada = creative.

🪄 **Analogy:** Strict teacher vs creative writer

CONCEPT 04

Prompt framework

Role + Task + Context + Format + Examples.

🪄 **Analogy:** Clear job description

🔑 Aaj ka main idea

LLM ek next-word predict karne wala bada model hai. Hum use prompt dete hain (role + task + format) aur woh text ya JSON lautata hai. n8n mein yeh ek node ki tarah kaam karta hai.

- Email ko sales/support/spam mein baantna
- Review ka sentiment positive/negative
- Lamba document 5 bullet summary mein

📖 Ek kahani se samjho: Bahut padha-likha tota

1 🦜 **Tote ne lakhon kitabein padhi** = LLM (trained model)

2 🗣️ **Tumne sawaal poocha** = Prompt

3 🧩 **Tota shabd-shabd jodta hai** = Tokens

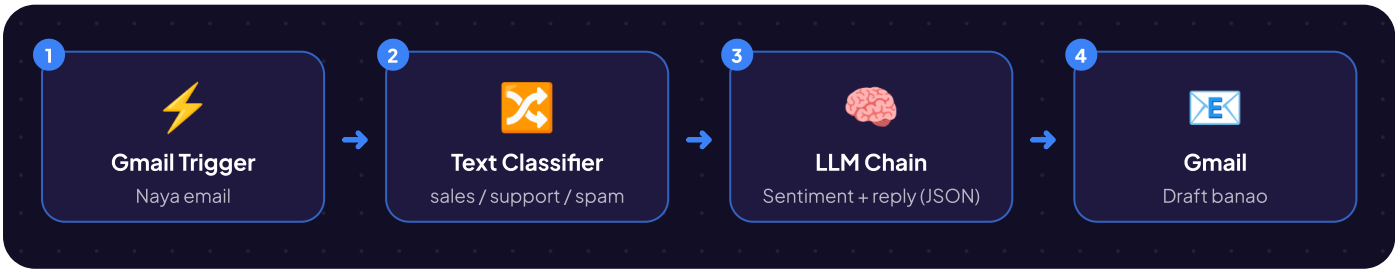

4 🎚️ **Seedha jawab ya creative** = Temperature

5 📋 **Jawab form mein bharo** = Structured output (JSON)

🪄 Ek line mein: “Ek tota hai jisne poori library padh li. Tum jitna saaf sawaal poochoge, utna achha jawab dega.”

🗺️ Aaj ka workflow: Inbox AI: Classify + Sentiment + Reply Draft

Data left se right chalta hai. Har dabba ek n8n node hai.

💰 Isse kitna kama sakte ho?

Agencies, SaaS (AI inbox triage) — aam taur par **₹15,000 – ₹35,000**. *(Andaaza hai; client aur scope ke hisaab se badalta hai.)*

🛠 Step-by-step build — n8n kholo aur saath chalo

1. ⚡ **Gmail Trigger**
   Naya email inbox mein
2. 🔀 **Text Classifier**
   Categories: sales, support, billing, spam
3. 🏷️ **Sentiment Analysis**
   Positive / neutral / negative
4. 🧠 **Basic LLM Chain**
   Reply draft (brand tone) + Structured Output Parser
5. 📧 **Gmail**
   Draft create + label lagao
6. 💼 **Slack**
   Negative + support → team alert

✅ Har step ke baad **Execute step** dabao aur output check karo. Sab green ho to workflow **Active** karo.

🔑 Setup (import ke baad)

- ☐ Connect: **Gmail (Google OAuth)**
- ☐ Connect: **OpenAI API key**
- ☐ Connect: **Telegram bot token (BotFather se)**
- ☐ Pehle ek test Gmail account par chalao

✅ Test kaise karein

1. Apne aap ko 3 email bhejo: price poochne wala, complaint wala, promo wala
2. Gmail Trigger "Fetch test event" → har branch dekho
3. Gmail Drafts folder check karo

⚖️ Pehle vs Ab — farak dekho

Yahi farak client ko dikhana hai. Time bachta hai = paisa bachta hai.

😩 Pehle (manual)

Har email padhna	3 min
Category decide karna	1 min
Reply likhna	6 min
	10 min

⚡ Ab (n8n)

AI classify + draft, insaan bas check kare	1 min
	1 min

⏱ 100 emails/din par ~15 ghante → 2 ghante.

⌨️ Aaj ka key snippet

Copy karke n8n mein paste karo 📋 Select karke copy karo

```
ROLE: You are a support lead at {{brand}}.
TASK: Draft a reply.
RULES: Hinglish, max 80 words, never promise refunds.
FORMAT: JSON {"reply":"","needs_human":true|false}
```

📦 Sample data — input se output tak

📥 Input 📋 Select karke copy karo

```
{
  "from": "customer@mail.com",
  "subject": "Refund chahiye",
  "body": "Mera course access kaam nahi kar raha,
bahut frustrating hai."
}
```

📤 Output 📋 Select karke copy karo

```
{
  "category": "support",
  "sentiment": "negative",
  "draft": "Hi! Sorry for the trouble 🙏 Humari team
ne aapka access reset kar diya hai…"
}
```

💬 Copy-paste prompts

ChatGPT / Claude mein seedha paste karo. PDF mein text select karke copy ho jata hai.

💬 Sales reply prompt (workflow ke andar) 📋 Select karke copy karo

```
Tum ek helpful sales assistant ho jo ek Indian automation agency ke liye kaam karta hai.
Neeche diye email ko padho aur:
1. sentiment batao (positive / neutral / negative)
2. 3 line ka polite reply draft karo — simple English, koi fake promise nahi, end mein 15-min call ka
offer.

From: {{from}}
Subject: {{subject}}
Email: {{body}}
```

💬 Classifier categories 📋 Select karke copy karo

```
sales: Price, quote, demo, new project ya service ke baare mein poochna
support: Existing customer ki problem, bug, refund, order issue
spam: Promotions, newsletters, cold SEO offers, irrelevant
```

💬 Build it with ChatGPT / Claude 📋 Select karke copy karo

```
Act as an n8n expert and teacher. Help me build this workflow in n8n step by step (n8n 1.x UI):

Goal: Har naya email AI padhta hai aur sales / support / spam mein baant deta hai. Sales email ka
sentiment nikaal ke reply draft Gmail mein bana deta hai, support wala team ko Telegram par, spam "read"
mark.

Flow: Gmail Trigger (Naya email) → Text Classifier (sales / support / spam) → LLM Chain (Sentiment +
reply (JSON)) → Gmail (Draft banao)

For each node tell me: which node to add, exact settings, and the expressions to use. Then tell me how to
test it and the 3 most common errors beginners hit.
```

💬 **Debug helper prompt** 📋 Select karke copy karo

```
I'm building the n8n workflow "Inbox AI: Classify + Sentiment + Reply Draft" (nodes: New Email, Classify Email, Classifier Model, Draft Sales Reply, Reply Model, Reply JSON, Create Gmail Draft, Alert Support Team, Mark Spam Read).
Node "<NODE NAME>" gives this error:
<PASTE ERROR>

Input JSON of that node:
<PASTE INPUT>

Explain the cause in simple words and give me the exact fix (settings or expression).
```

📥 Workflow ko n8n mein kaise laayein

1. **QR scan karo** ya link kholo — workflow ki JSON file khulegi.
2. Poora text copy karo (`Ctrl` + `A`, `Ctrl` + `C`).
3. n8n mein naya workflow kholo → canvas par click → `Ctrl` + `V`. Ya … menu → *Import from File*.
4. Upar wala Setup checklist poora karo aur **Test** dabao.

⚡ Workflow JSON

🧯 Atak gaye? Yeh check karo

Error aana seekhne ka hissa hai — sab atakte hain. Neeche wale points se 90% problems solve ho jaati hain.

Agar yeh ho raha hai…	To yeh karo
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Gmail (Google OAuth)" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "OpenAI API key" connect karo.
Node par laal ⚠️ triangle?	Account connect nahi hua. Node kholo → Credential → "Telegram bot token (BotFather se)" connect karo.
Time par apne aap nahi chala?	"Active" toggle on hai? Settings mein timezone Asia/Kolkata check karo.
AI node par 401 / 429 error?	401 = API key galat. 429 = credit khatam ya bahut jaldi requests. OpenAI billing page check karo.

⚠️ Yeh galtiyan sabse common hain

- ! Prompt mein format na batana → output parse nahi hota
- ! Temperature high rakhna classification ke liye
- ! Har email par sabse mehenga model

⭐ Pro tips — time bachane wali tricks

- ★ Classification ke liye chhota/sasta model kaafi hai
- ★ Structured Output Parser + "Auto-fix" se reliable JSON
- ★ Prompts ko Sheet mein store karo — bina workflow edit kiye badlo

Phir bhi atke? Koi baat nahi 🙂
Screenshot + error message ke saath WhatsApp par poochho →

🏋️ Practice + Challenge

Padhne se zyada banane se seekhte hain. Ek-ek level upar jaao.

🛠 Live lab

Inbox AI: incoming email ko classify (sales/support/spam), sentiment nikaalo aur reply draft banao.

📝 Homework

10 prompts ki apni prompt library banao with structured JSON output.

- ☐ Homework ho gaya

BEGINNER
Review ko positive/negative classify ☐

INTERMEDIATE
Prompt library 10 prompts JSON output ke saath ☐

ADVANCED
Model fallback: OpenAI fail → Gemini ☐

🧩 Aaj ka challenge — pehle khud try karo

🎯 Category mein "partnership" bhi jodo aur aise emails founder ko forward karo.

💡 Hint 1
Text Classifier mein categories ki list editable hai.

💡 Hint 2
Naya category banate hi node ka ek naya output banta hai — wahan Gmail node lagao.

✅ Solution aakhri page par hai — pehle 5 minute khud socho 😉

🎯 2 minute ka self-check

Sahi option par gol ghera lagao. Answers aakhri page par — score sirf aapke liye hai.

Q1. Consistent output ke liye temperature?

- (A) Random
- (B) Matter nahi karta
- (C) High (1.5)
- (D) Low (0–0.3)

Q2. AI se fixed JSON?

- (A) Merge
- (B) Wait
- (C) IF
- (D) Structured Output Parser

Q3. Email ko categories mein baantne ka node?

- (A) Text Classifier
- (B) Summarize
- (C) Sort
- (D) Limit

Q4. Cost kis par depend karta hai?

- (A) Font
- (B) Tokens
- (C) Colors
- (D) Node count

📖 Aaj ke naye shabd

Workflow
Steps ki ek chain jo apne aap chalti hai — jaise recipe ke steps.

Trigger
Jo workflow ko START karta hai — jaise alarm, naya email, ya form submit.

JSON
Data likhne ka format: { "naam": "Ravi", "city": "Delhi" } — key aur value ke jode.

LLM
Large Language Model — ChatGPT/Claude jaisa AI jo text samajhta aur likhta hai.

Prompt
AI ko diya gaya instruction/sawaal.

✍️ Meri notes

Class mein jo naya laga, jo doubt aaya — yahan likho. Kal revise karna aasaan hoga.

⏭ Kal kya seekhenge — Day 15

AI Agents: Tools, Memory & Reasoning

"Chatbot nahi — ek digital employee banao."

☐ **Day 14 complete! 🎉**

Tick karo aur website par bhi ✅ dabao.

🔑 Answer key + useful links

Pehle khud try kiya? Ab check karo. Galat hua to explanation padho — wahi asli seekh hai.

Q1 → D
Low (0–0.3)

Q2 → D
Structured Output Parser

Q3 → A
Text Classifier

Q4 → B
Tokens

✅ Challenge ka solution

Classify Email → Add category "partnership" (collab, partnership, sponsorship requests) → naya output → Gmail send to founder@... with original subject.
